Here is Another Actual Photograph Taken in Our Minneapolis Bakery

Does Your Dough Squeak?

UNCH IT—squeeze it—hear the squeak. The sound of strong dough is music to the ears of George Hammer one of our skilled bakers, who is working this Seal dough. Does your dough squeak? If it does, you will invariably have good bread. Squeaky dough results from using flour that contains strong gluten properly developed during fermentation.

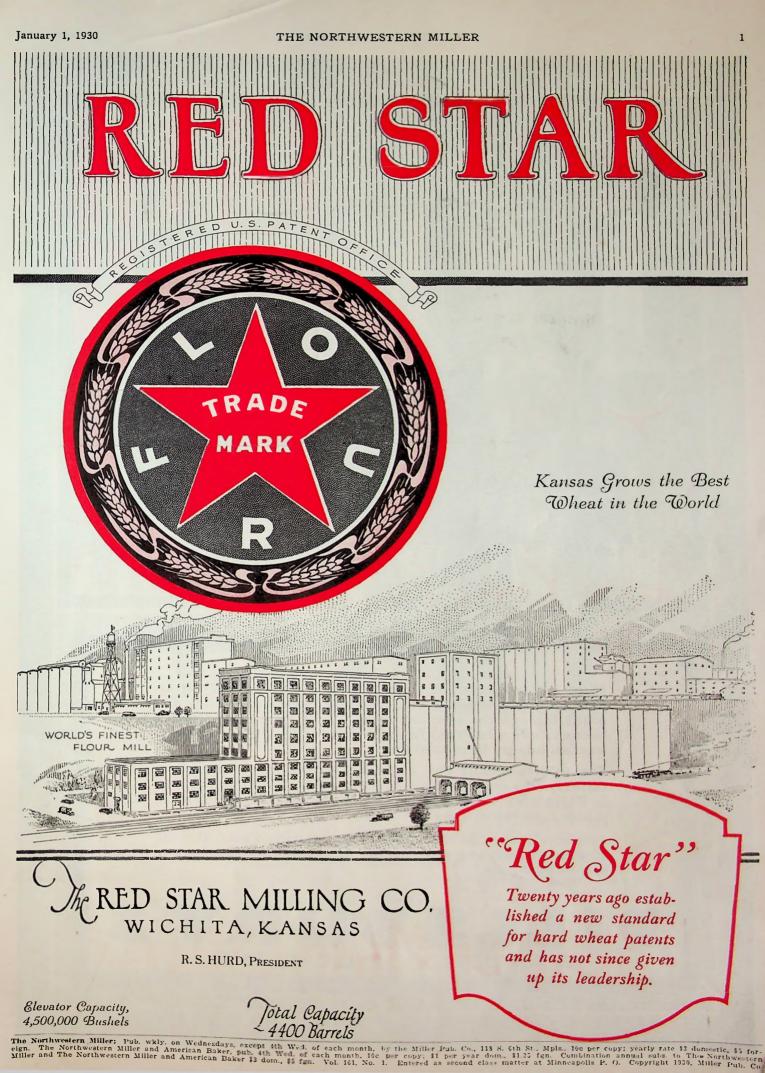

Seal of Minnesota flour gives you a dough full of squeaks—a dough that stands the punishment at the divider—a dough that produces bread of large volume, good grain, and fine texture.

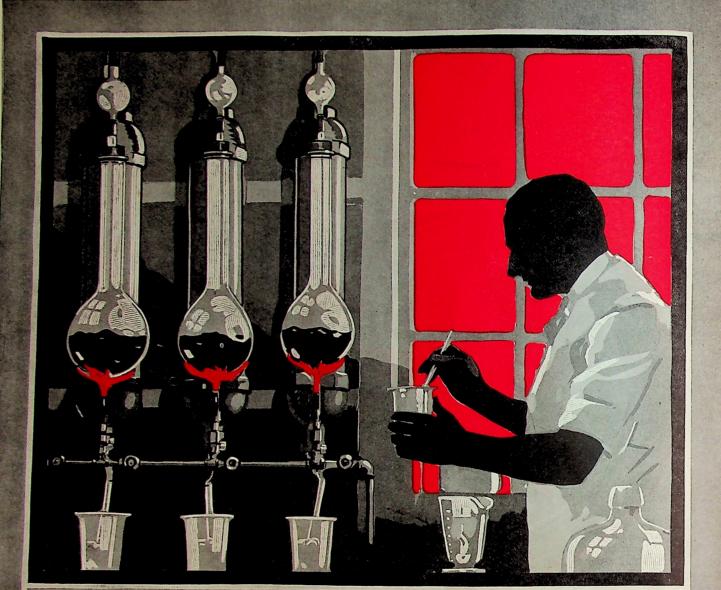

INTERNATIONAL MILLING COMPANY Minneapolis, Minnesota Buffalo, New York

SEAL OF MINNESOTA FLOUR MILLED FROM TESTED WHEAT

2

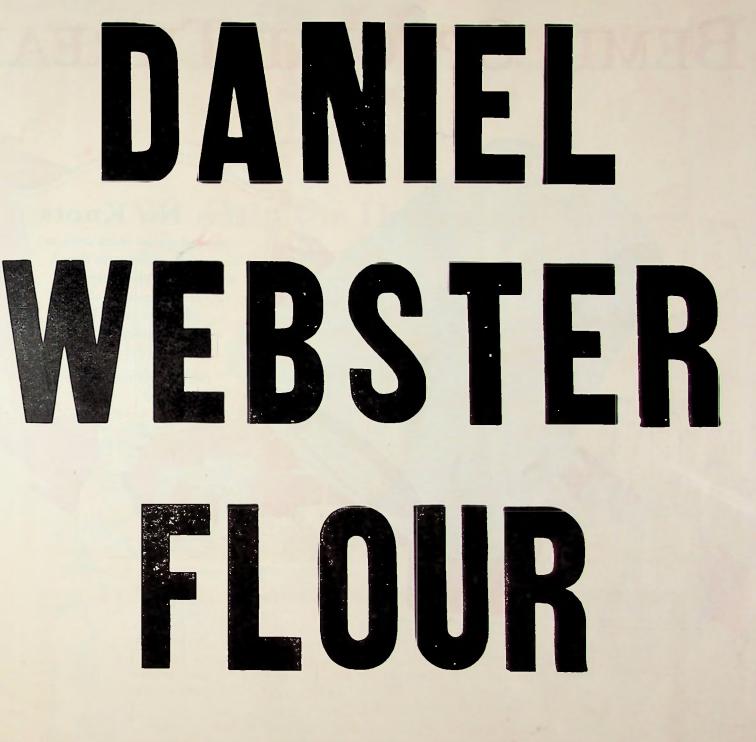

If the baker knows his flour will work today exactly as it did yesterday, he has gone a long way toward increasing his profit through the elimination of divider losses, absorption losses, oven losses, labor losses-all of them invisible wastes, hungry thieves of profit.

The retorts bubble day and night in the Pillsbury laboratories, and a real bakery runs tests all day long, maintaining in Pillsbury's Bakery Flours that uniformity which is so precious to the baker.

Pillsbury's must be more than a high quality flour. It must also be uniform and absolutely dependable. Bakers say it is-absolutely.

CHICAGO PEER OF MARKETS

THE great bulk of the grain business continues to flow to the world's central market.

Since 1848, first year of the Chicago Board of Trade, facilities for shipping, storing, receiving, handling, cleaning and conditioning have steadily moved toward perfection; today the vast farm areas and Chicago are in business together.

At the Board of Trade, markets for grain, cotton and provisions assure a fair, competitive price to both grower and consumer. Better hedging markets are nowhere to be found.

Stagnancy is as dangerous a pitfall to a market as it is to any business. And stagnancy is an unknown condition on the Board of Trade. Farm products arrive, are sold, and move out to their final destination. By lake alone, in 1929, grain shipments from Chicago exceeded 35,000,000 bushels.

Now a securities market has been added on the Chicago Board of

Trade and will grow soundly into prominence, particularly among investors in the great farm regions spreading out from Chicago. In securities trading, as with products of the farm, Chicago is destined for an even greater market future. Many signs point in this direction, including the predictions of experts that seats on the exchange will go to very high figures in the next two years.

LEANING on the Lever

The old Lifting principle as applied by Modern Management

The most interesting fact about Modern Management is that its logic is as old and as so as the hills.

With Archimedes, 2000 years ago, it says, today, "Give me a place to stand, and the right levers, and I will move the world."

With vision, based on dependable facts and figures, Modern Management makes for itself the "place to stand." And it leans on its levers. With sound Organization, Research, Budget Control, System, Order, it lifts with ease and precision its ever-increasing load of greater and greater accomplishment.

To assist Management in the right selection of these most effective tools of business is the service of Modern Accountancy. It contributes the resources of specialized knowledge and experience to developing the lifting, saving, economic practice of "leaning on the lever."

Ajinomoto, an Oriental Product Made from Wheat Flour

By Charles H. Briggs

Howard Wheat & Flour Testing Laboratory, Minneapolis

• HROUGH the kindness of a Japanese friend, a most interesting product has come into my G hands. Ajinomoto is a condiment manufactured from wheat flour, or, more accurately, from gluten made from wheat flour. Its name in Japanese signifies "condensed flavor." It is a white powder of pleasant flavor suggestive of beef tea or slightly salted chicken gravy.

On account of the fact that many Japanese and Chinese are rigid vegetarians, as required by Buddhistic and other religions, flavoring materials are in great demand and constitute an important part of the vegetarian diet. Many products of the soy bean, various seaweeds and other materials which seem to Americans more or less unusual are used in the Japanese and Chinese dietaries. Agar-agar is one of these seaweed products which finds considerable use outside of Japan as the basis of jellies used by bacteriologists in the cultivation of bacteria. The soy bean, though imported in large amounts and grown to a considerable extent in this country, is little used as human food, except in very small amounts in the preparation of diabetic foods. It finds use in these foods because of its practical freedom from sugar forming carbohydrates such as starch. Its chief use is as a source of oil, and the high protein residue as a constituent of stock feeds, but several varieties which the writer has grown as a vegetable make very good additions to the table. Some Americans are familiar with soy sauce, a brown, salty flavored product, often used in Chinese restaurants, and there are many other products prepared by fermentations or other processes from this valuable bean. It is largely because of the soy bean with its high protein content that Japanese and Chinese can maintain a vegetarian dict. The proteins from the soy bean, together with rice and other vegetable materials, seem to be able to supply a sufficiency of protein, but the meat flavors which the meat diet supplies are lacking, and it is this lack which seems to be filled by condiments of the nature of soy sauce and especially ajinomoto.

A Chinese chemist has recently published in Industrial and Engineering Chemistry an article which reveals the chemical nature of ajinomoto, showing that it consists largely of monosodium glutamate. One product examined contained 84 per cent of this compound. This article has revealed the process of manufacture by which ajinomoto is prepared, and satisfied a long-standing curiosity which we have felt concerning the reasons for certain chemical analyses required on flours purchased for export to Japan.

The gluten is broken down by acid hydrolysis into its simpler elements, among which glutamic acid is one of the main constituents.

S. Suzuki & Co., of Tokyo, are the largest manufacturers of ajinomoto in Japan. It is also made in Copyright, 1930, by the Miller Publishing Co.

a number of other Japanese factories, and in several Chinese ones.

Widespread Demand in Orient

WE have no statistics regarding the extent of its use in Japan and China, but there appears to be a very widespread demand for it in both of these countries, and it is exported to other eastern countries in large amounts.

The intensive study of the proteins that has been made from the time of Osborne's first researches about 1890 has shown that proteins are built up from about 20 nitrogenous compounds which, because of their general characteristics, are usually spoken of as amino compounds. Glutamic acid, which has been found to constitute the acidic basis of ajinomoto, is present as a constituent of many different proteins of both vegetable and animal origin. It takes its name from gluten, of which it was discovered to be a constituent by Ritthausen in 1866. It constitutes about 37 per cent of wheat gliadin and about 23 per cent of wheat glutenin.

Ornamental Toys Made of Wheat Gluten Are Much Loved by the Children of Japan

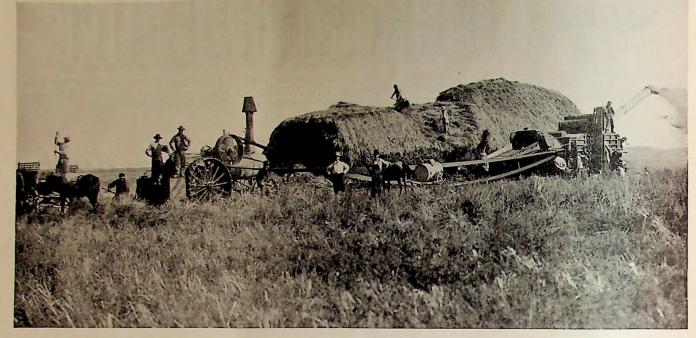

Hordein, the nitrogenous principle of barley, contains 36/6.41 per cent, and zein of maize contains 18@26 per cent. Glycinin, the nitrogenous element of soy beans, contains 19 per cent. In beef and chicken proteins there is present about 15@16 per cent, and other proteins contain about the same or less amounts of this amino acid. So it will be seen that the proteins of the cereals are by far the richest source of this compound, and because of the fact that wheat flour is the only one of these materials from which a fairly pure nitrogenous product can be separated by mechanical methods, that is, by washing gluten, it is the best source for the manufacture of glutamic acid.

Starch the By-Product

ON account of the limited demand for wheat starch in Japan and China, there is some difficulty in disposing of the starch which, in this case, is the by-product, though amounting to 70 per cent of the flour. Canadian flours, high in their content of the proteins, gliadin and glutenin, are preferred sources, as Manchurian and Chinese wheats have less true gluten.

The product can be manufactured from soy beaus, but perhaps we can infer from the preference for wheat gluten that the desired flavor is not obtained when the beans are used.

In the process of digestion, proteins are broken down more or less completely in the stomach and duodenum into their separate amino compounds, then absorbed into the blood. Nature then rebuilds the body proteins from these amino compounds. From this point of view, therefore, ajinomoto can be considered as a predigested food, supplying one of the body's important constructional elements but, as has been shown, the use of this material has grown to its present large proportions, not because it supplies one of a large number of necessary elements in tissue formation, but purely on its merits as a flavoring material. Although the price demanded, which is about \$4 a pound, seems high actually, it is relatively cheap, compared with flavors derived from meats such as chicken, etc. The reason for this is in the high flavoring power possessed by this material. A quart of well-flavored soup, having a meaty taste, can be made from a teaspoonful of the powder. It is said that the product has fifteen times the flavoring power of sugar and seven times the flavoring power of salt, though the flavor of the dry powder does not impress one as being powerful or in the least disagreeable. The manufacture of products of this character, valuable for their flavoring ability as well as for the food elements which they contain, might well be considered by Americans, and it is interesting to speculate on the possibilities of various combinations of prepared flavors and other foods manufactured in powder form which may in the future take the place of what we are inclined to term "natural foods."

Threshing in an Argentine Wheat Field

The Great Argentine Wheat Mystery By James McAnsh

HE Argentine Republic has in recent years been in the forefront of world agriculture, particularly as an exporter of wheat, but never has it played so important a part in the international wheat market as during the

the international wheat market as during the past year. Harvesting a record crop of approximately 320,000,000 bus from 20,500,000 acres sown in the early months of 1928, the republic found itself at the be-ginning of 1929 with a surplus of about 234,000,000 bus, after allowing for seed for the new crop and human consumption for the year. Such a quantity of surplus wheat in a country lacking in stor-age facilities or organized marketing meth-ods quickly reflected in world markets, es-pecially since Canada, the United States and Australia had also harvested very large crops. The latter countries were able through their excellent elevator systems to control the flow of their grain to world markets, but Argentina, not so organized, had no alternative but to ship its wheat as it arrived in steady volume at the vaas it arrived in steady volume at the various ports.

Sold at Large Discounts

Sold at Large Discounts THE South American grain, being of ex-cellent quality as compared with the frost damaged crop of western Canada and the irregular quality of United States wheat, became popular with importers, and under a system of marketing that prac-tically left price making in the hands of the buyers it sold at very large discounts under North American wheat. Throughout the year it flowed uninterruptedly toward the bins of British and European millers, and in the latter part of the season 1928-29 both Canada and the United States had been practically driven out of the Euro-pean export trade. pean export trade.

pean export trade. The growing importance of the Argen-tine Republic, particularly in relation to the wheat export trade of North America, is something in which every wheat produc-er in the United States and Canada is vitally interested. Here is their strongest competitor in world markets for the sale of an evergrowing wheat surplus, and a country which in the past has been more or less obliged to sell its wheat irrespective of price or return to the grower, because it lacked organized marketing methods. Comparatively little is known on this continent of the actual farming conditions in Argentina, and the time seems oppor-tune to reveal some of the information that has been gathered relative to growing and

handling methods on the farms and the rural economic conditions of the country. Some very interesting data were collected by W. J. Jackman who, as special rep-resentative of the Canadian Wheat Pool, made a three resentative of the Canadian Wheat Pool, made a three months' tour of Argentina and through his knowledge of the Spanish language was able to gather first-hand information on general conditions. Mr. Jackman has been the pool representative in Argentina for the past three years, and speaks with authority. In farming methods, allowing for the difference in climatic conditions, he found little difference from those

Typical Small Argentine Farm House and Buildings, Thatched Roof Here Taking the Place of the Usual Corrugated Iron

In Contrast, the Home of an Estanciero, or Estate Owner, a Member of the Class That Owns Most of Argentina's Farm Lands

in vogue in the United States and western Canada, with implements of a similar nature in use. Practically no summer fallowing is done, and the land is never idle, maize usually serving the purpose of a cleaning crop, or in districts unsuitable to the growing of maize, oats, barley or alfalfa being used as a change for wheat. The reaper-thresher has come into extensive use within recent years, the one adopted being similar to that in use in Australia. It is used for wheat only, the other crops being cut with an ordinary binder. Farmers handle all their wheat in bags, the only bulk handling being done at the loading ports. Each lag contains about 140 bis of wheat or, roughly, two and one third bush-els, and about 200,000,000 of these bags are said to be used annually. There are very few granaries or other storage facilities on the farms, and most of the wheat is hauled direct to the railway stations immediately vogue in the United States and western Canada,

the farms, and most of the wheat is hauled direct to the railway stations immediately it is threshed. The farmer himself does not usually haul the grain, this being done by "traperos," or carters, who make a busi-ness of freighting, for which they are pro-vided with huge wagons, of strong and heavy construction, drawn by from 10 to 20 horses and loaded with 100 to 200 hags of wheat, according to the condition of the roads. roads.

A Short Grain Haul

<text><text><text>

EDIT

MR. SHEFFIELD'S RETIREMENT

R ETIREMENT of B. B. Shefield as president of the Commander-Larabee Corporation to the inactive position of chairman of its board of directors removes from the ranks of active millers one of their great captains and from among the few survivors of the older generation of millers of the Northwest one of their most respected leaders. Fortunately, Mr. Sheffield is to retain contact with milling both through his nominal connection with the Commander-Larabee companies and in his personal association with the grain trade in which he has considerable investments.

Mr. Sheffield's success in his almost fifty years of service to milling has been due in about equal parts to his own intelligence and courage and to his faculty for choosing men of ability and inspiring them with loyalty to their jobs. "B. B." or, affectionately, "Ben," was boss when the time and event required, but he also has been the associate, friend and, on occasion, companion of the hundreds of men in the service of his numerous enterprises. In retiring as head of the largest of these he will continue as the friend, although no longer employer, of every man in the organization.

It probably is safe to assume that Mr. Sheffield will continue in a somewhat similar relationship to the milling industry. Always outspoken in conference, Mr. Sheffield's counsel often has kept milling from straying further from the fold of its own welfare than it otherwise might have done. Through all of his business life, the good of the industry has been uppermost in his thoughts, and it is not likely that the habits of half a century will easily be laid aside by him. Mr. Sheffield is of the type which never retires. He has put aside part of his responsibilities, but he will continue to be a miller through as many more years as may be added to his present active almost three score and ten.

Quite as a matter of course, William H. Sudduth, for many years vice president of the Sheffield-Sudduth companies and long and intimately associated with Mr. Sheffield both in business and personally, succeeds him as president. So closely have these two friends thought and worked together through the years that Mr. Sudduth's coming into command will insure continuance of the policies and maintenance of the same high standards of business conduct and integrity which have brought success to their joint administration.

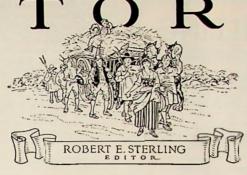

. . . MR. MENCKEN ON THE HOT DOG

 ${\bf R}$ ECENTLY we commented briefly on the subject of the hot dog sandwich, directing our remarks particularly to a newly perfected device which, upon the dropping of a coin in the slot, automatically produces the bun from one place, the hot dog from another, toasts them, introduces them, joins them in gustative wedlock and presents them to the customer, all in, so to speak, a moment.

Now comes a distinguished contemporary, Mr. H. L. Mencken, who, in an extended consideration of the hot dog, expresses the opinion that it "has come to That, of course, is more or less a matter of stay." one's digestive efficiency. We have known hot dogs, ingested under tempting but unfavorable circumstances, to linger interminably to our garlicky discomfort, but have not so far had Mr. Mencken's experience of feeling that they had come to stay. It is probable that Mr. Mencken wrote in a moment of gloom or indulged himself, as is his habit, in poetic license.

Where we do go happily, if not hopefully, along with Mr. Mencken is in his dream of elaborated and glorified hot dogs. He pictures them in numerous shapes and sizes, flavors them with herbs and spices of the East, dyes them with the colors of the spectrum and loads them with things that are good for us, even of antitetanic vaccine and green chartreuse. He then visions them reposing in an infinite variety of breads, rolls and buns to form a variegated procession of confections marching out of the doors of delicatessen shops and down through the ages.

The same bakeries that produce the bread used in

drug store sandwiches, he says, can and will produce first-rate rolls once they become convinced of the demand. In the end, he predicts, this country will advance by leaps and bounds beyond Germany in its sausage repertoire and have more kinds of rolls than there are in France. This we accept as a desideratum and cherish as a prophecy. Yet, we some way lack faith. The empiric mind of American butchers and bakers and sausage makers is more drawn to the mechanics of mass production and automatic distribution than to the high vision of Mr. Mencken. We fear the transcendental hot dog is yet far off.

. .

THE WHEAT GROWER REPLIES

CURRENT official report estimating this au-A tumn's wheat sowing in Kansas to be 12,687,000 acres may be accepted as the answer of the wheat growers of that state to the grave public concern over their distressful condition. The area sown shows an increase of nearly a million and a quarter acres over last year's harvested acreage and exceeds by nearly a quarter of a million acres the state's previous high record seeding. Similar increases are expected to be shown by the sown acreage reports of the neighboring states of Nebraska and Oklahoma; and in the Texas Panhandle, a comparatively new hard wheat section, estimates of the increase over last year's acreage run as high as forty per cent.

It takes a peculiar, although not essentially rare, quality of mind to reconcile these actual evidences of profit and satisfaction in wheat growing with the long continued outery over the low state of wheat farmers. Just now a new and powerful agency of government is engaged in an effort to carry out the will of Congress to force the price of wheat to a higher and 'stabilized" level in order that the wheat grower may be rescued from his present most outrageous fortune. So grave is the assumed need for this major operation that the well-being of the whole great grain marketing industry is being imperiled in the interest of what is held to be the larger good.

Yet the farmer himself, the man who recently substituted the tractor and combine for the plow and reaping hook, is disputing the need for eleemosynary attention by planting more wheat than ever before. On the evidence of his own acts he likes so well the bankruptcy to which he has been condemned by political pleadings that he is determined to get even more of it. It may be, of course, that he is merely betting on the farm board to get him a better price and wants to be ready for the visitation of blessings. If that be true, he has the advantage of virtually unlimited scope for future activities, for in the territory referred to there is still something like thirty million acres of marginal lands available for low-cost wheat raising, and already "corporation farming" is prepared to make the most of the great days in prospect.

Indeed, an entirely possible result of price stimulation by government aid may be so great an expansion of wheat production by mass farming on cheap western lands as to put wheat growers of older sections in greater difficulties than ever. For many years the strong bread wheats of the West have been narrowing the market for wheat grown on older fields of central and eastern states. Extension of this trend by insurance of even greater profits from western cheap-land wheat production would add greatly to the present difficulties of farming in older sections. What is true of wheat would be true, perhaps in less degree, of other cereal crops, the burden of increased

RIAL

production from new areas falling heavily upon the present agricultural establishment.

The figures quoted in the first paragraph have, therefore, a dual significance; first, their indisputable proof that wheat growing already is satisfactorily profitable under favorable conditions; second, that price enhancement will be promptly reflected in increased production by mass methods on cheap lands. Conceding to the Agricultural Marketing Act all of the power to increase and "stabilize" wheat prices claimed by its friends, it easily is conceivable that the next few years might bring under tractor cultivation a marginal land area equal to that now seeded to wheat in the great plains states.

. . .

WHY ALL THE SHOOTIN'

T is difficult for the lay mind to comprehend what is being accomplished or likely ever to be accomplished by the mighty effort to work out "a plan for the consolidation of the railway properties of the continental United States into a limited number of systems." This was required of the Interstate Commerce Commission by the transportation act of 1920, and for nine years that agency of government has been either working or loafing on the job, having only last week so far advanced it as to warrant the issuance of a tentative scheme to rescramble the country's railway properties into a new dish that apparently is neither economic fish, flesh or red herring.

Professor Ripley, who had a plan of his own for revising the ownership and management of railways, says that the commission has been engaged in "economic philandering rather than statesmanship." This probably is no more than a high hat way of saying he likes the commission's set-up less than he does his own. This, however, also amounts to little or nothing, for almost anybody could take a railway map and sufficient colored chalk and re-create transportation control on still other lines and defend his scheme against either that of Professor Ripley or the commission.

The country's rail transportation service as it exists today is the result of natural development, of sweat and money and courage triumphing over obstacles. In a broad way it has been created to meet industrial. commercial and agricultural needs, the service expanding as warrant for it appeared. In a broad way, also, it continues to serve this need subject to the ever increasing legal restraints on invested capital, operation, rates and labor. It is by no means a unit or even an altogether orderly system, but it functions capably and supplies the country with the most effective and relatively the cheapest transportation in the world.

What, in view of these facts, is to be accomplished by a gigantic experiment in changing ownership and operating control to comply with a fanciful scheme worked out on a map? Why undertake to create entire new systems, such, for instance, as the amazing one extended into alien territory and touching at either extremity the Northwest and the Florida coast; or of putting twenty or thirty unrelated lines under one ownership and calling it a railway system?

It is to the credit of the Interstate Commerce Commission that it has expressed its own lack of confidence in the scheme and has emphasized the point by taking nine years to formulate even a tentative and admittedly faulty proposal. The railways naturally are for or against the plan outlined according as their own interests are or are not favored. The country, so far as its view is revealed in public statements of its wise men and through newspapers, accepts the affair as either theoretical or political or both.

At the moment, considering how little good ever can be accomplished by the artificial creation of nine or nineteen or any other number of railway "systems" and how much evil easily can grow out of continued agitation of the question, a motion to lay the business on the table probably would carry largely and he of widespread assurance. Since rail transportation has been developed to its present remarkable efficiency through individual initiative, it seems entirely safe to leave its future to the same tested and proved force.

Domestic Demand .- Interest of buyers in the flour market continues quiet, with sales in some sections considerably below normal, even for this time of the year. Spring wheat mills in the Northwest are experiencing a particularly slow period, with

the average of new business around 10 per cent of the capacity reporting. The Southwest is doing somewhat better, with 32 per cent of capacity sold. Other milling centers are somewhere between the two. With December bookings so light, a resumption of buying in order to build up stocks is expected during January, although opinion on this is by no means unanimous. No one in the trade seems to have a very accurate idea whether stocks in buyers' hands are light or heavy. or whether unfilled orders on the books

of mills are sufficient to care for the needs of customers for another 60 or 90 days. The best information leads to the conclusion that a moderate increase in demand will come in January and February if no unusual developments occur in the wheat market. A sharp movement either way in wheat prices might change the flour buying situation in a short while.

Export .- Except for a few scattered workings to Holland and Latin America, there has been virtually no activity in the export field. Inquiry is fair, but bids are unworkable. Demand is mostly for export straights and patents.

Prices .- Quotations are 10@ 20c bbl higher than a week ago

Production .- Improvement in shipping instructions is reported from all of the principal milling sections of the country, doing much to offset the lack of new business. Millers have been concentrating on the securing of specifications for several weeks, and these efforts are apparently beginning to show results. One of the principal factors stimulating the flow of directions, however, was the arrival on Jan. 1, of the period in which carrying charges of 1/3c per bbl per day would be assessed on delinquent contracts. It is believed that rather a large volume of flour, booked for delivery prior to Jan. 1, still has not been ordered out, but the carrying charge undoubtedly reduced this amount considerably.

Despite the reported improvement in shipping instructions, the production of flour in the week ending Dec. 28, as reported to The Northwestern Miller, was 143,000 bbls less than in the preceding week, very section of the country sharing in the decrease. This, however, was principally the result of the Christmas holiday The total output was 1,276,215 bbls, compared with 1,419,741 in the preceding week, 1,295,729 in the corresponding week of last year, and 1,349,239 in 1927.

Millfeed .- Current demand for millfeed is the slowest in many months. Eastern buyers apparently are able to satisfy current needs from distress shipments in transit at prices materially lower than millers in the Northwest and Southwest ask and some good sized quantities of transit bran were purchased as a result of this situation. Mills, with production light, and experiencing a fair mixed car trade, continue to quote nominal prices little changed from a week ago, but actual sales of ca lots are \$16 1.50 lower.

European Markets by Cable

LONDON, ENG., Dec. 31.-(Special Cable)-The holiday feeling continues, but the market is firm with occasional sales at prices slightly below mill offers. Home milled competition is less severe, as prices are higher owing to the cheapness of millfeed. Today's quotations: Canadian top patents 40s 6d@41s per 280 lbs (\$6.90 @6.99 bbl), Canadian export patents 37s 6d@ 39s (\$6.39@6.65 bbl), Kansas export patents 38s (\$6.48 bbl), American milled Manitobas 40s (\$6.82 bbl), Australian patents 34s 3d (\$5.83 bbl), Argentine low grades 18s (\$3.07 bbl), home milled, straight run 34s 9d (\$5.91 bbl), Minnesota export patents 39s (\$6.65 bbl).

Liverpool .- The undertone of the flour market is firm, and prices of imported are higher, but sales are quiet. Today's quotations: Canadian top patents 39s 6d per 280 lbs (\$6.73 bbl), Canadian export patents 37s (\$6.31 bbl), American soft winter patents 36s (\$6.48 bbl), Kansas export patents 36s 6d (\$6.22 bbl), Australian patents 34s@ 34s 6d (\$5.80@ 5.88 bbl), American low grades 27s 6d (\$4.69 bbl).

Glasgoto .- French and German flours are being pressed for sale at cheap prices. Sales of American and Canadian are at a standstill. Today's quotations: Canadian export patents 38s per 280 lbs (\$6.48 bbl), Kansas export patents 37s (\$6.31 bbl). Canadian winters 36s 6d (\$6.22 bbl), American winters 38@39s (\$6.48@6.65 bbl). Australian patents 34s 6d (\$5.88 bbl).

Belfast.-Firmer mill offers are helping the market, but sales are possible only at the old prices. Today's quotations: Canadian top patents 42s per 280 lbs (\$7.16 bbl), Canadian export patents 40s (\$6.82 bbl), American milled Manitobas 39s 6d (\$6.73 bbl), home milled, delivered, 37@39s (\$6.31@6.65 bbl), Canadian soft winters 38s (\$6.48 bbl).

ters 38s (\$6.48 bbl). Amsterdam.—It is impossible to do any business in flour following the advance in prices. Resellers are offering at considerably below mill prices. Today's quota-tions: Canadian export patents \$7.60@7.80 per 100 kilos (\$6.76@6.94 bbl), Kansas top patents \$7.05@7.20 (\$6.26@6.44 bbl), Kansas straights \$6.90 (\$6.14 bbl), home milled, delivered, \$6.35 (\$5.63 bbl), Belgian flour \$6.40 (\$5.69 bbl). *Hamburg.*—Brisk buying of imported flour is being done in order to forestall the impending higher duty. Today's quotations: Canadian top patents \$7.55 per 100 kilos (\$6.71 bbl), Canadian export patents \$7.40 (\$6.59 bbl), Kansas patents \$6.85 (\$6.05 bbl), home milled, delivered, \$10.10 (\$9.02 bbl), rye flour \$6.45 (\$5.72 bbl).

bbl).

bbl). Copenhagen.—The usual holiday feeling is prevailing, and buyers are showing no interest in quotations. Today's quotations: Canadian top patents \$7.95@8.20 per 100 kilos (\$7.06@7.30 bbl), Canadian export patents \$7.65@7.90 (\$6.79@7.03 bbl), Kan-sas patents \$7.15@7.35 (\$6.35@6.53 bbl), Oklahoma patents \$7.15@7.40 (\$6.35@ 6.59 bbl), home milled, delivered, \$5.75 (\$5.09 bbl).

WHEAT

The wheat market at London is quiet and firmer, while at Liverpool a firmer tone has resulted in some sales. Demand for imported wheat is small at Hamburg, as prices are too high.

MILLFEED

It is difficult to make sale of millfeed at London, but prices are somewhat This under to market she of market at 15 of ton, exemption, but product at $\pounds 5$ liss. Plate pollards, afloat, are offered at $\pounds 15$ s of ton, exemilar, shipment, at $\pounds 5$ liss. Liverpool, the market is steady, and there is a moderate inquiry. Although demand at Belfast is poor, the market is steady with bran quoted at $\pounds 9$.

OIL CAKE

Demand for oil cake at London is improving. Homemade cottonseed cake is quoted at $\pounds 6$ 5s ton, ex-mill, and Egyptian at $\pounds 5$ 15s, ex-ship. At Liverpool, imported linseed cake is steady, with American quoted at $\pounds 11$ 15s and Plate at $\pounds 12$ 10s, c.i.f. Egyptian cottonseed meal is priced at $\pounds 6$ 1s 3d, ex-ship.

OATMEAL

There is a quiet tone to the London oats products market. Scottish rolled oats and oatneal are quoted at 41s 3d per 280 lbs, ex-mill, and continental at 39s 6d, c.i.f. American and Canadian rolled oats are offered at 37s 3d, and oatmeal at 35s 9d, c.i.f. At Belfast, the market is also quiet, but German competition is less keen. American rolled oats are quoted at 37s@37s 6d, c.i.f; Irish, 43@45s, ex-mill; German, 35@ 36s, c.i.f. 000

The Story of Haagsche Hopies

"H AAGSCHE HOPJES" were invent-ed, not by Heer Hendrik Baron Hop, as has been said, but by Heer Theodorus Van Haaren, who took up quarters in a building in The Hague, Holland, on April 19, 1793, according to an advertisement in the Haagsche Cour-ant which reads as follows: "Theodorus Van Haaren, Confectioner, Pastry Baker and Dessert Maker, now dwelling in Leidschewagens in the Voorhout at The Hague, begs to announce that on the first May he will remove his business to of of May he will remove his business to the other side, the seventh house from the Lord's Lodgement; he further so-licits the patronage of all Gentlemen and Ladies, Burghers and Inhabitants, and assures them of civil and prompt service."

As an expert among pastry bakers, Heer Van Haaren did not know that he was to lay the foundation for the manu-facture of an article which, to no lesser degree than the other attractions of the Netherlands Residence, was destined to carry the fair name of The Hague to all parts of the world. Curiously enough, the making of the first Hangsche Hopjes

was the outcome of a political event. When, on Nov. 14, 1792, the city of Brussels was taken by the French gen-eral, Dumouricz, the ambassador of the States-General at the court of the Aus-trian Netherlands at Brussels, Hendrik trian Netherlands at Brussels, Hendrik Baron Hop, a wealthy, aged and unmar-ried nobleman, found himself forced to give up his residence in that city and fiee with the Austrians to the town of Roer-mond, in Holland. While the Austrian government marched on to Dusseldorf, Baron Hop received a letter from the States-General in which he was ordered with the austrian general with to go to The Hague. He complied with this order and announced his arrival in the capital in a letter dated Nov. 27, 1792. Since he had no residence of his 1792. Since he had no residence of his own, he took up quarters in the house of Van Haaren, the pastry baker, as may be seen from old letters addressed to him there. These letters are now in the possession of Messrs. P. Nieuwerkerk & Son, The Hague. The baron, who was a lover of good coffee,—after his death there was found among his effects a coffee roaster, an appliance then seldom seen in private homes,—asked Van Haaren to make for him a coffee confection or caramel in

coffee confection or caramel in which the coffee flavor was predominant. By condensing coffee in exact propor-tions with boiling sugar and fresh cream, a mixture came out of the pan which, when cooled off and cut up into small,

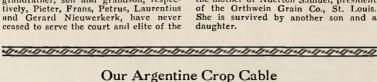

369

a institute cance out of the plan when cooled off and cut up into small, square blocks, made the new confection. Hop was much pleased with this prod-uct, bought large supplies of it and pre-sented it to his friends and acquaint-ances. Even after his death it was found that he owed Van Haaren the sum of eight guilders and fourteen pence. Noth-ing was more natural but that his friends began to call this product "Hopjes" (little Hops), and so the name of Hopjes came into being. After Hendrik Hop's death his name was to be per-petuated and to attain world fame by the delicacy which had been made for him. P. Nieuwerkerk, Van Haaren's successor and great-grandfather of the successor and great-grandfather of the present owner of the firm, set to work

with all his power to bring the business to a greater height, and he was success-ful, for all the sovereigns of the Neth-erlands and princes and princesses of Orange-Nassau have since honored him and his successors with continuous pur-chases of all confections required by the chases of all confections required by the court. This example was of course fol-lowed by the diplomatic corps, and so the Nieuwerkerks, great-grandfather, grandfather, son and grandson, respec-tively, Pieter, Frans, Petrus, Laurentius and Gerard Nieuwerkerk, have never ceased to serve the court and elite of the

most international city in the world .--The Hague. 000

MRS. E. E. SAMUEL DEAD Sr. Lorns, Mo.-Mrs. E. E. Samuel, widow of Edward E. Samuel, of the E. M. Samuel & Son Grain Co., died here on Dec. 24 after a paralytic stroke suf-fered a fortnight ago. Mrs. Samuel was the mother of Aderton Samuel, president of the Orthwein Grain Co., St. Louis. She is survived by another son and a daughter.

BUENOS AIRES, ARGENTINA, Dec. 31.

WTEATHER in the Argentine Republic is good. Offers for new crop wheat are light as yet, as the damaged zones are first to harvest, but receipts are increasing. Exporters are buying and market tone is steady. Brazil is prominent as a buyer this week.

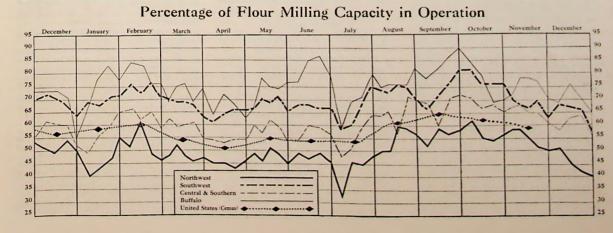

CONDUCTION CONDUCTION CONDUCTION CONDUCTION CONDUCTION In Like Lions, but Out Like Lambs

In Like Lions, but Out Like Lambs FOOD stocks, for the most part, closed the year of 1929 with a moderate gain over the previous week. But a comparison with the close on the opening day of 1929 shows disastrous results, most of them due to the crash in October and November. The close on Jan. 2, 1929, is given in a separate column in the table where the being closely shorn. General Baking, for instance, entered the year at 10%, but finished at 3%. Other sharp declines for the year follow; General Mills, from 84 to 50; Kroger Grocery & Baking, from 1197, to 4314; Park & Tilford, from 821/2 to 25; Purity Bakeries, from 136 to 785; United Biscuit of America, from 50 to 37/4; Ward Baking A, from 777/4 to 221/4, B from 18 to 4/2, and preferred from 80 to 64. With the diagnosis of the huge market crash as a "necessary opera-tion," however, stocks may he said to be convalescing very nicely. In spite of breaks during the week, trading was fairly steady, and the close of the year found most stocks slightly higher than on Dec. 24. National Biscuit made the strongest gain and National Tea with 5½. Other stocks to show gains of two or more points for the week were American Stores, Continental Baking A, Corn Products, General Baking preferred, Loose-Wiles and Purity Bakeries. Ward Baking preferred was the only stock to take a real loss, dropping 4 points, although four others lost a fraction of a point.

The highest and lowest prices for food stocks listed on the New York Stock Exchange registered in 1929 and the close on Dec. 31, 24 and 17 and Jan. 2, 1929, are here shown (quotations by courtesy of Chas. E. Lewis & Co., Minneapolis):

KANSAS CITY BOARD PICKS CANDIDATES FOR OFFICES

CANDIDATES FOR OFFICES KANSAS CITY, Mo.-Nominations for candidates for offices of the Kansas City Board of Trade were posted last week. The nominating committee was composed of W. C. Goffe, chairman, G. F. Hilts, D. C. Bishop, H. F. Spencer and F. C. Vin-cent. The election will be held Jan. 7. R. A. Jeanneret, Incumbent first vice president, will oppose S. H. Miller for the presidency. F. A. Theis, second vice president during 1929, automatically be-comes first vice president under the rules of the exchange. Candidates for second vice president are J. H. Woolridge and W. B. Lincoln. A board of six directors and an arbi-

A board of six directors and an arbi-tration committee of five also will be chosen. 000

J. V. LANE CO. AFFILIATES WITH MARSH & McLENNAN

NEW YORK, N. Y.-To facilitate the work of the all risks flour organization, J. V. Lane & Co., Inc., has announced affiliation with Marsh & McLennan to affiation with Marsh & McLennan to handle marine and transportation insur-ance, effective Jan. I. This insurance business will continue to be supervised by Joseph V. Lane and A. C. Gelder-man. J. V. Lane & Co., Inc., will con-tinue work in connection with the all risks organization and the present ar-rangement will give the company more time for the problems of the export flour trade. The Millers Export Inspection Bureau will function as heretofore. Chubh & Son will continue its support of the Millers Export Inspection Bureau and the all risks flour organization, both here and abroad.

VERY UNFAVORABLE WEATHER FOR WHEAT STRIKES OREGON

PORTLAND, OREGON.—The winter wheat acreage in Oregon is estimated at 896,000 acres, as compared with 924,000 last year. The most unfavorable weather conditions The most unfavorable weather conditions in years continued throughout the seed-ing period, and as a result the crop was seeded very late and practically all in dry soil. As a consequence of the pro-longed midsummer and fall drouth, the abandonment is expected to be large as compared to the negligible abandonment last season. The condition of the crop was estimated on Dec. 1 at 54 per cent as against 85 per cent a year ago and a nine-year average of 92 per cent. Gena nine-year average of 92 per cent. Gen-eral rains that fell early in December, however, are believed to have materially benefited the crop.

000

ROUMANIAN WINTER WHEAT ACREAGE CUT 12 PER CENT

WASHINGTON, D. C.—The United States Department of Agriculture has been ad-vised that the first estimate of the area sown to winter wheat in Roumania for harvest in 1930 is 6,549,000 acres, a de-crease of 12.2 per cent from the winter wheat area sown last year, and the small-est acrease on since 1923 est acreage sown since 1923.

COLD HURTS OKLAHOMA CROPS

COLD HURTS OKLAHOMA CROPS OKLAHOMA CITY, OKLA,—Low tem-peratures prevailing the middle of the month in Oklahoma were unfavorable for all grain crops, according to J. P. Slaughter, federal erop reporter and weather-man. Field work was suspend-ed for a few days, though winter plow-ing on the whole is normally advanced, the report showed. Cotton still in the fields was damaged considerably but is now practically all gathered. Condition of pastures is poor and stock is being fed from feed stocks. The federal-state crop reporters estimate the Oklahoma crop reporters estimate the Oklahoma wheat crop to be 86 per cent of normal as compared with 73 per cent a year ago. Soil moisture over the state is very sat-isfactory, and the wheat has a good color.

The salaries of the president and cabi-net of Ecuador have been reduced 25 per cent in line with a policy of rigid econoniv.

KELLOGG GIVES VIEWS ON NEW GRAIN AGENCY

Speculative Elements in Grain Trade Not Likely to Be Enthusiastic About Plans, Co-operative Read Says

Special ive Elements In Grain Trude Not Special ive to the Enthasias for About Plans, Likely to the Enthasias for About Plans, Likely to the Enthasias for About Plans, Likely of the Federal Farm Board, W. ence with the Federal Farm Board, W. ence W. Board, W. ence W. Board, S. Bard, S. Bar

Replying to questions as to whether or not the grain corporation would under-take operations in the foreign market, Mr. Kellogg said that he had given that matter needed. Mr. Kellogg said that he had given that matter no careful consideration, but that the grain corporation would be prepared to carry out all the functions of a grain marketing organization. He suggested, however, that the foreign field might be the concern of a stabilization organiza-tion and the farm board rather than the

ton and the family board rather than the concern of the grain corporation. It was Mr. Kellogg's belief that branches of the farmers' grain corpora-tion would be established soon in all the terminal markets and that the directing talent for these branches would be sought in the grain trade in the several mar-kets. That is to say, for the branch at Kansas City, the corporation would en-deavor to obtain the services of an experienced grain man in the Kansas City market.

Governor McKelvie said that on his recent western trip he had found no evi-dence of any concerted propaganda drive against the farm board among the farm-ers. GEORGE H. MANNING.

BURLAP AND COTTON BAG PRICES LOW, FIRM STATES

Buyers of cotton bags should have no hesitancy in covering on their near-by requirements at the present time, but an advance in price is likely after the first of the year, the Chase Bag Co., New York, believes. Basing their statement on the last cotton report and on existing conditions, this firm draws the following conclusions:

"Undoubtedly 15,000,000 bales will be sufficient for all requirements. Manches-ter reports trade slower and below production, with bad advices from India, where the political situation is still tense. The stock market debacle in Wall Street The stock market debacie in Wall Street several weeks ago caused an abrupt ces-sation of buying activity upon the part of consumers throughout the country, which only added depression to an al-ready lethargic and receding market in all manufactured cotton goods. At the

moment demand for goods is practically nil, and the marketing methods adopted by the commission houses several months ago have in the face of adverse condi-tions been discontinued. "Mills in an attempt to stem the down-ward trend in production of 25 per cent, but this will not begin to have a really noticeable effect until after the first of the year. Prices of all cotton goods are now relatively low, but likely to remain so until after Jan. 1, when we may see an improvement."

an improvement.' Burlap prices also are low at the pres-ent time, the company states in its publi-cation, Bagology, and the buyer can hardly go wrong in purchasing burlap bags around present levels for either prompt or deferred shipment.

prompt or deferred shipment. Although it was expected several months ago when mills increased their working hours from 54 to 60 that de-mand would not absorb the supply, stocks in Calcutta have not accumulated

mand would not also the supply stocks in Calcutta have not accumulated to any extent, it is pointed out. "There will have to be a very substan-tial increase in Calcutta stocks to make them unwieldy and a price determining factor. For economic reasons, and hav-ing in mind the operations of jute mills in Europe, we do not believe any change in the present 60-hour schedule is con-templated by Calcutta mills." Possibilities that the political situation in Calcutta may lead to strikes in the nulls after the first of the year are also expressed. "There are now three mills shut down on account of strikes, which indicates a lack of serenity in the labor ranks of the mill workers. If such condi-tions spread, it is likely that production will be seriously curtailed, with the con-sequent price resultant following." sequent price resultant following." 000

KROGER GROCERY & BAKING

TAKES OVER SIX COMPANIES TAKES OVER SIX COMPANIES NEW YORK, N. Y.—Authorization has been given by the board of directors of the Kroger Grocery & Baking Co. for the issuance of 122,845 shares of common stock in exchange for the businesses of H. W. Bracy & Co., McCarty Wholesate Grocery Co., Inc., Milgram Stores, Inc., Piggly Wiggly Haynes, Inc., Richards Bros, Roanoke Grocery & Milling Co., as well as to provide for the payment of stock dividends aggregating 5 per cent, payable in common stock during 1330. The 31,166 shares being issued in ex-change for these assets and businesses are being capitalized on the books of the being capitalized on the books of the company, in the aggregate, for \$1,039-924, this being the combined book value of such concerns.

000

ELLISON FIRM BUILDS ELEVATOR The Ellison Milling & Elevator Co., Ltd., Lethbridge, Alta., has completed the construction of a 60,000-hu elevator at Lethbridge, the first unit of a 200,000bu plant, which the company plans to build. Installation of the machinery has build. Instantion of the machinery has not been fully completed, but since the new elevator will not he needed this shipping season, it is planned to carry forward the work gradually and have the elevator in operation next crop year. The company also operates a chain of 20 ele-vators in southern a blacta vators in southern Alberta.

89 VESSELS AT BUFFALO AT CLOSE BUFFALO, N. Y.-Moored at the break-wall and at docks ready to go to eleva-tors for unloading, or remaining loaded until spring, 89 vessels held winter grain storage cargoes amounting to 28,572,404 bus at the season's close. With five more vessels in the storage fleet than there were in 1928, the total cargo was only 1,400,000 hus more than last year. In the storage fleet there are 82 boats load-ed with domestic or bonded wheat, four with barley, flax cargoes on two with a cargo of oats on another.

MARTIN NESSLER PASSES AWAY

MILWAUKEE, WIS. - Martin Nessler, who carried on his flour jobbing busi-ness under the name of the Martin Nessler Co. in Milwaukee since 1894, died at Milwaukee, Dec. 22, at the age of 66 years. He had been active in the flour business until a short time before his death. Mr. Nessler was horn in Frei-sack-Mark, Brandenburg, Germany, Ocl. 7, 1863, came to New York in 1888 but resumed his residence in Germany during 1890-91. On his return to this country he engaged in the steam pipe and boiler insulation business at West Superior, prior to beginning the flour business in Milwaukee in 1894. In Ger-many he had here an accountant forhe had been an accountant for many several baronial estates in Brandenburg and had served in the Black Hussars. His wife, a son and a daughter survive him.

000

VALUE OF NEBRASKA CROPS HIGHER THAN FOR LAST YEAR

OMAILA. NEB.—Nebraska's crops are valued at \$316,915,000 as compared with \$326,666,000 last year, according to final figures on this year's crop by the state and federal division of agricultural staand federal division of agricultural sta-tistics. This value has been exceeded but twice within the past 10 years. Twenty crops show increased production and nine crops lower production than last year. Three crops set new records. The cropped area was over 2 per cent greater than last year and yields 4 per cent above the 10-year average. Winter wheat averaged 16 bus, against

Winter wheat averaged 16 bus, against 19.1 last year, and the production is 53,-664,000 bus, compared with 66,097,000last year. It is valued at \$53,127,000. Spring wheat averaged 14.9 bus, com-pared to 17.9 last year, and the produc-tion is 2,891,000 bus, against 3,222,000 last year and the five-year average of 2,844,000. The total production of all wheat is 56,555,000 bus, against 69,019,000 last year and the five-year average of 55,300,000.

BAKERY REINCORPORATES

TOLEDO, OHIO.—The Strabley Baking Co., 4711 Scoville Avenue, Cleveland, Ohio, has reincorporated with a capital of \$200,000, and the following officers: L. R. Strabley, president; W. H. Dixon, vice president; E. G. Giles, secretary the behavior president; E. G. Giles, secretary-treasurer; Paul Mahler, assistant secre-tary-treasurer. The bakery does a whole-sale business, catering principally to hotels and restaurants.

000

CORN PRODUCTS DECLARE DIVIDEND

NEW YOBK, N. Y.—The hoard of direc-tors of the Corn Products Refining Co. has declared an extra dividend of 75c a share on the common stock, in addition to the regular quarterly dividend of 75c on the common and \$1.75 on the pre-ferred. In June the common stock was placed on the \$3 annual basis and an ex-tra 50c a base was declared tra 50c a share was declared.

000

NEW MEXICAN RATES EFFECTIVE NEW MEXICAN RATES EFFECTIVE OKLAKOMA CITY, OKLA.—Southwestern shippers to Mexico have been advised that the rates of duty under the new tariff became effective Jan. 1. Goods ar-riving at Mexican points after Jan. 15 will be assessed the new rates and will not be granted any refund of the con-sular fee.

INDIANA GRAIN DEALERS TO MEET TOLEDO, OHIO.—The Indiana Grain Dealers' Association will hold its annual meeting at Indianapolis Jan. 23-24, cording to announcement of Fred K. Sale, secretary.

FEWER WHEAT FARMS, BUT MORE WHEAT

DURING a period of 15 years there has been a greater change in the size of farms and character of opera-tors in Montana than in any other part of the United States, while methods of production have been no less than revolutionized, according to the Northwest Baccaractering Bethe Northwest Bancorporation Re-view. There were about 35,000 wheat farms in Montana in 1915-17, whereas today there are 14,000; operators of these 14,000 farms are cultivating more acres than did the 35,000 farm-or of 15 ware soft on and they have ers of 15 years ago, and they have trebled the state's production of wheat. Farm lands in the state are now cheaper (statewide average) by 28 per cent than they were in 1912-14.

MISSOURI CO-OPERATIVE ACTIVE IN FEED MILLING

The Missouri Farmers' Association, " The MISSOURI Farmers' Association, a strong co-operative organization, will start feed milling operations on a large scale shortly after Jan. 15, when their new plant in Springfield, Mo., will be completed. The entire enterprise, includ-ing purchase price of the property and new machinery installed, will represent an investment of any operating Sociation

new machinery installed, will represent an investment of approximately \$225,000. The association has operated a feed mill in Springfield for the past four years, but expansion in the old plant no longer was possible, according to officers, and the mill and elevator of the Meyer Milling Co. was bought hast summer at an announced purchase price of \$100,000. About \$75,000 worth of new machinery was installed, and machinery from the old plant is also being moved into the new one. new one.

Sales from the old feed mill have to-taled more than \$1,000,000 in each of the ment have the processing to William Wadsworth, editor of the Farm Club News, official bulletin of the association. Mr. Wadsworth predicts that, from the new plant, this business will be trebled past two y Wadsworth, or quadrupled. 000

IMPORTS OF SCREENINGS SHOW 70 PER CENT DROP

Shipments of Canadian screenings to United States markets thus far this crop year are fully 70 per cent less than a year ago, according to the estimates of Minneapolis dealers. In view of the fact that screenings forms the basis for many and screenings forms the basis for heavy varieties of prepared feeds, the shortage indicates that higher prices and the use of substitutes may be expected. A statement issued by the Board of Grain Commissioners for Canada shows

that the total shipments of screenings from Fort William and Port Arthur to from Fort William and Port Arthur to Duluth-Superior from Aug. 1 to Dec. 7, close of navigation, were 23,451 tons by water, while by rail the shipments up to Dec. 15 to Minneapolis were 276 tons, Duluth 900, Buffalo 4,485, Lancaster, Pa, 581, York, Pa, 542, a total of 30,235. From interior terminal elevators at Moose Jaw, Saskatchewan and Winni-peg, there were shipped to Minneapolis all-rail from Aug. 1 to Dec. 15, 1,478 tons, to Milwaukee 152, and to Buffalo 220.

MILWAUKEE FLOUR RECEIPTS 400,000 BBLS LESS FOR 1929

MILWAUKEE, WIS.—Flour receipts at Milwaukee, according to figures compiled by H. A. Plumb, secretary of the Mil-waukee Chamber of Commerce, for the 12 months ending Dec. 28 were 400,000 bbls lower than during 1928. Mr. Plumb's figures are derived from reports fur-nished each week by railroad freight agents, and omitting the 000's, are as follows:

| | -Re | ceipts- | Shipn | nenta- | |
|--------------|--------|---------|--------|--------|--|
| Commodity- | 1929 | 1928 | 1929 | 1928 | |

RESIGNS TO ENTER GRAIN BUSINESS

MILWAUKEE, WIS.—GUY W. Winston, associated for a great many years with B. J. Aston, Inc., Milwaukee grain brokerage concern, has resigned as sec-retary of that company and will engage in business for himself under the style of G. W. Winston & Co., grain commis-sion, 373 Broadway, Milwaukee. Mr. Winston is a member of the Milwaukee chamber of commerce and is a veteran trader there. trader there.

CELEBRATE 41ST ANNIVERSARY

CELEBRATE 41ST ANNIVERSARY PHILADELPHIA, PA.—On Dec. 22 the Horn & Hardart Baking Co. celebrated its 41st anniversary. The company started in a small shop at 39 South 13th street, this eity, and has grown so that it now has 71 separate establishments, including large central bakerics, retail bake shops and restaurants, serving 250,000 Philadelphians daily.

W. H. SUDDUTH HEADS **COMMANDER-LARABEE**

B. B. Sheffield, Retiring President, Becomes Chairman of the Board of Directors

Directors At a special meeting of the board of directors of the Commander-Larabee Corporation, held in Minneapolis Dec. 28, William H. Sudduth, first vice president, of the corporation, was elected president, to succeed B. B. Sheffield, retired. Mr. Sheffield was persuaded to accept the chairmanship of the board of directors. Other officers elected were: Clarence M. Hardenbergh, vice president in charge of operations; Martin L. Luther, vice presi-dent; J. W. Jolly, secretary; P. J. Wedge, trensurer.

Wedge, trensurer. Mr. Sudduth, the new president, has long been a conspicuous figure in milling circles in the Northwest. He started business in 1895 with the W. J. Jennison business in 1895 with the W. J. Jennison Co., eventually becoming secretary and treasurer of the company. In 1908, his company gained control of the Com-mander mill at Montgomery, Minn., and in 1911 consolidated with the Big Dia-mond mills, Morristown. In 1915 the Empire mill at Janesville was taken over and a four works later the important and a few years later, the important Yerxa, Andrews & Thurston mill at Minneapolis.

For many years, Mr. Sudduth has been For many years, Mr. Sudduth has been vice president of each of these individual companies, and was closen first vice president of the Commander-Larabee Corporation when that merger was formed three years ago. He has a keen, analytical mind, enjoys the confidence of the managers of the various milling units and under his able administration the and, under his able administration, the Commander-Larabee Corporation should continue to grow and prosper. 000

TENDERS ASKED FOR FLOUR FOR SHIPMENT TO PANAMA

The Panama Rail Road Co. invites ten-ders for 2,500 bbls flour, to be submitted by Jan. 8. Bids are requested covering delivery, free of all charges, at Cristobal. The flour must be of 95 per cent hard wheat, and should be packed in new Os-naburg sacks of 196 bbs. Delivery must be made at the Isthmus of Panama dur-ing the second week of February. Bid-ders should name the brand for which they are quoting, and the successful bid-der will be required to mark the name of the brand on each package. The right is reserved to accept any bid in part, or to increase by 10 per cent or decrease by 20 per cent the quantities awarded. The Panama Rail Road Co. invites ten-20 per cent the quantities awarded. Tenders will be received at the office of the commissary purchasing agent of the Panama Rail Road Co., 24 State Street, New York City.

000

GRAIN DEALERS JOURNAL IS MERGED WITH GRAIN WORLD

The Grain Dealers Journal, established in 1898 by Charles S. Clark, and the Grain World, formerly the Price Current Grain Reporter, have been consolidated and will be published semimonthly at Chicago by Mr. Clark. Grain World, first known as the Cincinnati Price Current, was started in the Ohio city in 1844, rent, was started in the Ohio city in 1844, when facilities for gathering market data were exceedingly crude. The publication was later moved to Chicago and consoli-dated with the Grain and Hay Reporter, to become the Price Current Grain Re-porter. In 1926, through a change in ownership, the name was changed to Grain World and the separate identity of the paper is now lost through its merger with the Grain Dealers Journal. 000

ALFRED H. RUMBALL DIES AT HOME IN KANSAS CITY

KANSAS CITY, Mo.—Alfred H. Rumball, vice president of the Minnesota Specialty Co., Minneapolis, died at his home here on Dec. 29. Pneumonia was the cause of

death. Mr. Rumball was widely known and Mr. Runnall was widely known and well liked by members of the milling and grain trades, with whom he had transact-ed business for many years. He was particularly well acquainted in the South-

west, having represented his company in west, having represented his company in this territory since his first connection with it. Prior to that time he was south-western representative for Brown & Bigelow, advertising specialties, St. Paul. Particularly interesting was Mr. Rum-ball's early carcer. He was born in east-ern Canada in the late sixties. In 1884 he went west in search of adventure, finding it in the North West Mounted Police, which he joined as a constable, or trooper. The Riel Rebellion started in 1885, and Mr. Rumball served through out that campaign, receiving a medal for out that campaign, receiving a medal for

fire the night of Dec. 21 with an estimat-ed loss of \$100,000, partly covered by insurance. Fire is supposed to have originated in the corn drying room from an overheated furnace, and was discov-ered by an employee passing the build-ing at about 7 p.m. Two concrete stor-age silos, grain storage sheds and the office building were saved. Severe cold weather and heavy snow hampered fight-ing the fire. Four cars of grain were saved by being pulled from the siding. Included in the loss were 300 bbls of flour and \$15,000 worth of grain. Ar-

William H. Sudduth, Who Succeeds B. B. Sheffield as President of the Commander-Larabee Corporation

distinguished service. He left the force in the early nineties with the rank of sergeant, and lived in Winnipeg for a time before coming to the United States. 000

CHARLES R. COX PASSES AWAY

DANVILE, IND.—Charles R. Cox, 65 years old, for years connected with the Sims Milling Co., at Frankfort, Ind., died at his home following an illness of a complication of diseases. He was born in Madison, Ind., and spent his early life there. In 1879 he moved to Frankfort there. In 1879 he moved to reapstore and learned the milling business with his father-in-law, J. D. Fritch. Later he be-came connected with the Sims Milling Co. and remained in that connection until ill health forced his retirement. He is survived by his widow.

000 BAKERY MANAGER DIES

INDIANAPOLIS, IND.—George Haffner, 59 years old, president and general man-ager of the Haffner-Starr Baking Co., Fort Wayne, Ind., and director of the Fort Wayne Community Center, died at bic home Day 20 his home, Dec. 25.

TEXAS HAS SNOW COVERING

TEXAS HAS SNOW COVERING ORLAHOMA CITY, OKLA.—The entire panhandle and south plains of Texas were covered with a light blanket of snow Christmas, ranging from one half to four inches in depth. Snows also ex-tended into New Mexico. Temperatures over this area were rising, the lowest re-corded being around 15 degrees.

ASK 2,000,000-BU LIMIT ON WHEAT TRADING IN CHICAGO

WILLAT INADING IN CHICAGO WASHINGTON, D. C.—Until Congress, possibly, some day, may decide to wipe out the futures markets in grains and cotton, the policy of the government will be to try to work out a system whereby futures trading will become less profit-able, and to where the producer stabilizes his price. This policy was enunciated by Repre-sentative L. J. Dickinson, of Iowa, in discussion of an item in the Department of Agriculture hill, providing \$153,000 to

discussion of an item in the Department of Agriculture bill, providing \$155,000 to carry into effect the provisions of the grain futures act, an increase of \$10,600 over the previous appropriation for that purpose. This increase is designed to supervise the future trading activities at Seattle, Wash, and Portland, Oregon, and to study the general marketing con-ditions and other price factors in the Pa-cific Northwest territory, including ac-tivities of the Vancouver Grain Exchange, a Canadian project.

tivies of the Vancouver Grain Exchange, a Canadian project. First saying that the Department of Agriculture had found some cases in Chicago in which customers' orders were not executed in the pit, but were taken by brokers for their own account, J. W. T. Duvel, chief of the grain futures ad-ministration, informed a sub-committee of the House appropriations committee that the business conduct committee of

ministration, informed a sub-committee of the House appropriations committee that the business conduct committee of the Chicago board had informally agreed to hold down the lines of individual traders to 5,000,000 bus of wheat. "Early in September, 1926, two trad-ers controlled 32.6 per cent of the total open commitments in the 1926 December wheat future." Mr. Duvel added. Receive the administration has done some special work in Chicago and else-which, in a way, it says, reach the very fudamentals of the whole principle of futures trading. On the ground that the market will not absorb 5,000,000 bus without a correspondingly large in-crease or decrease in price, the admin-istration has asked the business conduct committee to hold down the lines of in-dividual traders to 2,000,000 bus.

start at WINTER STORAGE OF GRAIN AT MONTREAL ABOUT SAME

WASHINGTON, D. C. With the closing of navigation on the St. Lawrence River, the port of Montreal has a winter stor-age of 13,705,000 hus of grain in stock age of 13,705,000 bus of grain in stock and 12 grain boats containing more than 1,000,000 bus of grain in their holds tied up for the winter. Stocks on hand at the close of navigation last year, according to the Department of Commerce, were a little more than 13,000,000 bus.

little more than 13,000,000 bus. Total receipts at Montreal this year, as reported by E. G. Sabine, American trade commissioner, were 90,424,712 bus of grain as compared with 216,495,154 in 1928. Total deliveries this year to date were 90,197,325 and last year 210,907,870. The grain held in Montreal may not be shipped to eastern Canadian ports for reshipment to Eurome as usual, owing to

be shipped to eastern Canadian ports for reshipment to Europe as usual, owing to the large stores held in western elevators which will be dispatched first to save freight charges. Montreal shipping has thus suffered severely as a result of the short grain yield and holding movement. ~~~

TRADING IN JUTE FUTURES

IS PLANNED IN NEW YORK

IS PLANNED IN NEW YORK New York, N. Y.—Futures trading in jute and hemp will be inaugurated on Jan. 7 on the New York Burlap and Jute Exchange. Such action was planned shortly after this exchange opened on Oct. 16, but a delay was encountered on account of difficulties in working out suit-able contracts. The trading unit in jute will be 125 bales of 400 lbs net, while that of Manila hemp will consist of 100 bales of 270 lbs each.

~~~ BAKERS' CLUB TO MEET

PHILADITETIS, PA.--The Bakers' Club of Philadelphia will hold its first meet-ing of the new year on Monday, Jan. 6, at the Penn Athletic Club. Preceding the business meeting, supper will be served.

THE NORTHWESTERN MILLER

COTTON PRICES MOVE IN NARROW RANGE

Short Covering and Profit Taking Are Prin-cipal Features in New York Market --Harlap Trading Quiet

-Hurlan Trading Quiet NEW YORK, N. Y.-Covering by shorts and profit-taking were the most influen-tial factors controlling the price range of cotton last week. Exports were low and far under the total at the corre-sponding senson last year, but reports of a much reduced output from India act-ed strongly in favor of the market. Heavy delivery of local stock on land

a much render in favor of the market. Heavy delivery of local stock on Jan-uary notices unsettled market conditions temporarily, but the demand for the spot month was active and this soon had the effect of strengthening the later posi-tions. At certain times during the past month the New York market was par-ticularly favorable for trading, compared to other markets, a fact which was taken advantage of by many traders. Toward the close of the week the mar-ket was operating within a narrow range.

Toward the close of the week the mar-ket was operating within a narrow range, due, for one thing, to a smaller increase in the visible supply than in the corre-sponding week last year. Easier tenden-cies in the wheat and stock markets caused some traders to realize what prof-its they had, thus checking what ad-vances cotton might otherwise have made on its own initiative.

BURLAPS QUIET

BUBLAPS QUET Practically no market news was re-ceived has week from Calcutta, due to the long holidays prevailing there. Con-sequently, activity on the New York burlap and jute exchange was almost at a standstill. Buyers and sellers were apart on their ideas of value, the one group being 10 points under nominal quotations and the other a like amount over. Just how active trading will be-come in the near future is said to depend largely upon the attitude buyers assume toward the iarge stocks now afloat and expected here in the near future. Reports current in the New York bag

expected here in the near future. Reports current in the New York hag market indicate that buyers are caring only for their immediate requirements, with little tendency to make future com-mitments just now. Whether or not this attitude will be changed after the turn of the year remains to be seen, but it is at least probable that buying will be heavier than it has been during the last few weeks. few weeks.

GRAIN MEN ANSWER CHARGE OF WHEAT "PRICE BEATING"

Charges of Senator Gerald P. Nye that grain men are trying to beat down the frain men are trying to beat down the free of wheat have been answered in several eities of the country by men prominent in the trade. Counter charges that Senator Nye has no basis for his tatements have been made, and the sena-tor has been called upon to furnish proof backing up the allegations. Such a more would be utterly foolish, because the grain trade suffers severely when prices fall below the levels fixed by the farm board, George P. Case, president of the board, George P. Case, president of the serted last week. "When wheat prices fall the flow of grain to market prain suffers a serious loss of business," Mr. case stated. Charges of Senator Gerald P. Nye that

FRANCIS MADE QUAKER BAKING HEAD

ST. LOUIS EXCHANGE MAY

PUBLISH TRADE JOURNAL Sr. Louis, Mo.—A special election will be held on Dec. 30 by the Merchants' Exchange to determine whether or not the exchange should take on the financ-ing and publishing of the St. Louis Daily Price Current. Under the present sys-tem of multication, members are asked Ing and publishing of the St. Louis Daily Price Current. Under the present sys-tem of publication, members are asked to subscribe to a fund which takes care of the deficit entailed by the publication of the market paper. The treasury of the Merchants' Exchange usually donates liberally to this fund

The proposal put before members of the exchange, and on which they will vote on Dec. 30, is that they should be as-sessed from \$30 to \$40 on their memberships in order to take care of the publi-cation of the paper, which is considered necessary to the welfare of the exchange. This proposal has met with some objection on the part of the smaller mem-ber, who considers it unfair that he should pay the same amount for the pub-lication of the paper as his larger fellow

member.

NORTHWEST MILLS PROTEST MINNEAPOLIS WHEAT RATE

Millers of the Northwest are entering an objection to the wheat rate of \$1.15 set by the Federal Farm Board as the "reasonable price" for that market. There is a difference of about 3c bu in freight rates out of Kansas City as com-pared with Minneapolis, so if freight pared with Minneapolis, so if freight were the only consideration, prices should be only about 3c apart instead of 10c as in the farm board schedule, millers say. The quality of northwestern spring wheat adds to its value, however, so there is normally a greater spread between the Minneapolis and Kansas City markets, and for the most of the fall the spread has been 86/10c. Chicague prime manual has been 8@ 10c. Chicago prices normal-ly should be a little higher than those in Minneapolis, they also assert, because of lower freight rates into the East and for export, but the farm board schedule places the price there 7c under Minne-apolis. No serious objections have been raised, since the schedule is not intended to be permanent.

TO ATTEND BAKERS' CONVENTION PHULABELPHIA, PA.—G. Leonard Con-ly, president of the Bakers' Club here, and J. R. Conly, ex-president of the mid-castern chapter of the American Society of Bakery Engineers, will head a large delegation to attend the mid-win-ter meeting of the Pennsylvania Bakers' Association, to be held in Harrisburg, Jan. 6 and 7.

TARIFF REGULATIONS IN GERMANY REVISED

Whent Flour Duty Advanced 4 Marks to 18.50 Per 100 Kilos-Wheat Raised 3 Marks

A cable from the London office of The Northwestern Miller advises that the German Reichstag has passed a farm re-German Reichstag has passed a farm re-lief bill authorizing a sliding scale of duties on wheat and flour. It is also stated that the wheat duty has been ad-vanced 3 marks and the flour duty 4 marks. Under the present schedule, the wheat duty for nations not having a commercial treaty is 7.50 marks per 100 kilos, while for nations having a com-mercial treaty the duty is 6.50 marks. mercial treaty the duty is 6.50 marks. Applying the advance of 3 marks to the latter classification, which includes the United States, and under the new ar-rangement which provides that the wheat duty will be one and one half times the duty on grain plus 4.25 marks, the new

wheat flour tariff will be 18.50 marks, an increase of 4 marks above the previous duty of 14.50.

The United States Department Commerce has released a report from the American consul in Germany which the American consul in Germany which is somewhat at variance with this infor-mation insofar as it states that on Dec. 21, the proposal to introduce sliding scale duties on grain was dropped by the Reichstag, and the present general du-tics on rye and wheat retained with the provise that the government is author-ized to reduce or increase the duties if variation from the fixed standard prices makes it necessary. These changes will be effective Jan J as far as commercial be effective Jan. I, as far as commercial treaties permit.

treaties permit. The department report also states that the duty on fodder barley imported under customs supervision will be until the end of 1930 5 marks per 100 kilos instead of 2 marks; the latter rate will be reinstated in 1931. Polished or unpolished rice for starch manufacture, imported under customs supervision, will be admitted duty free be admitted duty free.

Canadian Flour Market in Hongkong Offers Possibilities of Enlargement

TORONTO, ONT.

A REPORT by the Canadian trade commissioner in China on the mar-ket for Canadian flour in Hong-king, as recently published in the Com-mercial Intelligence Journal, a govern-ment publication, contains some infor-mation that will be of interest to Cana-ting million will be on interest to Canadian millers who contemplate doing busidian millers who contemplate doing busi-ness in that market or who already are established there. It is pointed out that discussions with importers in Hongkong confirm the impression that the Canadian flour trade could be considerably in-creased and that exporters would be well advised to give the matter of represen-tation careful consideration, as this is one of the most important factors. The commissioners' report on the trade of commissioners' report on the trade of Hongkong follows:

At present only a few Canadian flour mills are exporting to this market. At the same time Canadian flour is being quoted by a considerable number of local agents or importers, the inference being that some Canadian mills ship regularly to several local accounts, presumably un-der special brands and according to specific requirements and according to spe-cific requirements as to grade, color and price. This situation alone would be quite a satisfactory one, provided that all other Canadian mills were not inter-ested in a local outlet for their product, but it is not believed that this is the case. Further, the same firms which are now disposing of a part of the total shipments made to Hongkong by one or a very few Canadian exporters are at the same time dealing in several other flours, either of the same or different flours, either of the same or different qualities, and presumably placing orders with Canadian principals only when con-venient, or possibly only when supplies can be more advantageously procured from Canada than elsewhere. Altogeth-er, there is very little evidence of definite alignment between individual Canadian mills and individual local agents, the exporter undertaking to confine himself to one or a few accounts in return for an undertaking on the part of importers that reciprocal treatment would be given

that reciprocal treatment would be given by them. This report will not suggest that ex-clusive and binding agency arrangements should be undertaken by Canadian flour mills or exporters, or that they should require their Hongkong representatives to confine themselves invariably to the sale of Canadian flour alone. Obviously, the latter would be out of the question, ince no small part of the flour demand in South China is for qualities which are either not produced in Canada or are available in small amounts only. It is available in small amounts only. It is felt, however, that more Canadian mills should he participating in the South China flour trade, and that some ap-proach toward exclusive agency agree-ments would enable a closer touch with the situation and eventually lead to good results. One underitable basis for such a statement is the fact that several out-standing British and Chinese firms have

expressed a keen desire to trade in Canadian flour, preferably on the under-standing that they be granted controlling standing that they be granted controlling agency rights in return for their guar-anty to confine their sales of all flour of grades which can be produced in Canada to their Canadian principal. These firms, moreover, are not merely local dealers, but maintain head offices in Hongkong and either branch offices or binding connections with dealers both in Canton, the minor ports and the interior.

The possibility of Canadian mills which have not previously shipped to this mar-ket being able to compete successfully is a question about which there need be little apprehension. In order to reach the point where a reasonable volume of business will be established, however, one of two main courses of action seems necessary. The first of these calls for a thorough survey of the market by a representative of the Canadian mills and representative of the Canadian mills and his working for some time with the agent or distributor whom he selects as most capable. The second, which might to some extent be combined with the first, is the selection of a capable agent and the arrangement hetween both parties that a six months' or similar period be settled on as the time reasonably neces-sary in which to establish new brands on sary in which to establish new brands on the market and during which no profits would be taken by either party, these being devoted to advertising, distribution of samples or similar sales promotion. Both these plans have been suggested by local import houses which have bad ex-perience in the flour trade; a combina-tion of them would be recommended as the ideal basis on which attempts to enter the market should be based.

The present is from one point of view an inopportune time to make such a re-port on representation, for flour business has for some weeks been in a state of stagnation following marked increases in stagnation following marked increases in world prices of wheat. The trade pass-ing through Hongkong is also somewhat disturbed by recently imposed taxes on all foreign flour imported into Kwang-tung province (the Canton area), but these are expected to have comparative-ly slight effect on the trade in general. It may reasonably he expected that the steady drain on local stocks, which has been going on for the last few months, may shortly result in renewed huying, and on this account Canadian mills which may consider entering the South China

E. K. Pickett

trade are advised to give the matter outlined above their serious and immediate attention. The department of trade and commerce has on file in Ottawa a list of some of the principal Hongkong firms which have expressed their interest in dealing in the Canadian product. Corre-spondence with them should be accompa prices, together with a statement of the best terms which could be granted. It is also requested that copies of letters to these firms be sent to the trade commis-sioner in Hongkong, in order that the matter may be followed up without delay.

Garnet Wheat Reports Show Poor

Dough Quality

AS a result of differences in opinion between millers, grain men and western farmers as to the merits of garnet wheat, a new hard spring variety that is being introduced in western Canada, the Dominion government took steps some time ago to obtain independent reports from British and European authorities on the baking qualities of flour from this grain. Reports on these tests are now coming in, but not all that were asked for have been received, so no settled opinion can yet be formed. However, Noury and van der Lande, of Deventer, Holland, have reported and their results are known to the trade, at least in part. The dough was found to be stiff and tough, long fermentation was required and the loaf is rather small and gluten-bound. Ash content is high and the color yellow. A serious objection to the flour is excessive dryness. flour is excessive dryness.

flour is excessive dryness. So far as conclusions can be drawn from the information so far made public as a result of these tests, the contention of Canadian millers that garnet should not be admitted to regular contract grades of Canadian spring wheat is justified. That this is already being done in a limited way is nothing to the point. It is a mistake that will have to be rectified and the milling industry has done the western farming industry a service by its action in refusing to recognize garnet as being equal to marquis for milling and baking purposes. A. H. BALLEY.

Intertested and a second and a start and a

CUBAN FLOUR IMPORTS MAY **BE HIGHEST OF FIVE YEARS**

Imports of wheat flour in all Cuban ports will be the highest for 1929 of any year since 1924 if December figures come

ports will be the highest for 1929 of any year since 1924 if Becember figures come up to usual expectations, according to a government report just issued. Total shipments received at the end of November reached the 1,173,514-bbl mark, which is 3,000 bbls more than was taken in for the entire year of 1928. If over 100,000 bbls were imported during December, which figure is forecast from previous years, the total for the year should surpass any year since 1924, when 1,312,571 bbls was the final count. In 1924 123,084 bbls were imported during December, 112,139 in 1925, 131,854 in 1926, 100,367 in 1927 and 94,574 in 1928. If an even 100,000 bbls were imported in December of this year the total would not quite come up to the mark set in 1925, however, when shipments reached 1256,759 bbls. In 1927 the total was 1,-250,438 bbls, and in 1927 Lotal,407.

E. K. PICKETT ELECTED AS WASHBURN CROSBY OFFICER

Receiving his second promotion within the year, Edward K. Pickett, until now with the Washburn Crosby Co., Inc., Min-neapolis, has been elected vice president of the Washburn Crosby Co., Kansas City. Last January, Mr. Pickett was elected to the directorate of the Minneapolis

ti**r**m.

The ist expected to arrive in Kansas City within the next few days to become permanently associated with the com-pany's sales staff. Mr. Pickett has been associated with the Washburn Crosby organization for many years, having started at a very early age as office hoy and worked through the various departments. For the past 23 years he has been associated with the sales department, and in conse-quence brings a wide experience in mer-chandising to the firm in Kansas City.

BRYCE B. SMITH MAY RUN FOR MAYOR OF KANSAS CITY

FOR MATOR OF KANSAS CITY KANSAS CITY, Mo.—Bryce B. Smith, first vice president of the General Bak-ing Co. and president of the Consumers' Bread Co., has made it known to Demo-cratic leaders here that he is willing to enter the mayorally race, if the organi-zation is in accord with him and personal business matters do not conflict. Mr. Smith is said to be withholding his offi-cial answer until some time in January. He is recognized by party leaders as a strong candidate and although not rat-ed a very fluent speaker, he is known as

ed a very fluent speaker, he is known as a quiet campaigner with a host of friends, politically and in the business world. At the present time he is a member of the school board,

MINNEAPOLIS

34

MINNEAPOLIS The holidays for the time being have sidetracked flour buying. Neither bak-ers nor family trade distributors seem interested. Inventory time, of course, is also in part responsible for the dullness. Until this is out of the way, new busi-ness will prohably be light. This is not of the way, new busi-ness will prohably be light. This is not of the way, new busi-ness of encouragement for the week was a noticeable improvement in shipping directions. This was to be expected, however, considering the drive that all mills have been making for them. Buy-ers at last appear to recognize the faet that their period of grace has about ex-pired, and they are hurrying to get di-rections in before their contracts become delinquent.

rections in before their contracts become delinquent. Beginning Jan. I, mills will assess a carrying charge of 1-3c per barrel per day on all flour unshipped that was originally contracted for shipment prior to Dec. 31. There is a big volume of such business on mill books, and the car-rying charge will not begin to pay the total expense the mills have actually been under in carrying the wheat and flour. flour

Business Below Normal .- The month Business Below Normal.—The month of December has been an unusually quiet one for spring wheat mills in gen-eral. Sales have fallen far below like periods in former years. On some days, the total bookings of certain groups did not equal the cupacity of some of the smaller mills in these groups. Considering the uniformly light pro-duction the last month or two, millers feel that stocks in the principal markets must be very light. In consequence, they look for better than a normal run as soon as stock-taking is over and the holidays

as stock-taking is over and the holidays

as stock-taking is over and the holidays are in the background. Output About Unchanged.—Total pro-duction of flour in the Northwest for the week ending Dec. 28 was 342,885 bbls, or just about 40 per cent of the capacity. In the same period, new sales probably did not aggregate more than 10 per cent of capacity.

of capacity. Clear Prices Advance.—With wheat up 86 % bu over recent low levels, first clear quotations have been advanced 20 6 25c bbl. Inquiry for this grade is still rather light, but no accumulation is re-ported. A number of mills have their January output of second clear already sold hut ruling prices on this grade. sold, but ruling prices on this grade are very low. More could be sold for export were millers willing to accept the prices hid.

prices bid. Flour Prices. — Quotations, Dec. 31, hard spring wheat flour, hasis cotton 98's or jute 140's, Minneapolis: short pat-ent, \$7.20@7.60 hbl; standard patent, \$6.85@7.20; second patent, \$6.50@6.65; fancy clear, \$6.15@6.30; first clear, \$5.30 @5.45; second clear, \$3.75@4.80; whole wheat, \$5.80@6.15; graham, standard, \$5.80@6.15. \$5.80@ 6.15.

Mills in Operation .- Of the 26 Minneapolis mills, the following 15½ were in operation Dec. 31: Atkinson, King Mi-das, Minncapolis, Northwestern Consoli-dated A, Pillsbury A (one half), A South, Anchor, Lincoln, Palisade and Phoenix, Russell-Miller, Washburn Cros-by C, East A, F, Gold Medal Feed and rve mill rye mill.

SEMOLINAS

No improvement discernible as yet in demand for semolinus. Durum millers had hoped for renewed buying to set in early in January but, judging from the unshipped contracts on mill books, manu-facturers have not been doing as much business as they had evidently anticipated. Shipping directions are difficult to get, and unless unexpected strength de-velops in the market, buying may be de-ferred for some time. Prices are a shade

higher for the week, but they are still at the same level at which the bulk of the contracting was done early in the crop year. No. 2 semolina $3\frac{7}{5}c$ lb, bulk, f.o.b., Minneapolis; intermediate grades, $3\frac{5}{5}c$; No. 3 semolina, $3\frac{1}{5}c$ gas $\frac{3}{5}c$; In the week ending Dec. 28, six Minneapolis and interior mills made 33.467 bbls durum products compared with 45.467 mode by products, compared with 45,467, made by eight mills, in the previous week.

MINNEAPOLIS FLOUR OUTPUT

Output of Minneapolis mills, with com-parisons, as reported to The Northwest-ern Miller:

A MEMORIAL TO W. SCOTT WOODWORTH Announcement was made last week by the trustees of Carleton College, North-field, Minn., of the establishment of an endownent fund to the music departendownent fund to the music depart-ment of the college, as a memorial to the late W. Scott Woodworth, of Minneapo-lis. The donors were Mr. and Mrs. Sum-ner T. McKnight, of Minneapolis. Mr. Woodworth, who died Nov. 2, was vice president of E. S. Woodworth & Co. He was a director of the Minneapolis symphony orchestra and for many years was prominent in musical circles in the Northwest.

WILL REBUILD BURNED ELEVATOR

The Searle Grain Forker and Antimetapolis, plans to rebuild the Sterling elevator, which burned Dec. 12. The plans call for a fireproof working house, of steel and concrete construction. The main storage of the company was not dam-aged by the fire. Work on the new building will start as soon as the frost is out of the ground. Of the company, A. L. Searle is president, H. H. Tearse vice president and E. W. Ehlert secretary.

NEW FEED JOBBING CONCERN

Frank M. Rosekrans, Jr., of Chicago, has opened a feed and grain jobbing of-fice in Minneapolis in suite 926 of the Flour Exchange Building, for the Con-solidated Feed & Grain Co., of Buffalo. He will do husiness under the name of the Lebe States Feed & Grain Co. the Lake States Feed & Grain Co. Mr. Rosekrans was formerly associated with his father in The Bertley Co., Chicago.

NOTES

Harvey J. Patterson, Omaha manager for the Pillsbury Flour Mills Co., spent

the Christmas holidays with his parents in Minneapolis.

The Farmers' Elevator Co., Eldridge, Iowa, has its new \$11,000 feed mill in operation.

Fred A. Quigley, mannger of the Bos-ton office of the Russell-Miller Milling Co., was in Minneapolis last week.

The bakery of H. Nordby, 1507 West Broadway, Minneapolis, was badly dam-aged by fire last weck, the loss being re-ported at around \$8,000.

The Harland Flour & Feed Co., of which Austin S. Harland is the head, re-cently took over the W. H. Koch eleva-tor and feed business at Owatonna, Minn.

The Montana Flour Mills Co. recently acquired the property of the Miles City (Mont.) Mill & Elevator Co., and will utilize it as a warehouse and distributing station

T. H. Chambers, president of the Chambers-Mackay Co., screenings deal-er, Minneapolis, was called east late last week by the death of his brother in New York state.

The Loose-Wiles Biscuit Co., Minne-apolis, during the holidays entertained its salesmen and agency representatives in the Northwest. Over a hundred from outside the city were present.

M. Lee Marshall, chairman of the board, and Ellis C. Baum, director of cake sales, for the Continental Baking Corporation, New York City, spent sev-eral days in Minneapolis last week.

J. W. Greer, for upward of 20 years associated with the Marfield Grain Co., Minneapolis, died last week at his home in Excelsior, Minn. He was 51 years old, and had been ill for several months.

George E. Duis, of Grand Forks, presi-Wheat Growers' Association, while in Minneapolis Dec. 28, reported that his association had made application for stock membership in the Farmers' Na-tional Grain Corporation.

Frank J. Tharinger, general manager of the Tharinger Macaroni Co., Mil-waukee, and R. B. Brown, of the Zerega-Fortune Macaroni Co., Chicago, conof Fortune Macaroni Co., Chicago, con-ferred with Minneapolis durum millers Dec. 30, relative to the proposed nation-al advertising campaign for macaroni products.

J. S. McCrea, of Jacksonville, Fla., H. M. Parker, Jackson, Miss., W. A. Swain, Charlotte, N. C., J. B. Smith, Paris, Tenn., and E. C. Beede, Davenport, Iowa, are the southeastern representatives of the International Milling Co., Minneapo-lis, and nat of the company mentioned in lis, and not of the company mentioned in this department last week.

~~~

MONTANA

While flour sales during the week were very light, as might be expected at the holiday season, the steady advance in the wheat market is developing some inquiry, and millers look forward to improved conditions after the turn of the year. After so many false alarms, however, buyers are very cautious about commit-

On the other hand, reports on world wheat production and reserve are getting more bullish, and with the farm board ready to buy cash wheat at termi-nal markets, some of the reasons why flour buyers should defer their purchases are being removed. Shipping instructions are scaree and hard to get. Production continues unchanged with some mills, while others are doing some necessary overhauling.

Quotations, Dec. 28, f.o.b., mill, car lots, cotton 98's: first patent, \$6.60@6.80; standard patent, \$6.40@6.60; first clear, \$5.90@,6.28.

J. V. Patton, manager of the Minne-apolis branch of the Patton-Kjose Co., in company with Mrs. Patton, spent the Christmas week with his parents in Great Falls.

000 DULUTH-SUPERIOR

The rapid and sharp advance in wheat prices served to awaken more Interest in flour, but with the holiday season there is more or less disposition to deter ac-tual purchases until after the New Year and inventory time. Market conditions

appear strong, and promise no encouragement to buyers for holding off. One agement to buyers for holding off. One mill is still down doing nothing but car-ing for shipping contracts. Another re-ports working light, scattering sales to needy buyers. Few cancellations are ad-used buyers, while slow as expedied vised. Business, while slow, as expected at this time, could not be actually called called at this tume, could not be actually calles poor because what demand exists the mills take care of readily. Present light buying operations may improve. Prob-ably light inventory reflects fair shipping instructions.

Sale and buying interest in semolinas fails to show any gain, and the market for that commodity holds quiet. Old contracts are being drawn on and ship-ping directions are gradually cleaning up book accounts. Owing to the sharp advance in wheat prices, inquiry for de-ferred shipment has picked up some-what, although fresh sales continue to be negotiated with caution and in hardly any volume at the moment. Quotations, Dec. 28, Duluth-Superior, f.o.b., mills, in 98-lb cottons: first patent, \$7.90@8.15; second patent, \$7.70@7.95; first clear, \$5.75@6; second clear, \$4.25 @4.50.

@4.50.

•Dec. 1 estimate.

KANSAS CITY

The holiday dullness was somewhat re-lieved last week by occasional scattered buying on sharp rises in wheat, but in general the tone of the market was weak. Inquiry is light and scattered and is not conducive to any sizable bookings. Some sales were uncovered on a number of sales were uncovered on a number of resting bids, as fluctuating wheat prices reached low levels. A few bookings of fair-sized amounts were made the early part of the week, mostly for spot to 30-day shipment, but a large part of the light sales was limited to modest amounts for shipment at near-by positions. Lit-tle interest is being shown in booking very far ahead at the present time, but improvement is expected after Jan. 1, since reports from various territories in-dicate that in many cases buyers are sales were uncovered on a number of dicate that in many cases buyers are not booked far in advance of the first

dicate that in many cases buyers are not booked far in advance of the first of the calendar year. There is a fair amount of inquiry for mixed cars, but only a few sales have resulted. Shipping Directions Good.—A good flow of shipping directions, some of them on contracts many months in arrears, has helped to offset the sluggishness of new business. Mills have been doing all within their power to clean up old con-tracts before the first of the year, but from all indications some will remain overdue at that time. Salesmen being called into the home offices may have a detrimental effect on directions. Export Light.—Except for a few scat-tered workings to Holland and Latin America there has been virtually no ac-tivity in the export field, bids having approached no nearer to a workable basis. Demand in most cases is for ex-port straights and patents.

basis. Demand in most cases is for ex-port straights and patents. *Prices Higher*.—In accordance with sharp rises in the wheat market, flour prices have advanced as much as 40c in some cases. Quotations, Dec. 28, basis cotton 98's or jute 140's; dark hard winter wheat short patent \$6.10 (m 7.20, 95)per cent \$5.90 (m 6.70, straight \$5.60 (m 6.40, first clear \$1.70 (m 4.80, second clear \$1.20, low grade \$1.10.

Foregoing are nominal prices named by established terminal and interior mills on flour under their own brands. On round lots, to large buyers or for export, actual sales may range, particularly on the better grades of flour, 10@50c under

figures named. Production. — The first table below shows the flour production and rate of shows the flour production and rate of activity of 61 representative southwest-ern mills, exclusive of Kansas City, Wichita, Omaha, St. Joseph, Salina and Atchison. Additional tables give the production and activity of principal mill-ing centers in the territory.

The output of flour at mills in this district during the first 11 months of 1929 was 24,765,144 bbls," the article goes on to state. "This compares with 23,748,220 bbls produced during the first 11 months of 1928, an increase for this year of 1,016,924 bbls, or 4.3 per cent."

NOTES

J. W. Setters, of the Avondale Alfalfa Milling Co., Pueblo, Colo., was a visitor among the feed trade.

Paul McCarthy, Illinois representative of the Larabee Flour Mills Co., Kansas City, spent the holidays in Kansas City. J. H. Moore, president of the Wichita (Kansas) Flour Mills Co., accompanied by Mrs. Moore, spent the week-end in Kansas City.

R. H. Moran, manager of the Mem-phis office of the Larabee Flour Mills Co., Kansas City, was a recent visitor at the home office.

John C. Neel, Thomasville, Ga., was recently appointed southeastern repre-sentative for the Midland Flour Milling Co., Kansas City.

William R. Duerr, vice president of the Flour Mills of America, Inc., Kansas City, has returned from a motor trip through the central states and East, on

which he was accompanied by Mrs. Ducrr.

C. T. Bramblett, vice president of the Kansas Flour Mills Corporation, Kansas City, has returned from a trip through Missouri and Illinois.

J. Juul, president of the Southwestern Milling Co., Inc., Kansas City, left the last of the week on a visit to the branches of the company.

The Rudy-Patrick Seed Co. and the Southard Feed & Milling Co., both of Kansas City, are holding sales confer-ences in that city this week.

Walter C. Smith, general manager, and Walter C. Smith, general manager, and J. L. Walker, vice president and sales manager, of the Larabee Flour Mills Co., Kansas City, spent several days in Minneapolis last week.

Harry A. Sterling, assistant manager of the Hecker-Jones-Jewell Milling Co., New York, and Mrs. Sterling are spend-ing the holidays in Kansas City as guests of Mrs. Sterling's sister, Mrs. Clement A Ismart A. Ismert.

B. E. Ricketts, field sales manager for the Kansas Flour Mills Corporation, with headquarters in Atlanta, Ga., and A. G. Ireland, Illinois representative for the corporation, visited the Kansas City of-fice last week.

Charles A. Barrows, manager of the export department of the Midland Flour Milling Co., Kansas City, left last week for a three months' tour of the Latin American countries. J. Angulo will di-rect the department during his absence.

HUTCHINSON

With a few isolated exceptions, busi-ness was extremely dull with mills of this section, some not selling a barrel of flour. Inquiry was completely lacking from either domestic or foreign buyers, although the export basis is closer than for some time. The one hrint snot of although the export basis is closer than for some time. The one bright spot of the week was improvement in shipping directions. This, however, had heen an-ticipated. Many ordered flour shipped late in the week. Quotations, basis cot-ton 98's, Kansas City: short patent, \$7; straight, \$6.50; first clear, \$5.

NOTES

C. B. Warkentin, president of the Mid-land Flour Milling Co., Kansas City, spent a few days with his mother at Newton last week.

Decrease in the movement of wheat from the farms has been marked of late. New wheat conditions throughout the Southwest are reported ideal by country fields are again being pastured.

WICHITA

The flour market has shown a distinctly improved tone the past week. Ship-ping directions, in particular, are picking ping directions, in particular, are picking up. Inquiry has improved, and a num-ber of good sales have been made, es-pecially to local and near-by customers. Foreign buying has been small, although there has been some inquiry from this source.

Prices are stronger. Short patent flour is quoted at \$7@7.20, in cotton 48's, basis Kansas City territory.

NOTES

J. H. Moore, president of the Wichita (Kansas) Flour Mills Co., and Mrs. Moore spent the week-end in Kansas City.

Fred Burns, manager for the Consoli-dated Flour Mill Co., visited the com-pany's Winfield, Kansas, plant the past week

Roger Hurd, president of the Red Star Milling Co., and A. B. Anderson, gen-eral sales manager, made a husiness trip to Oklahoma City last week.

J. K. Moore, of the Acme Flour Mills Co., Oklahoma City, with Mrs. Moore and their infant daughter, was a guest over Christmas of J. H. Moore, president of the Wichita (Kansas) Flour Mills Co., and Max Moore and Mrs. Moore.

Invitations are in the hands of their friends for the marriage on Jan. 3, of Robert Lowry to Miss Cecelia Jones, daughter of Dr. Arch D. Jones, of Wichita. Mr. Lowry is employed in the traffic department of the Wichita

(Kansas) Flour Mills Co., and is the son of G. M. Lowry, secretary of the company.

SALINA

Mills report a slightly better demand for flour, sales being mostly to buyers who are purchasing for near-by require-ments, while larger buyers are not interested at present prices, it seems. The usual dullness is expected during the holiday season, and mills see little hope for improved directions with purchasers reducing stocks for the coming inven-tory. Foreign inquiry was a bit more active. Quotations, Dec. 26, basis Kan-sas City, cotton 98's: short patent, 86.40 (66.80 bbl; 95 per cent, \$6.10@6.25; straight, \$5.95@6.10.

L. H. McLaren, bakery engineer at the Shellaharger Mill & Elevator Co., spent the holidays with relatives at Aumista.

-----ATCHISON-LEAVEN-WORTH

WORTH Mills report a very slow demand for flour, and are experiencing the usual holiday slack. Most of the buyers are holding back on shipping directions awaiting inventory, and while mills are pushing hard, they are having difficulty in securing enough instructions to keep their plants operating. Sales are again limited, buyers refusing to follow the advances, and bookings were around 25 to 50 per cent of capacity. Mills re-port that they are having difficulty in meeting buyers' views on account of higher wheat premiums and weak feed market. They are hopeful of a better flow of shipping directions after the first of the year, but so far have been unable to do much. Quotations, basis cotton 98's: hard wheat short patent \$6.7500 7.05, straight grade \$6.45@6.75, first 7.05, straight grade \$6.45@6.75, first clear \$4.90@5.15.

NOTES

R. L. Yardley, sales manager of the Blair Elevator Corporation, is calling on the trade in Kansas.

Gene Torbett, traffic manager of the Pillsbury Flour Mills Corporation, Enid, Okla., was an Atchison visitor for the holidays.

OKLAHOMA

OKLAHIOMIA There has been no improvement noted in the condition of the flour market over the last few weeks. Sales the past week have averaged about 25 per cent of ca-pacity. Exports have been confined to small lots. Flour prices have been fluctuating with the wheat market. Quo-tations Day 26, hard wheat short pattations, Dec. 26; hard wheat short pat-ent, \$6.90@7.10; soft wheat short pat-ent, \$7.10@7.30; standard patent, \$6.50 @6.70.

NOTES

The Acme Flour Mills, of Oklahoma City, has made W. B. Boydston, formerof Kansas City, superintendent of the plant.

L. E. Davy, sales manager for the Ponca City Milling Co., spent the Christ-mas holidays with his family in Oklaho-ma City.

Karl E. Humphrey, Oklahoma manag-er for General Mills, Inc., has been elect-ed as associate director of the Oklahoma City chamber of commerce.

The annual meeting of the Oklahoma Crop Improvement Association will be held in Oklahoma City Jan. 23-24. Ap-proximately 300 members are expected to attend.

W. J. Shepherd, aged 67, of Pine Bluff, Ark., died Dec. 21. Mr. Shepherd was president of the W. J. Shepherd & Son Wholesale Grocery Co., having es-tablished the business 20 years ago.

Steuben T. Stratton, aged 86, died at his home in Dallas, Dec. 20. Mr. Strat-ton, a native of Georgia, moved to Dal-las in 1876 and built one of the first flour mills operated in that part of Texas.

The Wichita Mill & Elevator Co., of Wichita Falls, Texas, has filed suit in district court against the A. B. Crouch Grain Co., a defunct concern in Temple, Texas, for \$17,226.95, alleging misappro-

priations of money received in sale of oats belonging to the plaintiff.

oats belonging to the plaintiff. Joe Darnell, 22-year-old chemist for the Pillsbury Flour Mills Co., of Enid, Okla., died Dec. 19 from a mysterious cause. His body was found face down-ward in a small ravine, though there was no evidence of foul play.

no evidence of foul play. The annual meeting of the Associated Industries of Oklahoma will be held in Tulsa, Jan. 28, it has been announced by H. V. Kahle, secretary. An invitation has been extended to Robert P. Lamont, U. S. Secretary of Commerce, to address the meeting. J. E. Edgerton, New York City, president of the National Associa-tion of Manufacturers, will be one of the prominent speakers. prominent speakers. ~~~

OMAHA

There was little doing in flour trade circles last week. Mills report that new business was in small volume, with buy-ers strongly inclined to take hold cau-tiondr.

tiously. For several weeks a moderate volume of new business has been booked on ev-ery substantial decline in the market, but when a several cent advance comes, buyers promptly turn away.

POOR WEATHER LENGTHENS COLORADO FEEDING SEASON

COLORADO FEEDING SEASON DENVER, COLO.—Live stock feeders in several Colorado districts were forced to begin feeding late in October this year, instead of in December, as is usu-ally the case. This was due to inclement weather, and meant at least six weeks more of feeding. Those who had just enough feed to carry them through the winter are finding themselves short. Those who did not have the money to buy hay, or who could not get it, were forced to sell part of their stock, with the result that profits in feed lots have been cut to quite an unfavorable extent. Some of the feed yards are in rather bad condition on account of the storms and this is adversely affecting the stock. this is adversely affecting the stock.

000

FEED SUPPLY GOOD IN NEW MEXICO FEED SUPPLY GOOD IN NEW MEXICO OKLAROMA CITY, OKLA.—Reports of range conditions, supply of feed and condition of livestock in New Mexico are particularly favorable at this time, ac-cording to a report recently issued by R. F. Hare, agricultural statistician. Feed supplies in most sections of the state are ample for the needs of feeders and ranges are still affording pasturage except in a few localities where the snow-

except in a few localities where the snow-fall has been heavy. Cattle and sheep are in excellent con-dition with very little market demand

for them. Hay is plentiful in most sections, bringing around \$15@22 ton. In the less favored regions, first class alfalfa is being sold at \$35 ton.

Choice ewes are bringing around \$12 a head, while the old ewes are being sold in some markets for \$3.50@5.50.

-

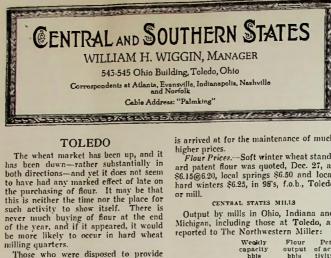

EXPERIMENT WITH TEXAS FEEDS

OKLAHOMA CITY, OKLA.—A feeding demonstration of Texas grown feed to Texas cattle now being conducted by County Agent R. S. Miller of Waco, Texas, has resulted in the calves show-

ing a gain of 64 pounds after a 30-day period of feeding. The ration used was ground corn, cob meal, ground barley, cottonseed meal and alfalfa hay.

000 SWINE LOSSES HEAVY THIS FALL

Heavy losses by swine owners already this whiter have caused the United States Department of Agriculture to issue warnings to all farmers. The losses have resulted largely from two diseases, pneu-monia and swine influenza, commonly known as "flu." Losses from these two known as "flu." Losses from these two diseases can be greatly prevented by providing dry shelters to protect the animals from exposure to cold wind, rain, sleet and snow. Sudden severe changes in the weather cause great havoc among swine and farmers should take particular pains to provide comfortable feeding and resting places for their hogs during such periods, warns the depart-ment. ment.

Those who were disposed to provide for their future requirements have al-ready done so to the extent they are will-

ing to go, and the others seem indifferent and uninfluenced by the course of prices.

So business has resolved itself into a hundrum affair without especial features, outside happenings in the wheat market and developments in connection with ac-tivities of the farm board.

Recent developments have included the entrance of the Rural Grain Corporation,

the handmaiden of the farm board, as an active bidder for wheat at the loan price.

This is perhaps intended as an intima-tion that support will be given to the market at this level, and that it will be pegged there. This may prove an effec-tive discouragement to short selling be-

Argentina appeared in the role of Santa Claus to the farm board and farm relief movements last week. Wheat shot up about 5c bu at Chicago, 71/2c at Liv-erpool, Dec. 21, on an official report from

which a cut in the exportable surplus to 58,000,000 bus was estimated. It was

said that all previous outstanding offers on wheat exports were accepted and a considerable business was closed.

DECLINE IN VISIBLE SMALL

if the groundwork was being laid by which earlier anticipations of higher prices in the second half of the crop year might be realized, and which had

met with disaster through contact with the record accumulations and visible sup-ply in North America. This should have

by in North America. This should have some effect on European demand and ex-ports where real relief must come from. However, the decline in the visible sup-ply was only 10,000,000 bus in November. Another development was the issuance of the government report showing winter wheat acreage to be 2 per cent larger than last year with condition 86 per cent of normal, as compared with 83.4 last year, and a 10-year average of 84.6. There is a heavy blanket of snow over much of the winter wheat belt with no section where conditions are unfavorable. There are no present indications of any relief coming to farmers from decreased acreage or failure of crops.

INITIBITIONS REPLACE FORECASTS

may have felt in wheat has been tamed down by recent events until now it has

down by recent events until now it has been displaced by inhibitions. Forecast-ing may be left to the farm board and the United States Department of Agri-culture. Many a man has come to grief by being too optimistic and having too great faith in his own personal judgment. The successful speculator must be able to change bis mind and position almost in-stantly and not hesitate to take losses. The average speculator takes a small

The average speculator takes a small profit, but rides his losses down to the

The year closes with perhaps a better outlook for prices. Nothing would help more than export sales and good clear-ances with steady and substantial reduc-tions weekly in the visible supply. This wheat which has been backed up in Can-ele and the United States must be

ada and the United States must be moved out of the way before a safe basis

bitter end.

NOTES

Harold Anderson, president of the Na-tional Milling Co., Toledo, subsidiary of the National Biscuit Co., Uneeda bakers, will sail from New York Jan. 4 for England.

Jesse D. Hurlbut, manager of the To-ledo Grain & Milling Co., who has been ill, has sufficiently recovered to spend part of every day at the office of his company.

Cyrus S. Coup, vice president and gen-eral manager of the Northwestern Ele-vator & Mill Co., Toledo, with Mrs. Coup, spent Christmas visiting a married daughter in St. Louis, Mo.

000 NASHVILLE

Demand for flour from the Southeast was slow last week, business showing the usual falling off on account of the Christmas holidays, being pronounced on account of the unsettled tone of the mar-Only scattered sales were being reket. ported, these being made to buyers were in urgent need of flour and had permitted their stocks to run low. Business came to a standstill part of the week, and the remainder of the time was exceedingly light, though about the same as for the corresponding time last year. The inventory period will not be over until about Jan. 10, and mills are looking for trade to mark time until that date. Mills are hopeful that the government stabilization plans will be more effective after the first of the year, and

that business can be handled on a more satisfactory basis. The year 1929 has been somewhat dif-ficult for mills in the Southeast, though the principal companies will show a vol-ume of business close to that of last will show some falling off as compared with the preceding year. With the wheat market the most erratic of recent years, the situation has been difficult in the milling industry, and it is not thought that profits have been up to the average, though fairly satisfactory, as a rule, considering the situation, with the rapid fluctuations that have featured the mar-Nucluations that have reatured the mar-ket. General holiday trade has been sat-isfactory, and mills look for the 1930 business to be better, as buyers are not heavily supplied, and consuming demand is about normal.

is about normal. The flour market has been somewhat unsettied on account of the wheat situaunsettled on account of the wheat situa-tion, though selling prices have made very little change, with probably some concessoins where opportunities were open for large sales. Asking prices for soft winter wheat flour were as follows, Dec. 28: best short patent, 98-lb cottons, f.o.b., Ohio river stations, \$7.90@8.25 bbl; straights, \$6.25@6.50; first clears, \$505.25. \$5@5.25.

Distributors of Minnesota and western flours had a molerate volume of busi-ness for the Christmas week, and are looking for more activity after the first of the year. Stocks of flour at Nash-ville have been on decline, being 51,000 bbls, compared with 60,000 bbls last yearbbls, compared with 60,000 bbls last year. The blending trade has slowed down for the holidays, and winds up the year with business close to former years Quotations, Dec. 28: spring wheat first patent, 98-lb cottons, delivered at Nash-ville, \$7.50@8 bbl; standard patent, \$7.25 @7.35; hard winter wheat short patent, \$6.75@7.25; straights, \$6.25@6.50. Output of flour by southeastern mills, as reported to The Northwestern Miller:

| | | | |

Mrs. Katherine Norton Wells, wife of E. Wells, one of owners of State Milling Co., Nashville, died last week,

James A. Ransom, aged 74, died at his home in Murfreesboro, Tenn. Mr. Ranson was a man of large business in-terests, and for more than 25 years owned and operated the old Bridgeview Mills, on Stone's river near Murfreesboro.

Responding to a radio appeal, grain dealers at Louisville donated two tons of grain to be fed to starving birds re-cently. On account of the extremely cold weather and the ground being covered with snow and ice, many birds were re-ported to be dying.

EVANSVILLE

Flour trading continues good, with shipping instructions brisk and exporting satisfactorily steady. Prices are un-changed. Quotations, Dec. 28, f.o.b., Evansville, 98-lb sacks, car lots: soft win-ter wheat best patent \$8 bbl, first pat-ent \$7.50, straights \$7; Kansas hard, \$7.75; first clears, in jutes, \$6.75; second clears. \$6.50 clears, \$6.50.

NOTES

Joseph Craig, Cadick Milling Co., Grandview, and Mrs. Craig spent the Christmas holidays with friends in Evansville.

Leslie Igleheart, of Los Angeles, Cal., spent the Christmas vacation in Evans-ville with his parents, Mr. and Mrs. John G. Igleheart, Igleheart Bros., Inc.

000 NORFOLK

The fluctuating wheat market has kept local prices unsettled, and the market is somewhat weaker. Quotations, Dec. 27: northwestern spring patents, \$7.25@7.45 bbl; second patents, \$6.95@7.15; Kansas patents, \$6.90@7.15; second patents, \$6.60@6.85; soft winter patents, \$6.80@ 6.95; second patents, \$6.50@6.65; Vir-ginia and Maryland straights, \$5.75@6.

INDIANAPOLIS

Little interest is being shown in the flour business, and very few sales are reported. Liberal concessions have failed to attract buyers, and buying continues in small scattered lots for imme-diate use only. Millers and brokers an-ticipate some heavy buying after the New Year, as buyers have not covered their requirements for 1930. Mill opera-tions are about normal, and directions on old contracts are very hard to secure. Inquiry is very poor from local consumers. Although there is some inquiry from foreign buyers, no sales are reported for export. The market ruled strong at the close,

and prices advanced 30@45c bbl. Quotations, Dec. 28, f.o.b., Indianapolis, basis 98-lb cottons: soft winter special short patent \$7.30@7.65 bbl, fancy short short patent \$7.30(@7.65 bbl, fancy short patent \$6.50(@7.25, straight patent \$6.30 (6.685, first clear \$6.25(6.6.85; hard win-ter short patent \$7.15(@7.55, fancy pat-ent \$6.80(@7.15, standard patent \$6.40(6.75, first clear \$5.95(6.605; spring shortpatent \$7.35(@7.75, standard patent \$6.95(@7.30, first clear \$6(@6.10.

Papers and articles of incorporation have been filed with the secretary of state as follows: Central States Elevator Corporation, Indianapolis; capital stock

of 100 shares, having a par value of \$10 each common and \$50 preferred; objects, shipping, buying, selling, handling or utilization of wheat, corn, oats, barley and other grains. Incorporators, Guy Cantwell, Claude M. Record and B. B. Brenner

000 WHEAT EXPORTS RALLY TO **GAIN OVER THOSE OF 1928**

GAIN OVER THOSE OF 1928 Wheat exports came out of their slump in November and totaled higher for the month than during the same period last year, according to a Department of Com-merce report. Shipments amounted to 12,338,000 bus, against 10,561,000 last year, bringing up the totals for the first 11 months of 1929 to 85,311,000 bus, com-pared to 88,650,000 last year. With 7,641,000 bus shipped out during December, 1928, and a 1928 total of 96,-300,000, it will be necessary for export figures for December, 1929, to show 11,-000,000 bus to equal that total for the full 12 months. Preliminary reports in-dicate, however, that this year's total will be smaller.

be smaller.

Wheat flour, on the other hand, showed a slight decline for November, although the total shipments for the year are about 1,600,000 bbls ahead of 1928, and even if 1,000,000 bbls ahead of 1928, and even if no flour had been shipped out in Decem-ber this year, the total for the 12 months would still be well above that of last year. Shipments in November were 1,-156,000 bbls, against 1,199,000 in the same month of 1928. Broken rice and macaroni were the

Broken rice and macaroni were the only other grain products or grain which showed an increase in exports for only when month. Shipments of most products were much less than for November, 1928, and in most cases were lower than during

and in most cases were lower than during October of this year. Total grains and grain products ex-ported during November amounted to \$23,401,000 and for the 11 months ended November \$266,174,000, compared with \$287,623,000 for the same period last year. Details as to individual items fol-

Rice: total for the month 28.327.613 lbs Rice: total for the month 25,327,513 lbs and for the 11 months 275,445,000, com-pared with 244,724,000 for the same pe-riod last year. Gernany was the largest purchaser, taking 5,938,437; United King-dom, 3,358,690; Argentina, 3,411,973; France, 2,585,000.

dom, 3,358,690; Argentma, 3,411,973; France, 2,585,000. Broken rice: total for month 5,748,000 lbs, of which Japan took 3,392,000. Wheat: total for the month 12,337,902 bus and for the 11 months 102,539,000, compared with 110,736,000 last year. The United Kingdom took 4,762,694 bus; Can-ada, 2,076,896; Japan, 1,217,661. Wheat flour: total for the month 1,-156,362 bbls, and for the 11 months 12,-595,000, compared with 10,913,000 for the same period last year. China (including Hongkong and Kwantung) was by far the largest purchaser, taking 259,000 bbls and bringing the total exported to that country for the 11 months of 1929 up to 2,539,615, or more than 20 per cent of the total. The United Kingdom took 129,-532 and Cuba 87,753. 532 and Cuba 87,753.

EARLE E. SPENCER STARTS NEW FEED FIRM IN ARKANSAS

KEW FEED FIRM IN ARKAINSAS Earle E. Spencer has resigned as vice president and sales manager of the Whyte Feed Mills, Pine Bluff, Ark., and has organized the Spencer Feed Co. at that place. The new concern will act as ear lot distributor of mixed feeds and grain products throughout Arkansas, Louisiana and eastern Texas. Mr. Spencer, who has been in the feed

Mr. Spencer, who has been in the feed Mr. Spencer, who has been in the feed business for the past nine years, states that his firm "will ship under attractive brands a complete line of balanced ra-tions for all classes of farm live stock and poultry, and will offer in one car everything in the grain line needed by the up-to-date feed dealer." Headouarters of the Spencer Feed Co.

Headquarters of the Spencer Feed Co. are with the Cook-Bahlau Grain Co. on West Fourth Avenue, Pine Bluff.

Cottonseed meal and alfalfa meal gen-erally cost less per 100 lbs than tankage, yet when they are mixed with tankage the pigs fed the mixture do better than on tankage alone, says a bulletin of the North Dakota Agricultural College.

ST. LOUIS

ST. LOUIS "Oh, that the holidays might end so that we could get back to work," said a miller last week, and in that sentence he summed up the situation that has pre-vailed in the local flour market and with local mills for some time. It is true that there were one or two large sales in the week before last, but that type of busi-ness which is usually obtained by only one or perhaps two mills does not reflect itself in any better demand for flour generally. Two local mills report that their sales in December of this year were larger than in the year before, but it is doubful if that has been the experience of the majority of mills.

doubtful if that has been the experience of the majority of mills. If one were asked to estimate the quantity of flour on mills' books carried over into 1930, he would say that with-out a doubt it is less than it was in 1929, but, in at least one case, bookings are not much below last year's carry-over. It probably depends largely on the class of trade the mill serves. Those selling to the large bakers probably have more flour on their books than those serving the moderate sized baker and the jobber.

to the large bakers probably have more four on their books than those serving the moderate sized baker and the jobber. The outlook seems to be that some good buying should develop in January, especially on the breaks. Buyers believe that the price of wheat is being held up by the farm board and have no faith in higher prices, and it is not likely that they will cover their requirements for any long period so long as this situation exists. They must have flour, however, and, generally speaking, stocks and book-ings are low, so that millers ought to be able to look for a good hand-to-mouth demand for the next few weeks. *Export Business Very Light.*—Local millers are very disappointed in the vol-ume of export flour business. They say that they are unable to compete with home mills' prices, and just as it secus that their quotations are getting in line, counting like the Argenting com report

that their quotations are getting in line, something like the Argentine crop report of last week comes out and puts them out of line again. Trade with Europe was characterized as very light last week, while Latin America was hardly heard from

Shipping Directions Still Fair .- Fortunately, millers have one redeeming fea-ture in the situation,—that shipping di-rections continue satisfactorily free. Mills in this territory have operated at above normal for December.

normal for December. Flour Prices — Quotations, basis 140-lb jutes, Dec. 28, St. Louis: soft wheat short patent \$6.95@7.25 bbl, straight \$6.50@ 6.60, first clear \$5.65.25; hard winter short patent \$6.30@6.50, 95 per cent \$5.90@6.15, first clear \$5.10@5.30; spring top patent \$6.75@7.10, standard patent \$6.45@6.75, first clear \$5.55@5.65.

NOTES

T. L. Brice, southeastern representa-tive of the Valier & Spies Milling Cor-poration, is expected to visit the main offices of the company here this week.

Cyrus S. Coup, vice president and gen-eral manager of the Northwestern Eleva-tor & Mill Co., Toledo, Ohio, called at

this office last week. He was here visit-ing his daughter.

A mill nearly 50 years old is being torn down at Edwardsville, 111. It was originally the Dunstedter Mill, but the building has served for many purposes besides that for which it was built. Mo-lasses, eider, wine and yeast have all been manufactured there and for some time the building was used as a machine shop. A new building will be erected on the site.

MEMPHIS

Not much business in four is being re-ported, and even shipping instructions have been received sparingly during the week, due to general desire to have stocks as small as possible for inventory. Quotations are slightly firmer in sym-pathy with higher wheat, but holidays caused little interest to he taken. Out-look is favorable for the new year, as stocks are believed to be moderate and bookings are much less than last season. bookings are much less than last season, with no reason for expecting less con-sumption. Expressions from the baking trade indicate that their holiday business measured up to expectations and was fairly good.

fairly good. Flour quotations, Dec. 28, basis 98's, f.o.b., car lots, Memphis: spring wheat short patent \$7.85@8.15, standard patent \$7.25@7.70; bard winter short patent \$6.85@7.45, standard patent \$6.50@7; soft winter short patent \$7.60@8.25, standard patent \$6.85@7.25; western soft patent \$6.75@6.85, low proteins \$6.15@ 6.35, blended 95 per cent patent \$6.25@ 6.50

NOTES

R. H. Moran, Memphis manager for the Larabee Flour Mills Co., is home after a trip to Wichita, Kansas.

H. R. Kauffman, of Atlanta, south-eastern manager for the Larabee Flour Mills Co., was a visitor in Memphis on Dec. 26.

Charles B. Stout, of the Dixie-Portland Flour Co., Memphis, left last week for

A. W. BOSWORTH, Memphis repre-A. W. BOSWORTH, Memphis repre-sentative of the Cereal By-Products Co., who has been elected president of the Memphis Grain & Hay Association for 1930. Mr. Bosworth succeeds H. C. Mills, of the Quaker Oats Co. Other officers elected were: Ferd Heckle, vice president; J. B. McGinnis, secretary-treasurer; C. G. Robinson, S. T. Pease, Sr., W. R. Smith-Vaniz and Walter M. Browne, directors.

a trip to points in the Mississippi Valley and Mohile.

Sim F. Clark, Jr., 16-year-old son of the senior member of the grain and feed firm of Clark-Burkle Co., Memphis, was killed when his auto was struck early Christmas morning.

000 NEW ORLEANS

Flour trading continued slow last week, but the market was somewhat active and prices fluctuated, mostly showing an up-ward trend. During the last three days of the week prices worked upward sharply.

sharply. Buyers are not in the market to any great extent. They are taking hold for immediate requirements only and will continue along these lines until the turn of the year, at which time they are ex-pected to buy in larger quantities. There are several reasons for buyers to remain out of the market, the most important one being that in most instances they are taking inventories.

The wheat market was somewhat ac-tive and showed a strong upward ten-

tive and showed a strong upward ten-dency, prices advancing as much as 10e bu during the last three days of the week. This caused most buyers to drop out of the market, and the demand was accordingly fairly slow. Country trading was also slow, and purchasers in this quarter have been out of the market almost entirely during the Christmas holidays. The general opin-ion of the trade is that country buyers will not enter the market until more in-ducements are offered in the way of lowducements are offered in the way of low-

will not enter the market until more in-ducements are offered in the way of low-er prices. Flour quotations, Dec. 27, basis 98's: spring wheat short patent \$7.80, 95 per cent \$7.50, 100 per cent \$7.35, cut \$7.15; hard winter short patent \$6.55, 95 per cent \$6.25, 100 per cent \$6.10, cut \$5.85, first clear \$5.30, second clear \$4.70; soft winter short patent \$7.25, 95 per cent \$6.55, 100 per cent \$6.65, cut \$6.35, first clear \$5.25, second clear \$4.75. Senolina trading continued along even lines, with buyers entering the market only when forced. No. 2 semolina was quoted at 494e lb, bulk. Foreign call continued slow, although shipments to Europe picked up slightly. The call in this section is only enough to keep exporters from classing it dead. With prices showing a gradual upward trend, little business can be expected here, for even with prices much lower than they are Canadian competition is keen. The unsteady condition of the market recently has led many buyers to believe prices are climbing to a peak and will break again. Traders, however, can see no reason for another break. During the seven days ended Dec. 27 a total of 41,282 200-16 hags flour was

no reason for another break. During the seven days ended Dec. 27 a total of 41,282 200-b hags flour was shipped from this port, of which Latin America took 24,630 and Europe 16,652 as follows: Rotterdam 7,700, Glasgow 7,000, Avonmouth 1,172 and Brenen 780. Wheat exports climbed upward sharp-ly, and during the week a total of 354,-315 bus was shipped from this port. At the close of the week the wheat market, both local and export, was advancing.

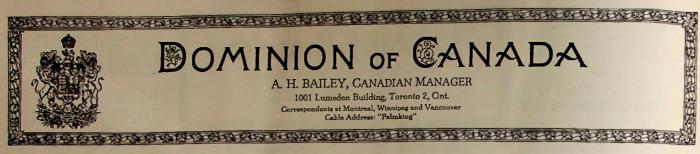

RICE

The rice market was a little more ac-tive last week, and buyers were showing some interest in local offerings at the close. Most trading, however, was on a tive last week, and huyers were showing some interest in local offerings at the close. Most trading, however, was on a deferred shipment basis, and there were few cash sales. The Christmas holidays probably were the cause of slow cash busi-ness, it was believed by local traders. It is thought that after the first of the year there will be an increase in activity of this market. Prices were steady and showed little change from last week's levels. Blue Rose was quoted on Dec. 27 at $37_{\rm A}$ ic lb; second heads, $3V_{\rm A} \oplus 3V_{\rm A} c$; screenings, $2V_{\rm A} \oplus 2Y_{\rm A} c$; bran, 822.50 ton at mill; polish, 822.50. Rough receipts during the season to Dec. 27 totaled 256,727 sacks, same pe-riod last year 242,874; clean this season 407,911, same period last year 569,249. Rough sales during the season to Dec. 27 amounted to 7,007 sacks, same period last year 35,972; clean this season 133, 741 pockets, same period last year 129,

741 pockets, same period last year 129,-576.

The King City (Mo.) Bakery has been opened.

January 1, 1930

TORONTO

TORONTO The Christmas holidays, which really extended over most of the week, inter-fered with the volume of trade in spring wheat flour, and nothing of any conse-quence was reported by mills to this of-fice. Most of the bakers are working on old contracts and others are buying just as they need from month to month. Aft-er the first of the year there will be some new bakers' contracts to be considered. An advance of 10c bbl in prices took effect on Dec. 26. Quotations, Dec. 28: top patent, \$8.60; patent, \$3.35; second patent, \$8; export patent, \$7.40; first dear, \$6.90; praham flour, \$7.30; whole wheat flour, \$7.30; all per bbl in 98-bb jute bags, f.o.b., mixed cars, less 10c bbl for spot cash, plus cartage if delivered.

Ontario Winters .-- Ontario winter wheat Ontario Winters.—Ontario winter wheat four is extremely dull, partly owing to the holidays and partly owing to natural conditions in the market. Prices are un-changed. Quotations, Dec. 28: good qual-ity 90 per cent patents from country mills, 85.20(6.30 bhl, bulk, seaboard, in buyers' bags; Montreal, \$5.40(85.50; To-ronto, \$5.40.

ronto, \$5.40. Exporting.—A little business was done on the Monday and Tuesday before Christmas, but since then trading has amounted to little or nothing. It is be-lieved that after the turn of the year British importers will be in the market for a certain amount of flour, but no great volume is looked for. Quotations, Dec 28: mill prices for spring wheat ex-port patents, 38s per 280 lbs, London, January-February scaboard, with cable offers coming in at 37s. These are very close prices. close prices.

Ontario winters are not selling for ex-port and are quoted nominally at 35s 6d per 280 lbs, London, January-February basis

Exports of oatmeal and rolled oats from Canada in four months ending No-vember amounted to 7,732 tons.

In the four months ending with No-vember Canada exported 30,000 tons of millfeed, mostly to the United States.

In the month of November British flour mills shipped 6,396 bags of flour in-to Trinidad and British Guiana as against 30,595 bags from Canada and 2,372 from United States.

W. R. Clarke, vice president and man-ager of sales of Wolverton Flour Mills Co., Ltd., St. Mary's, Ont., visited To-ronto on Dec. 26. Mr. Clarke was on his way to New York where he will spend a few days on business for his company.

Tew days on business for his company. In spite of the shrinkage during re-cent months, Great Britain remains by far the largest outlet for exports of Ca-nadian flour, total shipments in four months ending November being 678,767 bbls. China had second place with 298,-578 bbls, British West Indies third with 280,618 bbls, Germany fourth with 165,-711 bbls and Newfoundland fifth with 192,831 bbls. Most of the sales to Ger-many were for reshipment to central Europe. Europe.

Late next April or early in May, 60 per cent of the new Welland ship canal, the fourth to be built across the Niagara the fourth to be built across the Niagara peninsula to circumvent the great Niag-ara cataract, will be used for navigation, and by July 21 all the new link in Can-ada's vital inland waterway will be open for ships. It is hoped that it may be possible to fittingly celebrate on Domin-ion Day of 1930 this notable event in the country's commercial history. It is esti-mated that the total cost of the new Welland ship canal will be slightly in ex-cess of \$120,000,000.

MONTREAL

Spring wheat flour was advanced 10c bbl last week, following upturns on the wheat markets on the news of still smallwheat markets on the news of still small-er prospects for the new Argentine wheat crop. Trade continues quiet and feature-less. Spring wheat flour is now \$8.60 for first patent, \$8 for second patent, and \$7.40 for bakers patent, per barrel, less 10c for spot cash. Winter wheat trade is reported dead, with prices stendy at \$5.90@6.20 for ehoice grades in car lots, per barrel.

NOTES

W. H. McCarthey, vice president of the Standard Milling Co. of Canada, Ltd., Toronto, spent Christmas in Montreal. George W. Stephan, maritime prov-inces sales manager for the Maple Leaf Milling Co., Ltd., spent the Christmas holidays with his family at St. John, N. B.

holidays with his family at St. John, N. B. H. Groom, of London, S. Legree, Sud-bury, and T. G. Crawford, Toronto, rep-resentatives of the Ogilvie Flour Mills Co., Ltd., were in Montreal last week visiting the company's head office for a business conference with J. E. Weeks, sales manager for Ontario and the mari-time provinces. They were entertained at a luncheon at the Canada club by R. R. Dobell, vice president, at which were present also G. A. Morris, assistant to the president, and J. L. V. Mallette, manager for the province of Quebee.

WINNIPEG

WINNIPEG Last week's flour sales were light in the aggregate, with no marked improve-ment either in the domestic or export de-mand. Some of the larger mills are not operating, and a good number of small mills in the West are doing very little. Prices have not changed. For delivery between Fort William and the Alberta boundary, top patent springs were quoted, Dec. 28, at \$8.85 bbl, jute: seconds, \$7.85; cottons, 15c more; Pacific Coast points, 50c more. Second patents to bakers were quoted at \$7.85, except at Vancouver, where a lower price prevails. to bakers were quoted at \$7.85, except at Vancouver, where a lower price prevails

NOTES

G. E. Stanley Thompson, well known in Winnipeg grain trade circles, has been

appointed manager of the grain depart-ment for H. S. Shannon & Co., Ltd., newly formed grain stock brokers' company in Winnipeg.

Farmers in western Canada have deliv-Farmers in western Canada have deliv-ered since the middle of August over 190,000,000 bus of wheat or about 90 per cent of what will come off the farms for the senson ending July 31, next. In the corresponding period of 1928, 395,000,000 bus were delivered, which represented about 80 per cent of the wheat that came off the farmer. off the farms

off the tarms. Wheat inspections for the first five months of new crop year show that only 356 cars graded No. 5 wheat and 158 No. 6 wheat, compared with 38,455 and 35,741 cars, respectively, in the same pe-riod a year ago. The number of cars graded No. 1 northern this year is over 33,000, compared with only 3,500 up to the end of December, 1928. The \$300.000 nlant of the Saskatche-

The \$300,000 plant of the Saskatche-wan Registered Seed Growers' Associa-tion was formally opened at Moose Jaw, Sask, last week. The Hon. W. R. Moth-Sask, last week. The Hon. W. R. Moth-erwell, minister of agriculture in the Do-minion government, was to have per-formed the opening ceremony, but illness prevented his being there. The plant is said to be the finest of its kind in North Anierica.

000 VANCOUVER

Export business in flour last week was Export business in four last week was further hampered by the rapid advance in wheat prices. Cables indicate that oriental firms are endeavoring to secure stocks at low prices which are under the best quotations that local exporters can offer. The cost basis on this side is around \$5 net, and the bulk of offers are for February and March. Stocks in north China are still large, although heavy reductions have been reported in Tientsin due to the embarge on antive Tientsin due to the embargo on native flour shipments. The space situation re-mains soft, with plenty available.

00

EXPORTS THROUGH UNITED STATES

WASHINGTON, D. C.—According to the Department of Commerce, the following shipments of breadstuff originating in

Canada moved from Atlantic Coast cus-toms district during October: Barley, 95,982 bus through New York; oats 7,837 bus through New York; oat-meal and rolled oats, 294,996 lbs through New York; wheat, 3,373,268 bus through New York; 47,599 through Philadelphia, 121,885 through Maryland, a total of 3,572,752; wheat flour 11,751 bbls through Massachusetts, 117,180 through New York, a total of 128,931.

CANADIAN GRAIN EXPORTS ONLY HALF THOSE OF 1928

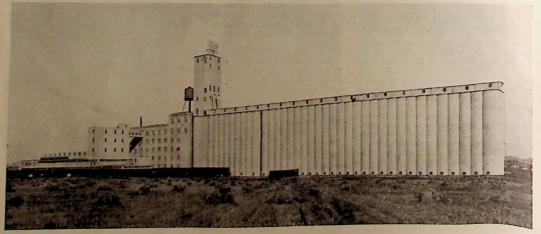

ONLY HALF THOSE OF 1928 WINNIPE, MAN.-Exports of grain through the four Canadian ports of Van-couver, Montreal, St. John and Quebec were for the first 11 months of the year only 57 per cent of the total during the same period in 1928, according to Domin-ion figures just issued. This year only 189,762,840 bus were received, all bul 2,700,000 of which were shipped, com-pared with receipts last year of 328,129, 687 bus and shipments of 320,793,440. The greatest decline is noted in the figures for the port of Montreal, where receipts were only 41 per cent of the 11 months' total for 1928, while shipments were 42 per cent. The proportions are not altered with respect to the St. Law-rence port by the few remaining days in December when further receipts and de-liveries were made.

Montreal receipts totaled 88,354,364 bus, as against 213,039,376 last year: while de-liveries to the extent of 89,266,855 bus were made, compared with 210,531,181.

were made, compared with 210,531,181. Not so marked was the reduction in the grain business through Vancouver, when receipts this year up to the date noted were 71,640,606, while deliveries were 68,913,436. Corresponding receipts in 1928 were 88,593,850, and shipments totaled 84,399,696.

totaled 84,399,696. Quebec joins in the general reduction from 10,821,542 bus received last year to 7,761,708 in 1929. Deliveries in 1928 were 10,068,144, and this year 6,193,733. An exception to this decrease in the grain business is furnished by the port of St. John, whose figures for 1929 are

Where Wheat Still Grows at the Door of the Mill

E NLARGED mill and wheat storage of the Robin Hood Mills, Ltd., at Saskatoon, Sask., was recently completed. The mill is in two units of 1500 bbls each, with total storage capacity of 1,400,000 bus. The buildings and tanks are of concrete con-struction, and electric power is used throughout. Adjoining the mill is a warehouse, with floor space of approximately 34,000 square feet. The plant, one of the most modern in western Canada, presents a unique appearance, with its huge battery of storage tanks, and wheat field in the foreground.

50 per cent greater than for 1928. Last year 15,665,899 bus were received at the New Brunswick port, and this year so far the figure has risen to 22,006,162. Figures for deliveries are about the same as for receipts.

THE NORTHWESTERN MILLER

CHICAGO · **DISTRICT** SIGURD O. WERNER, CHICAGO MANAGER

166 W. Jackson Boulevard, Chicago, Ill.

Cable Address: "Palmking"

CHICAGO Flour buyers again were indifferent last week and there was practically no business to speak of. It was the usual holiday week with extreme dullness, and

noniday week with extreme duilness, and there are no signs of any change until the inventory season is over. Old orders have been greatly reduced. Not only has the lack of husiness during the month of December heen a great disappointment to local dealers, but the difficulty in obtain-ing shipping directions has caused much trouble. There was no improvement in the latter

Spring Wheat Flour.-Demand for springs was exceedingly quiet last week. Buyers were not interested, and the week

Buyers were not interested, and the week was as dull as any on this crop. Old or-ders are being reduced slowly, and no improvement is looked for until after the turn of the year, although mill agents believe there will be a fair business done

Hard Winter Flour .--- There was prac tically no business booked last week, and the month of December was a great dis-

the month of December was a great dis-appointment both as regards new orders and specifications. The trade feels now that the worst is over, and that after inventory taking and the first of the year business should show a decided improve-ment. The belief is that buyers will be-gin shortly to reduce old orders, follow-ing which there should be opportunities for further business. Although dealers have been discouraged this past month, they feel rather optimistic over prospects during the first few months of the new year.

year. Soft Winter Flour.—There has been very little buying of soft winters for sev-eral weeks, but during the last few days buyers began to display a little more in-terest. While they did not enter the market, they made numerous inquiries, which dealers hope is an indication that business will pick up after Jan. 1.

Flour Prices. -Quotations, Dec. 29, ba-sis Chicago, patents in cotton 98's and clears in jutes: spring top patent \$6.50 @7 bbl, standard patent \$6.25@6.70, first clear \$5.70@6, second clear \$4.25@4.60; hard winter short patent \$6.20@6.60, 95 per cent patent \$5.90@6.25, straight \$5.70 @6, first clear \$5.10@5.40; soft winter

ITIGH AND LOW FLOUR PRICES

The high price of spring standard pat-ent flour during 1929 was on Aug. 3, be-ing \$7.05; low point was \$5.05 on June I. High point on spring top patent was \$8.30 on July 20; low, \$5.35 on June I. High on hard winter short patent was \$7.90 on July 20, and low was \$5.55 on June 1

July 20, and low was \$5.15 on June 1. High point on soft winter short patent was \$7.50 on Feb. 23 and July 20; low, \$5.30 on June 1. The high price for pat-ent white rye was \$7.25 on Feb. 23, and low point was \$5.40 on June 1.

Correspondent at Milwaukee

> few days in Minneapolis calling on the trade.

> E. O. Wright, president of the Wiscon-sin Milling Co., Menomonie, Wis., left Chicago, Dec. 26, after having spent Christmas with his daughter, who resides here.

Ernest G. Dahl, Chicago flour distribu-Ernest G. Dahl, Chicago flour distribu-tor, recently was elected president of the Nordic Country Club. He has served on the hoard of this organization since it was formed, and also has been vice president for the past three years. The Nordic Country Club was organized about five years ago, and has a heautiful 18-hole golf course about 22 miles from the Chicago loop. The Chicago Flour Club has held two golf tournaments on this course. this course.

The Chicago office of The Northwest-The Chicago office of The Northwest-ern Miller has been recipient of many fine calendars and beautiful Christmas and New Year's greetings. They are too numerous to mention, but we take this opportunity to thank the many friends in the trade for their good wishes. Among the concerns sending calendars were Red Star Yeast & Products Co., Milwaukee, H. W. Kleinsteuber, flour broker, Milwaukee, New Century Co., Chicago, Goerz Flour Mills Co., Newton, Kansas, Eagle Roller Mill Co., New Ulm, Minn., Western Canada Flour Mills Co., Ltd., Toronto.

Ltd., Toronto. A meeting of the trade practice com-mittee of the Millers' National Federa-tion has been called for Jan. 3, to be held at the Stevens Hotel, Chicago. The fol-lowing members are expected to be pres-ent: Frank Hutchinson, chairman, Law-renceburg (Ind.) Roller Mills Co; H. L. Beecher, Eagle Roller Mills Co; H. L. Beecher, Eagle Roller Mills Co, New Uhn, Minn; W. L. Harvey, International Milling Co., Minneapolis; George E. Hincke, Ismert-Hincke Milling Co., Kan-sas City; George S. Milnor, Sparks Mill-ing Co, Alton, Ill; Jesse B. Smith, Shell-abarger Mill & Elevator Co., Salina, Kan-sas; George Livingston, executive vice president of the Millers' National Fed-eration, and Carl B. Warkentin, Midland Flour Milling Co., Kansas City.

MILWAUKEE

MILWAUKEE No business is being done between the holidays, and the infrequent inquiries are mostly for mixed cars with a decided preference for feed. Directions continue to show improvement, and some buyers of northwestern flurrs are reported to have even ordered out considerable quan-tities ahead of time. Some large mills' representatives are hopeful of a revival shorily after the first of the year when the grocers have completed inventories, but the majority in the trade do not ex-pect huying to begin until well along in January. Lack of interest at this time is attributed largely to the stiffening of market which formerly often took place during the holidays. Nominal quotations, bec. 25, basis Milwaukee, patents in cot-ton 98's, clears in jutes: spring top pat-ents \$6.55@6.685 bbl, standard patent \$6.25@6.55, first clear \$5,60@5.95; soft winter short patent, \$9.10. winter short patent, \$9.10.

winter short patent, §9.10. Scattered sales of established family hard winter wheat brands to jobbers are reported. Directions on southwestern flours are still reported unsatisfactory al-though slightly improved. The spread between current quotations is 10% 5c un-der northwestern prices as compared with 50% 25c for the previous week. Quota-tions, Dec. 28, Milwaukee basis: hard winter short patents \$6.45% 6.69, 95 per cent patents \$6.25% 6.70, first clear \$5.30 (\$5.60.

SLIGHT INCREASE IN PIG CROP INDICATED

If Degree of Error Is Same as in Other Years, Supply Should Be Larger

The fall pig crop of 1929, as shown by the tabulation of reports from some 65,-000 farmers, was practically the same as in 1928 for the United States as a whole. In the corn belt states, however, the fall

In the corn belt states, however, the fall pig crop was about 4 per cent larger. Decreases in most regions outside the corn helt, but especially in the South, offset the increase in the corn belt. This survey was made in co-operation with the post office department through the rural mail carriers. Combining the report of the survey of

mail carriers. Combining the report of the survey of last June, showing change in the spring pig crop, and of the present December survey showing the change in the fall pig crop, the total pig crop of 1929 as re-ported was 5.4 per cent smaller than that of 1928 for the United States and 3 per cent smaller for the corn belt.

CONDITIONED BY MARKETING

These surveys, however, are of value only to the extent that changes in the pig only to the extent that changes in the pig crop shown agree with subsequent mar-ketings. The surveys for the years 1927 and 1928, as checked by subsequent mar-ketings, underindicated the total pig crop of the corn helt by about 4 per cent. If the 1929 surveys underindicated ac-tual changes in the pig crop this year by the same amount, the total pig crop of the corn helt this year was a little larger than that of last year. Similar checks cannot be made in other regions, because of the small proportion of hogs produced that go into the com-mercial supply.

BREED MORE SOWS

With respect to intentions to breed for next spring, this same tabulation shows increases in the number of sows bred or increases in the number of sows bred or to be bred to farrow in the spring of 1930 amounting to 6 per cent for the United States and 5 per cent for the corn belt, compared to the number of sows farrowed in the spring of 1929. In other years the number of sows re-ported the following June as farrowing in the spring has always been a smaller percentage of the previous spring than that shown by the breeding intentions in December.

December.

The reported increases in intentions shown by the present report indicate that the survey next June will show a small decrease in sows farrowing next spring. If a decrease of from 3 to 5 per cent

If a decrease of from 3 to 5 per cent is reported in the corn belt next spring and the survey report underindicates the actual farrowings as did the spring re-ports in 1927 and 1928, the actual number of sows farrowing next spring in the corn belt will not be greatly different from the number farrowed in the spring of 1929.

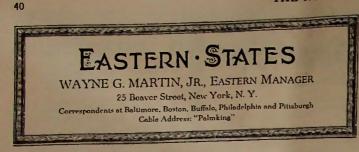

WISCONSIN FEED RULES ARE SUBJECT OF BOOK

0000

MILWAUKEE, WIS.-A book of codified rules relating to the marketing of animal feeds in Wisconsin is expected to be ready for the press shortly. The codif-cation is to include all of the standing rules of the department relating to purity, truth in advertising and stand-ardization of live stock feeds. Seven-teen concisely stated regulations pertain-ing to inspection and sales of feeds will be a feature of the publication. Ap-proval by the attorney general of the form in which the compilation is worded has been signified to C. S. Hill, chairman of the inspection commission of the Wis-consin department of agriculture and marketing. rules relating to the marketing of animal marketing.

444

REBUILDING MILWAUKEE FEED MILL MILWACKEE, WIS.—Rebuilding of the damaged portion of the plant of the Smith Milling Co., Thirty-sixth and Lin-coln avenues, Milwaukee, is proceeding rapidly. The total damage from the explosion, Oct. 15, which was caused by dust, is estimated at about \$25,000.

THE NEW YORK IDEA

THE NEW YORK IDEA CUSTOM and the Gregorian calendar Chave developed January first into a time of new things-new ideas, new am-bitions, new resolutions seem the order of the day. It is a day of high resolves for the betterment of ourselves and our neighbors, unfortunately forgotten by the first rainy Tuesday. However, in the hope that a faint memory may eling for a while, the New York trade is starting a prayerful, or profane accord-ing to temperament, campaign to try to give western mill executives a new and proper idea of this market. If a drawing were made of the mental

give western mill executives a new and proper idea of this market. If a drawing were made of the mental picture of New York held by the av-erage miller living west of Hoboken's water towers, it would probably feature a yawning, unfillable chasm into which millions of barrels of flour could be dumped without making the slightest im-pression. On one side of the chasm would be a flour buyer, pounding with all his might on a set of figures (the mill's current quotations), while on the other side the mill's local representative would skeep peacefully. As the largest city of the country. New York has always heen an immense consumer of flour. Millers have there-fore grown to feel that their surplus could be disposed of in this inexhaustible matket, and in the past this has heen true.

What they have not understood, however, is the change in the character of the market, resulting from the immense buying volume taken from the range of the broker or mill representative by the the broker or mill representative by the bakery mergers. Ten years ago there were Cushman, Shultz, Hildebrandt and other good, big bakers now included in combinations; there were not the big combinations, nearly all purchasing di-rectly from the mill.

A rough estimate places the big chain baker and grocery store buying at about 60 per cent of the market's consumption, and even in a 7,000,000-bbl eity this does and even in a 7,000,000-bbl city this does not leave a tremendous volume for the small baker to buy or much for cach mill which wants a share of it. The classified telephone book lists about 75 flour brokers, each of whom handles from one to seven mill accounts, and any one who cares to figure just how much busi-ness each mill can get on an even dis-tribution of business can get a mild pic-ture of what competition is like in New York and why conditions do not always reflect sweetness and light.

Therefore as the New Year starts the local flour man sends out a plaintive plea to the miller for a revision of ideas about New York. Its capacity is limanout New York. Its capacity is im-ited, and it cannot consume all the flour-each miller wants to get rid of. The time has surely come to temper the wind to the shorn lamb!

. .

NEW YORK

The flour business ran true to form last week. Sellers, having expected no business, were not disappointed but felt free to turn their thoughts to other and more interesting activities. Where a car or two was sold, the broker looked upon it as a Cheistmas rife either from the

or two was sold, the broker looked upon it as a Christmas gift either from the buyer or from the mill, to prove there is a Santa Claus. Even without the holiday hull, it would have been difficult to attract consumers with current prices. They have grown so used to lower levels that considerable educating must be done before they can appreciate that higher prices may still be cheap. Furthermore, having made up their minds to hold off until after the first of the year, it would be a difficult task to get them to buy any sooner. Some brokers are complaining that,

while their previous sales have been large, the flour is not being ordered out as had been expected. Mills are press-ing them for the shipping directions that are due, but buyers cannot be hurried into any more prompt orders. The credit situation remains unimproved, and con-siderable uncasiness is manifested over the difficulty of making proper collec-tions. The extension of credit lines has become an important factor in this mar-ket, entering into transactions in which five years ago the buyer would not have demanded, nor the seller permitted, any-thing but arrival draft business. There has been no feature to the flour

thing but arrival draft business. There has been no feature to the flour demand. Since bakers had previously arranged for their holiday requirements in flour, all buying was limited to a few scattered cars, usually purchased where the price was particularly attractive. It was difficult to compile an accurate range on prices last week. Most brokers could only estimate mills' ideas, since the builday slichtly disorganized communica-

could only estimate mills ideas, since the holiday slightly disorganized communica-tion, and unless actual business was in sight, many millers were not in their usual close touch with New York rep-resentatives. The range on all flours seemed fairly narrow because there was no possibility of huying to drive levels downward. do nward.

downward. Flour Prices.—Quotations, Dec. 28, all in jutes: spring fancy patents \$7@7.50, standard patents \$6.75@7, clears \$5.90@ 6.15; hard winter short patents \$6.50@7, 95's \$6.20@6.60; soft winter straights, \$5.80@ 6.15.

NOTES

J. H. Condon, assistant freight traffic manager for the Munson Steamship Lines, is expected East from Seattle, after a business trip to the Pacific Coast.

H. N. Weinstein, secretary of the To-peka (Kansas) Flour Mills Corporation, returned to New York last week after an extended trip through the Middle West and Southwest, planning to remain here for a few weeks

Charles Chinski, president of the Chinski Trading Corporation, domestic and export flour brokers, left Dcc. 27 for a visit to the company's mill connections in Oklahoma City and Waco, Texas, planning to be gone about 10 days.

The Weston Biscuit Corporation, of a plant in Passaic, N. J., in operation about Feb. 1. This will make its second plant in the United States, the other being located in Watertown, Mass.

While on an eastern business trip last while on an eastern business trip last week, J. R. Hessey, advertising manager for the Russell-Miller Milling Co., Min-neapolis, spent the Christmas holiday with relatives in New York. The bal-ance of the week was spent in confer-ences at the New York office of the mill.

ences at the New York once of the mini-Clearances of wheat and four from the port of New York for the week ending Dec. 21, as compiled by the Barr Ship-ping Corporation, amounted to 322,100 bus and 37,535 bbls. The four shipments were all less than 10,000 bbls, the largest being 6,450 to Cavalla; next was 5,705 bbls to Alexandria and 4,040 to Ceuta.

bbls to Alexandria and 4,040 to Ceuta. M. Lee Marshall, chairman of the board of directors of the Continental Baking Corporation, and Ellis Baum, head of the cake department of the sume company, spent the Christmas holidays in Davenport, Iowa. Mr. Marshall went on to Kansas City before returning East, while Mr. Baum made a more extensive trip

Philip P. Brown, who, as a member of Brown & Guest, helped handle the publicity for the grain futures trading of the New York Produce Exchange, died at the New York Hospital, Dec. 19. Mr. Brown was born in San Francisco

87 years ago, and for the past 10 years had been director of publicity for the chamber of commerce of the state of New York.

BUFFALO

BUFFALO With Christmas Day well observed and in immediate need for flour, the output last week fell below that of other years. To ungent call or immediate need for flour was observed by any of the mills, on were they expected. The rapid ad-vance and fail of the wheat market did ato mean much to anybody. Buyers saw in the mean much to anybody. Buyers saw on accessity for purchasing at even the low mark, and less so on the advance. With January well started there may terialize only on lower wheat prices. With no need at home for flour during the sime, grocers put in a few light calls for the smaller packages of family flour. The usual eighth and quarter areas were neglected. The through for a small lot, but only for

der through for a small lot, but only for an absolute necessity. The slow delivery caused by heavy snow and ice has had much to do with the lessened demand. Export demand was affected by much the same conditions.

Export demand was affected by much the same conditions. Semolina had a limited sale, with only a few urgent calls. Quotations, Dec. 28, 98-lb cottons, car lots, f.o.b., Buffalo: spring fancy patent \$7.40@7.50 bbl, standards \$6.70@6.80, first clear \$6.10@6.25; hard winter standard, \$7@7.20; second clears, \$4@4.25; No. 2 semolina, 4¼c lb, bulk, New York, lake-and-rail. and-rail

# **OUTPUT OF ALFALFA** MEAL HAS BIG DROP

Very Indifferent Demand Causes Large Derense in Production During No-vember of 13,000 Tons

Production of alfalfa meal during November dropped 13,000 tons from that of October, making the season's total about 29,721 tons less than for the cor-responding period last year, according to a Department of Commerce report just issued.

Just issued. Preliminary figures for November place the output at only 27,848 tons, as compared with 40,847 in October and 33,-132 during November, 1928. Since July 1, 1929, the total production has amount-ed to 152,186 tons, against 181,907 for the same five months in 1928. In only one of the five months id production this year exceed that of last, while con-siderable reductions were evident for each of the others. each of the others.

each of the others. The drop-off in November is more im-portant when compared to the produc-tion of 1927, when an increase was shown over October of that year. Although the output from July 1 to Dec. 1 in 1927 was only 136,536 tons, production during No-vember was 37,760 tons, a gain of over 1,500 tons from October, 1927, and 10,000 tons more than was made this year in November.

A sluggish demand for alfalfa meal this fall has probably restricted produc-tion somewhat, but with such a decrease in output during one of the important producing months of the year, demand may pick up considerably at the start of 1930.

As yet, however, alfalfa meal is some-thing no one seems particularly interest-ed in. Contrary to expectations, colder weather has falled to increase demand, weather has falled to increase demand, and even in dairying sections, where it is usual to feed the meal even when using considerable amounts of home-grown grains, there is little or no call.

### 000

### HALF OF SHANGHAI MILLS **IDLE FOR LACK OF WHEAT**

WASHINGTON, D. C .- Late cable advice to the Department of Agriculture states that more than half of the flour milling idle on Dec. 1, due to lack of supplies of domestic wheat and inability to buy for-

domestic wheat and inability to buy for-eign wheat at current quotations. The report states that seven flour mills belonging to the largest milling company have been closed and are not expected to do much milling until the arrival of the new crop wheat next May. Country buy-ers, however, may secure enough wheat for short period operations, but the available supplies are considered very small. small

"Millers are constantly watching foreign wheat quotations and flour prices, along with exchange rate, in the hope of making purchases of American wheat for January or February shipments, but have little confidence of being able to buy American wheat this season," the department states.

### 000 WISCONSIN HAY CROP 50 PER **CENT LARGER THAN IN 1928**

CENT LARGER THAN IN 1928 MILWAUKEE, WIS.—Wisconsin produced more than half again as much tame hay during 1929 as during 1928 according to estimates of the Wisconsin Crop Report-ing Service, but totals are not ready to be divulged until after the first of the year. A large portion of the crop was alsike and red clover. White clover acre-age had been greatly reduced but the yield per acre was liberal. Very little pure timothy was raised, and pure tim-othy seed is scarce and wanted at pre-miums in all parts of the state.

NOTES

The North Pacific Millers' Association will hold a special meeting at Portland Jan. 10 to discuss trade practices and traffic matters.

A. C. Rath has succeeded Joseph F. A. C. Rath has succeeded Joseph F. Shields, resigned, as sales manager for the Eureka Mills, Walla Walla, Wash, owned by Strauss & Co., Ltd., Portland. Mr. Rath at one time sold flour for the Fisher Flouring Mills Co. in San Fran-cisco territory, later for the Sperry Flour Co., and in recent years has been oper-ating a feed mill in the Imperial Valley, California. California.

Winter wheat condition in the Pacific Northwest is very poor. There was ab-normally unfavorable weather during seeding time and the wheat was seeded seeding time and the wheat was seeded very late on account of prolonged sum-mer and autumn drouth. Heavy general rains since Dec. I have been of great benefit, but at best it is anticipated that there will be considerable abandonment. The Washington federal statistician esti-mates the Dec. I condition of winter wheat to have been only 40 per cent of normal, against a 10-year ayerage of 85 normal, against a 10-year average of 85.

Flour is outstanding among all Canadian goods shipped to Hongkong, China,

from the point of view of money values. In fiscal years ending in both 1928 and 1929, values for this product made up 60 per cent of the total for all exports.

### PORTLAND

Aside from several changes in prices, there were no new developments in the flour market during the week. There was very little buying for local account, and hardly any shipping orders from other coast points. An inactive market is anticipated until after Jan. 1. The is anticipated until after Jan. 1. The advance in prices also tended to restrict export flour business. City mills are list-ing family patents in 49's and second hard wheat and second bluestem in 98's at \$7.50 bbl, in straight cars. Output of Portland mills, with a week-ly capacity of 36,900 bbls, as reported to The Northwestern Miller:

### OGDEN

Although prices were firmer during the past week, Ogden millers report that very little new business developed, while very little new business developed, while shipments on old contracts were limited. This was considered as due to boliday and inventory conditions affecting all buying. Ogden's large mills operated at full capacity, with some larger ware-house stocks accumulating. Smaller mills of northern Utah and southern Idaho are operating about 40 per cent of capacity. What new business developed was lim-ited almost entirely to mixed car ship-ments – Pature bookings have been exments. Future bookings have been ex-tended into March, with indications that there will be continued milling activity throughout the winter months. Quotations to California dealers were advanced 20c bbl, those for southeastern

advanced 20c bbl, those for southeastern dealers and intermountain buyers being unchanged. Quotations, Dec. 28: to south-castern dealers, high patents \$6.90 and straights \$6.50@.6.70 bbl, car lots, f.o.b., Memphis and other lower Mississippi River common points; to California deal-ers, 20c bbl advance, first patents \$6.45 @ 6.75, second patents \$6.50@.6.45, and straights \$5.50@.6, car lots, f.o.b., San Francisco and other California common points; to Utah and Idaho dealers, fancy matents \$6.70@.7.10, second patents \$6.70@. patents \$6.70@7.10, second patents \$6.30 (a 6.70, and straights \$5.90@6.40, car lots, f.o.b., Ogden.

### NOTES

Ray L. Brang, general sales manager of the Gold Medal Flour Co., was in Ogden from San Francisco during the past week.

John L. Dower, president of the Colo-rado Milling & Elevator Co., accompa-nied by Clyde Williams, general manager of the company, has been visiting in Salt Lake City, Ogden, and other Utah and Idaho cities.

### ALFALFA MEAL SHORTAGE FORECAST FOR CALIFORNIA

shortage of about 7,000 tons of 1l-A shortage of about 7,000 tons of al-falfa meal is forecast in California by experts, who point out that with 72,400 tons available for shipment, the estimat-ed demand runs up to about 79,500 tons. From these figures, it is expected that the market should in no case be lower, and has a chance of being \$10 ton higher. "To offset the bullish idea on alfalfa," one expert says "we have a YETY DOOR

one expert says, "we have a very poor credit situation among the dairymen, who in southern California, at least, are op-

erating at cost, or less, at the present prices of hay and feed against the price they are getting for their milk."

they are getting for their milk." Barley stocks, on the other hand, are reported to be about 100,000 tons more than they were a year ago. Farm stocks Dec. I totaled about 91,600 tons, com-pared with about 76.400 tons last year, while market stocks totaled nearly 342,-000 tons, against 255,000 on Dec. I, 1928. While the 1929 crop totaled slightly less than 705,000 tons, the total suppiy for the current season amounted to 775,-000 tons, since the carryover at the first

000 tons, since the carryover at the first of the season was about 70,000 tons. Exports this season to date were about the same as for the corresponding period last year, and totaled 175,000 tons. This would leave about 165,000 to be accounted for in domestic disappearance for feed, loss and waste, compared with about 284,000 tons used for these pur-poses for the corresponding period last vear.

### CATTLEMEN IN CALIFORNIA HOLD ANNUAL CONVENTIONS

The supply department of the Califor-nia Cattlemen's Association handled approximately \$190,000 worth of husiness the past year, it was brought out at a joint convention of the organization with the Western Cattle Marketing Associa-tion at San Francisco, Dec. 13-14.

tion at San Francisco, Dec. 13-14. The department grew rapidly this year, and indications are that it will expand still further. The satisfactory condition of affairs was shown by the status of the reserve fund, which had reached a total of 565,000. Selling charges were reduced from 3 to  $2V_2$  per cent follow-ing the announcement that cost of selling had amounted to 2.18 per cent of sale prices. prices.

The association also voted in favor of having the selling agency handle feeder cattle as well as fat cattle. This will be a new feature. P. S. Doris, president, spoke, as well as Hubbard Russell.

### FRANCE ADOPTS FURTHER LAWS FOR WHEAT IMPORTS

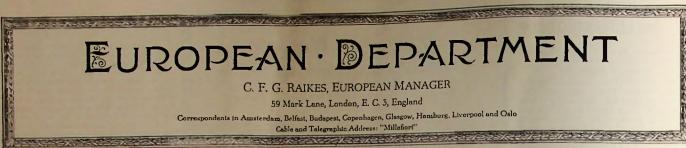

WASHINGTON, D. C.-Following the an-nouncement that the French government, effective Dec. 5, required mills in France to use at least 97 per cent of domestic wheat in the manufacture of ordinary flour, the United States Department of Commerce has received a further report Connected has received a turnier report on the policy of the French government. The commercial attache at Paris, F. W. Allport, in pointing out the significant features of the measure regulating the wheat trade, passed by the Chamber of Dendtion Neural and the Chamber of Deputies Nov. 30, points out that the measure calls for the declaration of the total stocks on hand of foreign wheat, domestic wheat and derivatives, and requires re-export within three months of wheat or flour equivalent to the wheat imported under temporary permits.

The government is authorized to estab-lish and require the flour mills to use a fixed proportion of domestic wheat in the production of flour; the ministerial au-thority is extended to increase the duties on agricultural products subject to subsequent ratification.

The measure also provided for a twoday retroactivity in the application of the wheat duty increase of May 23 last to penalize certain mills that imported excessive quantities of wheat immediately prior thereto. The law was formulated for the purpose of causing the ultimate reduction of the wheat imports and to relieve the present congested market condition.

EXTENDS TIME LIMIT ON WHEAT BALTIMORE, Mn .- Word has been re-ceived here that Seymour Lowman, asceived here that Seymour Lowman, as-sistant secretary of the treasury, has di-rected the customs authorities to extend indefinitely the time in which bonded wheat for export may be held on New York docks. This action has been taken to enable continuous shipments without penalty under the requirements of the pier regulations, which limit the time for dock storage to 30 days. THE NORTHWESTERN MILLER

January 1, 1930

# **FINLAND INCREASES DUTY ON ALL FLOUR**

42

Higher Rates, Effective on Jan. 2, Thought to Be for Revenue Purposes of

Government

Exc.-Finland, best markets for imported flour, has de-cided to increase the duty on flour en-tering the country, to be effective from Jan. I, 1930. The new duties will be as follows, per 100 kilos, in Finnish marks:

Duty Duty d New 0 125 150 Flour and meal-Old Wheat meal, whole (Graham) 100 Wheat flour other than whole 120 Durum wheat conress estimations 120 Rye meal, whole 65 Rye flour, patent 55 Catmeal, flour and groats 55 Barley, buckwheat, millet flour and groats 50 125 90 130 80 80 100

It is understood that the increased tarif has been imposed to encourage home production, but as no large quantity of grain can be grown in the country, in all probability the new duties have been an probability the new dutes have been imposed for revenue purposes. Since the war the production of wheat has shown a tendency to increase and it is estimat-ed that this year the wheat crop reached about 1,000,000 hus.

### **EXTEND SCOPE OF LONDON** WHEAT FUTURES MARKET

LONDON. ENG.—At a meeting of the London Grain Futures Association re-cently it was decided to extend the scope confly it was decided to extend the scope of the London wheat futures market by making No. 3 northern Manitoba, Nos. 1 and 2 hard where, and Argentine ( $624_2$ -lb and  $634_2$ -lb), as well as choice while Karachi wheat tenderable at con-tract prices, and a number of other de-scriptions tenderable at fixed differen-tials. The scheme includes ex-store tend-ers of wheat stored at warehouses au-thorized by the association. Prior to these alterations, the only wheats tenderable on the London option market were Nos. 1, 2, 3 and 4 Manito-bas. A market limited to Manitoba wheats was not found satisfactory, as very little business was possible. Under the new rule there will undoubtedly be a broader market.

a broader market.

000

LONDON FLOUR TRADE MEETING LONDON FLOCK TRADE MEETING LONDON, ENG.—The annual meeting of the London Flour Trade Association was held in the board room of the Corn Exchange on Friday, Dec. 13. After the usual routine business had been disposed of five members were elected as members of the arounting ammittee to take the of the executive committee to take the place of those retiring. The election re-sulted in the following members being chosen: A. Vaughan Thomas, C. E.

### AUSTRALIAN MILL PROVI-SIONS AMERICAN SHIP

WHEN the S. S. Malolo, carrying a large party of American busi-ness men on a world tour, stopped at Sydney, Australia, recently, it was provisioned with flour by Edwin Da-vey & Sons, well-known millers of Sydney. The firm has heen active in business since 1865. The proprietors are close students of the situation in the million and drain industries and. the milling and grain industries and in a letter to The Northwestern Mill-er, said they took particular pleasure in filling the order of the American tourist party.  Feast, A. E. James, Percy Cooper, A. G. Grimsdale. The meeting was presided over by W. T. Odam, who is the president of the association for the current year.

### WHEAT REGULATIONS CHANGED

HAMPER, GERMANY. — The German food minister has issued a regulation dated Nov. 29, prescribing that during the months of December, 1929, and Jan-uary, 1930, every German mill will have to grind at least 50 per cent of German wheat in the total quantity of wheat milled during these months.

### 000

### **OUTPUT OF DANISH MILLS CONTINUES TO DIMINISH**

WASHINGTON, D. C.—Diminishing pro-duction, because of foreign competition, continued in the milling industry in Den-mark during 1928, according to a survey made by Paul H. Pearson, assistant toda or prioritory in Complement Ten

mark during 1928, according to a survey made by Pnul H. Pearson, assistant trade commissioner in Copenhagen. Ten-dency toward lower production of flour has been apparent in Denmark since 1924 when 1,607.000 bbls were ground as compared with 1,199,000 bbls in 1928. Concurrently with the decline in local production, Mr. Pearson reports, there has been a rising importation of wheat flour and in 1928 the quantity purchased abroad, chiefly in United States and Canada, amounted to about 876,000 bbls or fully 73 per cent of the domestic pro-duction. This compares with 360,000 bbls or about 22 per cent of the Danish out-put imported in 1924. Activity of mills grinding rye flour in-creased during 1928 and the development of this branch of the industry more than equaled the decline apparent in the mill-ing of wheat flour. The total output of the rye mills was 1,500,143 bbls in 1928, as compared with 1,405,125 bbls in 1927. Imports of rye flour, which generally could end phase the new could be development of the source of the lour of the lour of the source of the source than equaled the decline apparent in the mill-ing of wheat flour. The total output of the rye mills was 1,500,143 bbls in 1928, as compared with 1,405,125 bbls in 1927.

Imports of rye flour, which generally equal only about 1 per cent of the do-mestic consumption, revealed little va-riance in 1928 as compared with 1927, the figures being 23, 918 and 24,615 bbls, respectively

Exports of wheat and rye flour totaled 82,676 bbls in 1928, a decline of 8,966 bbls or about 10 per cent under the pre-

bois or about 10 per cent under the pre-vious year. The greater part of the ex-ports went to Germany and France. Barley flour production in Denmark steadily is falling off. Production of oat-meal gained by about 400 metric tons in 1928 and totaled in all 4,179 metric tons as against 3,817 metric tons during the previous year. Imparts of astment met previous year. Imports of oatmeal, most of which come from Sweden and the United States, have remained in the weighborhood of 3,000 metric tons dur-

ing the past three years. At present the Danish milling industry embraces 82 establishments employing 845 workers.

ROUMANIA LACKS GRAIN STORAGE BUCHAREST, ROUMANIA .-- Measures to BUCHARIST, ROUMANIA.—Measures to relieve the unsatisfactory condition caused by the lack of grain storage space at the port of Constanza will be taken soon, according to a promise made by the Roumanian minister of trade, who re-cently visited the port. The grain stor-age capacity of Roumanian railways also is hardly sufficient for present needs, and it is thought that some action will be taken to remedy the situation. taken to remedy the situation.

FLOUR REBATES IN GERMANY

HAMBURG, GREMANY.—Negotiations be-tween the South German Millers' Fed-eration and the flour trade associations of the southern districts of Germany re-

garding a special rebate, or yearly bonus in proportion to turnover, and regarding the division of the amount of this bonus among parties interested recently have led to a final result. Details of the arrangement were given in a previous issue of this paper, but as will be re-membered, objections were raised by the objections have meanwhile been removed so that the middle and smaller firms have given their accord to the agreement.

### 000 CANADIAN BID FOR ENGLISH PLANTS PROMISES SUCCESS

PLANTS PROMISES SUCCESS Loxnox, Exc.--After spending about two months in London, C. W. Rowley, director of the Toronto Industrial Com-mission, has sailed for home. Mr. Row-ley, formerly of the Canadian Bank of Commerce, and known by a large num-ber of millers in Canada and the United States, was sent over to London by the Toronto Industrial Commission to en-courage British manufacturers to erect manufacturing plants around Toronto, or elsewhere in Canada. The Toronto In-dustrial Commission could not have se-lected a more suitable representative than Mr. Rowley, as he is a man that treates a favorable impression wherever he goes, brimming over with energy and creates a favorable impression wherever he goes, brimming over with energy and with the faculty of converting the worst form of pessimism into optimism. It is understood that the propaganda put forth by him will result in several Brit-ish firms establishing manufacturing plants or distributing depots in Canada. While Mr. Rowley was connected with the Canadian Bank of Commerce he made frequent visits to Minneapolis and was one of the Canadian representatives at the celebration of the fiftieth anni-versary of The Northwestern Miller in 1923. 1923.

### 000

ARGENTINE WHEAT NOT POPULAR ARGENTINE WHEAT NOT POPULAR WASHINGTON, D. C.—Argentine wheat is not popular in France, according to the Department of Commerce, for the reason that the irregularity of types from year to year prevents the French miller from knowing whether or not he is going to receive the types he desires. Of those types of Argentine wheat sold on the French market, however, Bahia Of those types of Argentine wheat sold on the French market, however, Bahia Blanca types are in the greatest demand for the reason that they more nearly re-semble Manitoba wheat which has a large gluten content. Another damaging factor in the sale of Argentine wheat in France, says the Department, is the fact that the trading documents are printed in English. The smaller French miller, it is reported, does not care to sign doe-uments printed in a language he does not understand.

ITALY'S AGRICULTURAL DEVELOPMENT ITALY'S AGRICULTURAL DEVELOPMENT LONDON, ENG.—Advices received from Rome state that the under-secretary of state for agriculture reports that, since the Fascist regime began, millions of acres of waste land and land which was hundated, have been brought into cul-tivation. He stated that Italy now pro-duces 257,000,000 hus of wheat per an-num, and will presently cease to import.

# **ARGENTINE WHEAT IS** PLENTIFUL IN ENGLAND

Year Has Brought Steady Stream of South American Grain to Europe—Much Shipped Unsold

American Grain to Europe-Juca Shipped Unsold Loxoox, Exa.—The following figures demonstrate very clearly the large pro-portion of wheat that comes to the Unit-ed Kingdom from the Argentine. In a recent week 393,000 qrs of wheat entered the port of Liverpool. Of this quantity 208,000 qrs came from the Argentine, while in addition 169,000 qrs went to Manchester for storage. On the east coast, out of 177,000 qrs of wheat that arrived in Hull, over 100,000 qrs came from the Argentine. This deluge of Ar-gentine wheat has been continuous throughout the season and has undoubt-edly provided the British and continental millers with a cheap mill mixture. Judg-ing from reports received from the Ar-gentine—most of which are unfavorable as regards the crop—the deliveries of wheat from farmers continue very heavy and are being shipped unsold by export-ers to European ports. If this is true European millers will continue to than ers to European ports. If this is true European millers will continue to obtain cheap supplies of the raw material.

### FLOUR IMPORTER ELECTED **CORN EXCHANGE DIRECTOR**

LONDON, ENG.-J. L. Pillman, of the flour importing firm of Pillman & Phil-lips, London, has been elected a director of the London Corn Exchange Co. This is regarded as a considerable honor and the London flour importers are gratified at having such an able representative of their trade serving on the Board of the London Corn Exchange.

Regina, Saskatchewan, in 1932 will be Regna, Saskatchewan, in 1932 will be the scene of a world grain exhibition which will be of historic importance, and in which 60 countries will take part. The conference will open on July 29 and will last until Aug. 12. The execu-tive committee now working out the plan looks for an attendance of 500,000 neonle. people.

### BRITISH MILLER DEFINES "LUCK"

### London, Eng.

London, Eng. JOSEPH RANK, the milling "king" of the United Kingdom, recently gave a new interpretation of the word "luck." Speaking at a meeting he said he was once told by his father that "luck" consisted of working 18 hours a day, and then, continued his father, if you are not lucky you want shooting. This interpretation has cer-tainly worked successfully in the case of Mr. Rank, as he has been a hard worker all his life and has the faculty of inspiring those around him to do of inspiring those around him to do likewis

Mr. Rank started his milling career by running a windmill in Yorkshire, near Hull, and is today the head of one of the largest milling groups in the United Kingdom. In all probabil-ity he has made more money out of four milling than any other individual miller in any part of the world. The value of his business and plants runs into millions of pounds sterling. Dur-ing recent years he has given or set aside enormous sums for church and charitable purposes.

# MILLFEED

### CENTRAL WEST

Chicago.—Demand a little improved latter part of week; inquiry fair; trend unsettled. Spring bran \$28.75@29, hard winter \$28.75@29, standard middlings \$29.25, flour middlings \$30.25; red dog, \$32.50@33.

St. Louis .- Demand slightly better; inquiry improving; mixers do not seem to be in the market, but there is fair retail strading; offerings are not heavy. Bran, \$27.75@28.25; brown shorts \$29@29.50, gray \$31; standard middlings \$30, flour middlings \$31.

Louisville.—Demand good; inquiry bet-ter; trend firm. Bran, \$34; mixed wheat feed, \$34.50; middlings, \$35; gray mid-dlings, \$39; red dog, \$41.

### THE NORTHWEST

Minneapolis.—At no time in recent months has the market on millfeeds been as dead as at present. There is an ab-solute dearth of inquiry for shipment. Eastern huyers apparently are able to satisfy current needs from distress ship-ments in transit at prices materially satisfy current needs from distress ship-ments in transit at prices materially lower than shippers ask. It is under-stood that good-sized quantities of tran-sit bran were bought late in the week at Chicago for less than what mills ask here. Reduction in butterfat prices in middle western states has curtailed the demand for all feeds from dairying in-terests. Country flour middlings and red dog are particularly weak, sales being reported at \$2.50@ ston under Minne-apolis prices. Local quotations are reported at \$2.50@3 ton under Minne-apolis prices. Local quotations are largely nominal. Mills quote bran at \$27 @27.50 ton, with sales reported at \$26; standard middlings \$27.50; flour mid-dlings, \$31@33; red dog, \$34@35; wheat mixed feed, \$28.50@31, and rye mid-dlings, \$23@24, in 100-lb sacks, f.o.b., Misnearolic Minneapolis.

Duluth.—Demand and inquiry light; trend steady; few scattering car lot sales of bran. Bran, §28; standard middlings, §29; flour middlings, §31; red dog, §36.

Des Moines.—Demand rather light; in-quiry good; trend slightly ligher on shorts and standard middlings. Winter wheat bran \$28, spring wheat \$28.50(0) 31; gray shorts, \$37(0)39; standard mid-dlings \$36(0)37, flour middlings \$42; red dog \$38(0)47 dog, \$38@47.

### THE SOUTHWEST

Kansas City .- Persistent sluggishness has brought the market to a standstill. Inactivity is due principally to lack of demand, for prices are fairly low for this time of year and offerings are ample. Yery little inquiry is being received, parvery little inquiry is being received, par-ticularly for future shipments, and those are on the basis of present prices and cannot he met by mills. Middlings are relatively weak as indicated by the small spread. Bran, \$25.75@26; country bran, \$25; gray shorts, \$27.50@28; brown shorts, \$26.50@27; red dog, \$33@34.

Atchison .- Demand slightly better; in-Atchison.—Demand slightly better; in-quiry fair; trend firm; farmers seem to be interested in round lots, and mills are looking for a better demand after Jan. 1. Shorts, \$28; mill run bran, \$27; hran, \$26; for deferred delivery mills are either refusing to offer or are asking \$1 @2 premium, feeling that millfeeds are hound to go higher, in view of firmer flour prices. flour prices.

Oklahoma City.-Demand very slow; trend steady. Straight bran \$28, mill run \$31, and shorts \$34, delivered, Oklahoma points.

Omaha .- Demand fair; inquiry improv-Omaha.—Demand fair; indury improv-ing; trend downward. Standard bran \$25.50@25.75, pure bran \$26@26.25; wheat shorts \$27, gray shorts \$27.50@28; flour middlings, \$30; red dog, \$33.50@35.

Birmingham.—Demand fair; inquiry moderate; trend unchanged. Bran, \$33; shorts, \$36; red dog, \$42.25.

Denver.-General tone of market weak; trend downward. Red mill run bran, \$26

### Feed Demand Continues Slow

THE usual year-end dullness prevails in feedstuffs markets, but prices of most feeds are about unchanged from a week ago. Only linseed meal showed a decided weakness, and that slump was not large. Smaller offerings of cottonseed meal helped to maintain levels of that commodity. Weather continues such as to cause a greater demand, but thus far the effects of the coldness have not appeared. Unsettled grain markets have contributed somewhat to the dullness.

Millford .- Demand for millfeed continues slow, but prices remain about unchanged from a week ago. Nervousness in wheat markets, as well as the curtailment of buying over the holidays, added to the dullness, which has been a characteristic of the market for some weeks. Offerings in the Southwest are very liberal, but buyers are not purchasing at any price, with shorts harder to move than bran. New business is also lacking in the Northwest, but shipping directions are rather free and it is expected that the bulk of December business will be cleaned up on time. Although offerings of interior mills are not large, enough millfeed is coming to Minneapolis to keep prices below eity mill levels. There are no buyers for country flour middlings and red dog, so there is a wide spread in these grades. The Chicago market showed a slight improvement late in the week, but is still inactive, while business at castern points also is quiet. There is a fairly good demand in northern Pacific Coast markets, but otherwise purchasers are showing no interest.

Linseed Meal.-Weakness has developed in linseed meal prices, and mill offers at some points are 50c@\$1 lower than a week ago. Resellers still control the market at Minneapolis and are underselling crushers \$1@2 ton. Mills have little to offer, however, due to light operations, and have plenty of orders and shipping directions to take care of current output. Demand in all markets is quiet, but comparatively is a little better at Buffalo, where prices are practically the same as a week ago. Crushers are not pressing the market at any point, and this fact has helped to keep quotations from breaking very much.

Cottonseed Meal .- Dullness prevailed in most cottonseed meal markets over the holiday, with little demand of consequence at most points. Values are generally unchanged, as offerings have been reduced to offset restricted buying. Open interest in futures at Memphis is believed to be unusually large and heavy tenders on contracts are expected in January. Most of the current production of mills is being applied on commitments. Severe winter weather has stimulated consumption and this probably will be reflected in sales after Jan. I. Prices at some points in the Southwest are comparatively high, reflecting the scarcity of offerings and good demand. Strength in grains helped to hold prices steady, although values of competitive feeds have shown very little change, and offerings are comparatively plentiful.

Hominy Foed .- The price trend in hominy feed is irregular, with a few points reporting a slight weakness and others recording small gains. In general the level remained about the same as a week ago. Demand is fair to good, with inquiry showing a slight improvement at most points.

Gluten Feed .- Practically no change is shown in gluten feed values compared with a week ago. Demand generally is slow to fair, but there is a slight improvement reported at Buffalo.

Alfalfa Meal .- There is no change in alfalfa meal markets. Demand remains slow, but prices are about the same as a week ago. The Chicago market still is largely a nominal one. Reluctance to enlarge stocks until after the first of the year has been offered as the principal reason for the duliness.

### 

@30; white bran, \$28@32; gray shorts, \$34@38; white shorts, \$36@41.

Wichita-Demand and inquiry better; trend higher. Bran. \$29; shorts, \$30@31. Bran, \$266a 27; mill run,

Salina.—While demand for bran and shorts is not active, there is no accumu-lation. Due to disappointing flow of specifications on flour orders, mill operavitons have fallen off sharply, leaving mills with hardly enough feed, especially shorts, to fill mixed car orders; deferred husiweeks; mills' asking prices are well above the ideas of the trade; December con-tracts are rapidly being completed, and this is taking all carload offerings. Bran \$25.50@26, shorts \$28@28.50, basis Kansas City.

### THE EAST

Buffalo .- Demand fair; inquiry steady; buyato.—Demand fair; inquiry steady; trend should improve with light flour output; middlings, with no demand from hog producers, are barely able to keep up with bran. Standard bran, \$30.75; standard middlings, \$30.75; flour mid-dlings, \$33; red dog, \$39.

Baltimore .-- Demand rather poor; inquiry below normal; trend downward; offerings are in excess of trade require-ments; general market lacks support.

Unless otherwise specified, feed quotations named in The Northwestern Miller are of Tuesday, the day preceding publication, and are per ton, sacked, in car lots, f.o.b., at the points named.

Spring wheat bran, \$31.75@35; winter wheat bran, \$31.75@35; standard spring wheat middlings, \$34.75@35; flour mid-dlings, \$39.50@39.50; red dog, \$39.50@ 40.50

New York .- Demand little better than routine; inquiry inactive; trend lower. Bran, \$36@37; standard middlings, \$36 @37; red dog, \$14.50@45.50.

Boston. — Demand slow; inquiry is moderate; trend firmer. Spring bran 834.756/35.50, winter 834.756/35.50; mid-dlings, 8556/350; wheat mixed feeds, 838.516/12; red dog, 8416/42.50.

Philadelphia .- Demand limited; inquiry Phuadelphia.—Demand limited; inquiry indifferent; trend downward. Spring and hard winter hran, \$35@35.50; pure bran, \$35.50@36; soft winter bran, \$36.50@37; standard middlings, \$35@36; flour mid-dlings, \$37@40; red dog, \$40@41.

Pittsburgh. Demand slow; inquiry is light; offerings liberal; prices lower. Spring wheat bran, \$33.50@34; standard middlings, \$33.50@34; flour middlings, \$35.50@36.50; red dog, \$39.50@40.

### CENTRAL STATES

Toledo.—Millfeed is slow, with slack demand, weak undertone and not much sale. Soft winter wheat bran, \$30,756 32; mixed feed, \$326032.50; standard middlings, \$30,25; flour middlings, \$32,25 (a 33.50.

Cincinnati.—Demand very poor; in-quiry light. This is dull season, but the general comment is that it is worse than anticipated. Bran, soft winter wheat \$31.50@32, hard winter \$31@31.50; mid-dlings, standard spring wheat \$32@32.50; soft winter wheat \$33@33.50; gray shorts, \$32@32.50; red dog, \$38.50@39; wheat mixed feed, \$32@32.50.

mixed feed, \$32632.50. Indianapolis.—Demand quiet; trend downward; little activity expected until Jan. 1; stocks are low, and dealers are huying sparingly. Soft winter wheat bran, \$31.506.32; standard wheat mid-lings, \$32.256.32.50; mixed wheat feed, \$346.34.50; flour middlings, \$34.506 35.50; red dog, \$386.39.50.

Evansville.—Demand satisfactory; in-quiry good; trend steady; inventory and holiday season has slowed trade. Bran, \$32; wheat mixed, \$33; shorts, \$34.

Columbus.—Spring wheat bran, \$356 \$35.50; hard winter bran, \$34.506(35; soft winter bran, \$346(31.50; standard middlings, \$35.506(36; flour middlings, \$386(38.50; red dog, \$416(41.50).

### THE SOUTH

New Orleans. Demand fair. Texas wheat bran \$1.50 per 100 lbs, gray shorts \$1.70; Kansas wheat bran \$1.63@1.65, gray shorts \$1.80; standard middlings, \$1.75; red dog, \$2.05.

Norfolk.—Demand negligihle; trend downward; too much local grain, and, up to very recently, much open weather and hog butchering. Red dog, \$420(43; win-ter middlings, \$450(53; standard mid-dlings, \$350(36.50; standard hran, \$350) 36; winter bran, \$340(36.

Nachville, Demand slow and less ac-tive; inquiry moderate; trend easier. Wheat bran, \$286-31; middlings, \$336 37.

Memphis.—Demand negligible and spasmodic, and only for limited lots; waiting until after end of year; trend slightly casier. Wheat bran, \$25; gray shorts, \$32.

Dallas.-Demand strong; inquiry steady; trend firm; offerings liberal. De-livered, Texas common points, 100-lb bags; bran, \$1.40@ 1.50; brawn shorts, \$1.75@1.80; white shorts, \$2.30@ 2.49. Dallas,-Demand

### PACIFIC COAST

Seattle. - The market retains the strength it has shown for several weeks, though prices are not quotably higher Supplies are noterate and demand good, and the tone is healthy and appears to indicate a higher trend. At the close of last week Washington standard mill-run was generally quoted at \$30. Montana mills are offering very little feed to this coast, and resellers are asking about the same price as quotations for local feed.

Portland—Dennand steady: inquiry normal; trend firm; Montana feed was sold here for future delivery, the first offerings from that state in several months. There is no pressure by local mills to sell and an upward tendency is expected for the next few months. Standard mill run, \$31; middlings, \$41.

Spokane.-Demand and inquiry fair; rend upward. Quotation, \$33@34.

trend upward. Quotation, 833@34. San Francizco.-Buyers showing no in-terest except at reduced prices: offerings for deferred shipment very light, and mills holding firm; spot and near-by of-ferings impossible to move except at sac-rifice. Kansas bran, 836@38; Ogden white mill run 834@35, blended mill run 833@34, red mill run 832@33; northern white bran and mill run 833@34, red and standard mill run 832@33; shorts, 835@ 36; middlings, 839.50@40.50; Montana bran, 834@35; Montana mill run, 833@ 34; low grade flour, 842@43. Ogden.-Demand only fair; inquiry ac-

Option Demand only fair; inquiry ac-tive; trend upward; heavier call from California and intermountain states, combined with lessened production by Ogden mills, resulted in much stronger Ogden mills, resulted in much stronger market conditions, although December quotations remained unchanged and Jan-uary advanced \$1. To California dealers, red bran and mill run, \$32; blended bran and mill run, \$33; while bran and mill run, \$31; middlings, \$42, car lots, f.o.b., San Francisco and other Califor-nia commen variet; to 11the and Idehe nia common points; to Utah and Idaho dealers, red bran and mill run, 827, blended bran and mill run, 828, white bran and mill run, 829, and middlings, 837, car lots, f.o.b., Ogden.

### CANADA

Winnipeg.—Demand and inquiry mod-erate; trend firm; domestic business fair. Manitoba and Saskatchewan, bran S30, shorts S32; Alberta, bran S31, shorts S33; British Columbia, bran S31@33, shorts S33@35; Pacific Coast, bran S34@36, that Si@20 shorts \$36@38.

Toronto.—Some accumulation and cut prices at some points in Ontario are be-ing named by mills for car lots. All big-ger millers concentrating on mixed car trade. List prices unchanged. Bran \$35; shorts, \$37: middlings, \$44, jute, mixed cars with flour, delivered Ontario points. points.

### DAIRY FEED

Chicago .--- Demand moderate; inquiry just fair; trend steady; 32 per cent pro-tein, \$30.50; 24 per cent, \$44.50@45; 20 per cent, \$42.50@43; 16 per cent, \$32.50 @34.

### POULTRY FEED

Chicago.—Demand fair; trend steady. Scratch feed, \$43@43.50; laying mash \$55@55.50, growing mash \$57@57.50; coarse chick feed \$50, fine \$52.50.

### LINSEED MEAL

Minneapolis.--Resellers still control the market on linseed meal, underselling the market on linseed meal, underselling crushers \$1@2. Crushers have little 'o offer. Mills are operating at very light capacity and have plenty of orders and shipping directions to take care of cur-rent output. They quote \$56@57, Minne-apolis; Chicago-Toledo, out of market; Buffalo, \$56.50; Fredonia, Kansas, \$59; Portland, Oregon, \$52. Linseed oil cake for export, \$16.50, f.a.s., New York. Winning. Domend and invites aced.

Winnipeg.—Demand and inquiry good; trend steady; good inquiry from prairie provinces. Cake, \$51; meal in new bags, \$53; in seconds, \$51.

Buffalo.-Demand fair; inquiry slow. Quotations: 31 per cent protein, \$55; 32 per cent. \$51.

### CORN FEED

CORN FEED Milwaukee.—Demand very active for feeding meal; inquiry good: trend firm; nearly all of meal production continues to go into mixed feeds. Yellow corn feeding meal, \$35; cracked corn, \$38; corn and oats chop, 50 per cent of each, \$35; cracked corn and crimped oats, 50 per cent of each, \$37.

### SCREENINGS

Minneapolis.—Prices on better varie-tics 50c higher. Mixed feed oats also showing strength. Elevator dust quiet

### Index of Millfeed Production

THE following table shows the computed production The current week, with prior weeks and annual averages for compari-son, of (1) mills of Nebraska, Kansas and Oklahoma and the cities of Kansas City and SL Joseph; (2) mills of Minnesota, North Dakota, South Dakota and Montana and the cities of Minneapolis, St. Paul and Duluth-Superior; (3) mills of Buffalo, N. Y:

reported direct to this publication by 75 per cent of the flour milling en-pacity of the Southwest, S1 per cent of the Northwest and all of the flour mills of Burfalo.

and unchanged. Inquiry in general light, but so are offerings. It would be diffi-cult to buy a few hundred tons without advancing prices very materially. Grind-ers report little demand from feed mix-ers. Heavy seeds, 819.500/20.50; Cana-dian refuse. 817.500/81.50; light-weight, 206/22-lb, \$14@16; dust, \$\$\$@10. No. 1 mixed feed onts, 33½@34½c bu; No. 2, 31/6/32e. 316 33c

Winnipeg.—Demand and inquiry good; trend steady; demand briskest for stand-ard recleaned. Refuse, \$16, track or ex-mill; standard recleaned, \$28; unground, bulk, \$33, sacked; ground and sacked, \$35

St. Louis.-Demand quiet; trade is not interested, as millfeed levels are too low to permit screenings to be ground at a profit. Wheat screenings, \$22@23.

### OAT FEED

Toronto.—Demand and inquiry light; trend steady; offerings too scarce for business; chop has declined \$2; other lines unchanged. Crushed oats \$48@50, chop \$46, feed \$25, bags included, cash terms, delivered, Ontario points.

### HOMINY FEED

Omaha.-Demand fair; inquiry limit-ed; trend steady. White or yellow, \$32.

BREWERS' DRIED GRAINS

Milwaukee.--Demand very light; in-quiry fair; trend weak, with increasing production. Quotation, \$35@36.

### COTTONSEED MEAL

Memphis.—Cash demand continues ex-tremely light, as everybody seems desir-ous of keeping stocks at a minimum un-til after Jan. J. Mills offering sparing-ly; trading in futures suffering from holiday dullness; market steady and a shade higher for the week. Cash 41 per cent meal, Dec. 28, \$37.25 ton; 43 per cent, \$39.75@40; hulls firm; loose, \$6.50.

### ALFALFA MEAL

St. Louis.-In second-hand sacks, No. was quoted at \$256 25.50 ton; No. 1, 2 \$28@ 28.50; choice, \$31.50@ 32.

After dropping sharply on Dec. 27 owing to liberal deliveries on contracts, fluxseed futures recovered some of the loss and the undertone again is firm. Re-ceipts at Minneapolis and Duluth-Superior totaled 187,000 bus, compared with 143,000 in the previous week and 116,000 a year ago. Shipments were 81,-000 bus compared with 67,000 in the previous week and 21,000 a year ago. Stocks at these markets gained 123,000 bus, compared with 1,304,000 a year ago. The official estimate of the Argentine government places the flaxseed crop in that country at 56,000,000 bus, compared with 73,000,000 a year ago. India is with 73,000,000 a year ago. India is shipping very moderately and new crop advices from that country are pessimistic

Minneapolis.—Demand moderate. Of-ferings more liberal than expected. Prices off 2@3c compared with week ago. No. 1 flaxseed, Dec. 30, \$3.13@3.17 bu.

No. 1 flaxseed, Dec. 30, \$3.13@3.17 bu. Duluth.-Sharp early advance and snappier and broader breaks were out-standing features in the futures market. The bullish Argentine production esti-mate and price improvement largely contributed to the upifit, while increased receipts, creating strong hedging pres-sure against cash purchases, and inade-quate support, were the prominent fac-tors responsible for the depression. An-other factor was the reduction of open December contracts and freer late deliv-eries reducing short accounts. Decem-December contracts and ireer late deliv-eries reducing short accounts. Decem-ber broke 17% c from top point; May, 8% c. In the end December closed net 4c loss, while May rested at closing price of Dec. 21. No. 1 spot to unload this month was quoted at December deliv-ery price on track and to unical loss ery price, on track and to arrive 10c discount under May. Light rail move-ment out of here.

Winnipeg.—No crusher interest in the flaxseed market, and trading featureless. No. 1 northwestern was quoted, Dec. 28, at \$2.63 bu, hasis in store Fort William or Port Arthur.

Inc., are: David K. Steenbergh, president and treasurer; M. F. Brobst, vice presi-dent; G. L. Stutz, secretary. The direc-tors are W. G. Haertel, of the Haertel Co., Minneapolis; F. Kern, a Wisconsin feed dealer; W. D. Walker, of the Ar-eady Farms Milling Co; L. L. L. Budde, La Budde Feed & Grain Co; D. W. Me-Kercher, a Wisconsin Rapids feed mixer, and O. R. Sickert, of Deutsch & Sickert Co., Milwaukee.

Action of a Sickert, of Deutsch & Sickert Co., Milwaukee. Farmer and Feeder will be published monthly "to furnish agricultural readers with information, based on concrete ex-amples in feature stories of farm success, shwing that farming is a good business." There will be a women's department, a section devoted to boys' and girls' **chub** work, and material "describing in simple detail the methods of feeding and farm management employed by successful farmers." A high quality of magazine paper stock and make-up will be used. It is understood that circulation will be concentrated in Wisconsin. concentrated in Wisconsin.

# An Old Gristmill in Maine

### By Alfred Elden

WHE little Maine town of Naples, in THE little Maine town of Naples, in Cumberland County, nestles among the foothills of the White Mountain Range, which on clear days make an in-spiring, imposing skyline as they loom big, blue and, much of the time, snow-capped. This Naples, like its Venetian namesake, is well bounded by water. On the north lies Long Lake; on the south the broad Bay of Naples, erstwhile Brandy Pond. The town is built around their shores their shores.

On the outskirts of the village a coun-On the outskirts of the village a coun-try road diverges to the eastward from the splendid Roosevelt Highway. It is narrow, hilly, and houses are few and far between. For the first mile in from Naples, one notes at fairly regular inter-vals weather grayed telephone poles. Just rough hewn, bare posts without cross arms or wires. They end abruptly. Evidently the telephone company started to give the Lamb's Mill Roaders a tele-phone service as cheaply as possible, but got discouraged. got discouraged.

phone service as cheaply as possible, but got discouraged. A loncsome trail, indeed, yet at the foot of a sharp hill about two miles in from the macadam highway I came upon a little white farmhouse, immaculately kept. Beds of double petunias and dahias adorned the front yard. Just clear of them a cow tethered to a crow-bar driven in the ground was contented-ly filling the role of bovine lawn mower. A collie dog stood in the barn doorway, a friendly wagging tail belying his sav-age barks of doubtful greeting. Like the cow, however, he also was tethered— securely I hoped. Across the dusty road, close to a little bridge from underneath which there came the music of purling waters, stood what is undoubtedly one of the most interesting old gristmills in western Maine. The Muddy River, a winding stream, yellowish in tinge from the char-acteristics of the clay soil through which it flows for a part of its length, fills the mill pond. This is dammed at the nar-row outlet where the gates are that let the water into the flume and to the tur-bine. Having demonstrated the poet's asser-

bine wheel.

Having demonstrated the poet's asser-tion that "the mill will never grind with the water that is past," the miniature torrent tumbles along through the valley, out into green pastures and on to its outlet at South Naples, where it empties into Lake Schare

For more than 100 years there has been a mill here for the grinding of grain. Sometimes a straight gristmill— sometimes a combination grist and saw mill. That is what it is to-day.

Exports of cotton and rubber from Brazil are showing a strong decline. In 1928 shipments of cotton decreased 12.6 per cent from 1927, while rubber ex-ports were 50 per cent less.

Argentina is still our largest customer for motor cars, Australia is second, Bra-zil is third and British South Africa is fourth. The United Kingdom ranks far down the list.

FLAXSEED

# RYE PRODUCTS

Milwaukee.—No sales of ryc flour have been reported, and very little interest has been manifested either locally or at a distance. A wider range is evident in quotations. Directions continue hard to get. Nominal quotations, Dec. 28, basis Milwaukee, in cotton 98's: pure white, \$6.25(@6.55 bhl; light, \$6@6.30; medium, \$5.75@6.05; dark, \$4.65@4.80; meal, \$5.05 @5.20. @5.20.

(@5.20. Minucapolis.—Ryc mills are operating rather spasmodically. Inquiry is indif-ferent, and is largely for the dark grades. In order to supply the demand for the latter, mills have to store most of the white and medium grades they make. No interest evinced in future deliveries, buyers contenting themselves with sup-plying their requirements from week to week as needed. Local shipments are largely used to keep warehouse stocks intact. Pure white ryc flour \$6.25@6.40 bbl, in 98-lb cottons, f.o.b., Minneapolis; pure medium \$5.80@5.90, and pure dark \$4.75@4.90. Four northwestern mills last week made 4.832 bbls, compared with 10,958 made by five mills, in the previous week. week.

Chicago.—There was no business to speak of in rye flour last week. Sales were widely scattered and in small amounts. Buyers are beginning to make inquiries again and showing a little more interest, which mill agents hope means an improvement in business after inven-tory. The local output totaled 1,800 bbls, against 2,000 the previous week. Mill asking prices, Dec. 28: patent white, \$6.20(6.35 bbl. jute; medium \$5.65@ \$5.85, dark \$4.30@4.60.

Duluth .-- With inquiry continuing light, Dutata.—With inquiry continuing light, trading in rye flour failed to improve. Shipping directions fair. Quotations, Dec. 28, f.o.b., mill, in 98-lb cottons: pure white, \$6.45 bbl; No. 2 straight, \$5.95; No. 3 dark, \$4.70; No. 5 blend, \$5.75; No. 8 rye, \$5.25.

St. Louis.—Fair sales were consum-mated last week. Quotations, Dec. 28, f.o.b., St. Louis, basis cotton 98's: pure white patent, \$6.75 bbl; medium, \$6.25; pure dark, \$5.25; ryc meal, \$5.50.

Baltimore.—Weak for the most part, but with a firm closing, the trade show-ing no interest except in the fluctuations of Chicago December rye, feeling sure the shorts will be made to suffer in that delivery yet. Numinal quotations, Dec. 28, in 98-lb cottons: top patent \$6.65@ 6.90 bbl, straight \$6@ 6.25 and dark \$4.80 @.5.05.

New York.—Business was quiet and buyers claimed to be uninterested until after Jan. 1. Quotation, Dec. 28, on white patent rye flour in jutes, \$6.65@ 6.90 bbl.

Pillsburgh.—Demand is light: trend downward. Quotations, Dec. 28: pure white \$6.50@7 bbl, medium \$5.75@6.25, dark \$4.50@4.75, cotton 98's, Pittsburgh.

Indianapolis.-Demand very poor, and trading is in small lots only. Little interest on part of consumers, even at con-

cessions. Quotations, Dec. 28: pure white flour, \$6.25@6.50 hbl, Indianapolis, basis 98-lb cottons; medium, \$6@6.25; dark, \$5 @5.10.

Boston. -Demand for flour limited Boston.—Demand for flour limited, buyers taking only small quantities for immediate needs. Prices are up about 15c. Car lots, 98-lb cottons: choice white patents, \$767.10; standard patents, \$6.75 @6.85; medium dark straights, \$6.20@ 6.30; medium light straights, \$6.50@ 6.60; pure dark rye, \$5.35@ 5.45; rye meal, \$5.70@ 5.80.

Buffalo.—While there was a steady de-mand for rye flour last week, it was of small proportions, with each grade hav-ing sales in different sections of this city. Quotations, Dec. 28, 98-1b cottons: light \$6,2566,6.50, dark \$1.40@4.60, medium \$5.75@ 6.

### Census Report on Flour and Feed Output

The Department of Commerce announces stallastics on wheat ground and wheat milling products by months. The figures for October are revised to include referrs received annee the preliminary bulletin for that month was issued. These returns include only mills which are now manufacturing at the rate of 5,000 or more barrels of flour annually. The 1,070 mills reporting in November (73 of which were idle) produced 93.9 per cent of the total wheat flour reported at the biennial census of manufactures, 1925. The 1,072 mills reporting in October produced 91 per cent of the flour reported in 1925. The wheat ground averaged 276.3 ibs per barrel of flour in November, 275.9 in October, 755.2 in September, 275.5 in August, 275.6 in July, 274.9 in June, 274.7 in May c74.5 in February, 274.2 in January, 273.5 in December, and 274.2 in November. ambe

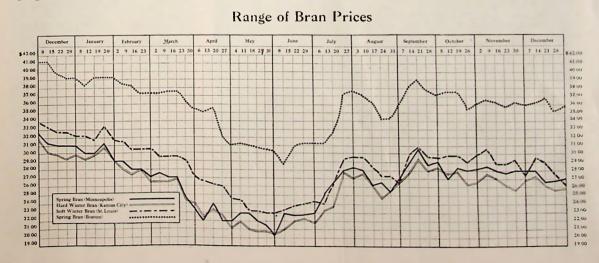

Nover The offal reported amounted to \$1.4 ibs per barrel of flour in November, \$0.8 in October, \$0.2 in September, 79.8 in August, \$0 in July, 79.5 in June, 79.5 in May, 79.1 in April, 78.8 in March, 79.4 in February, 79.1 in January, 78.5 in December, and 75.7 in November. WHE

# CORN PRODUCTS

New Orleans .- Demand slow; inquiry aiet; trend lower. Cream meal and aujet : grits, Dec. 28, \$2.35 per 100 lbs; stand-ard meal, \$2.22.

Memphis.—Buying still very light, but stocks are so small that purchases can-not he long deferred, as consumption is about normal. Cream, Dec. 28, was of-fered, in 24's, at \$4.15@4.40. Trade hopes to get booking around \$4, but mills of-fering nothing that cheap yet.

St. Louis.—Cream meal in cotton sacks was quoted. Dec. 28, at \$2.18 and stand-ard meal at \$2.08 per 100 lbs. Evonsville.—Demand continues brisk,

Evanstille.—Demand continues DISK, with no indications of immediate abate-ment. Prices are firm. Cream meal, Dec. 28, \$2.50 per 100 lbs, sacked, f.o.b., Evansville; hominy, flake, \$3.50, cracked, pearl and grits \$2.45.

Minneapolis .- On Dec. 31, yellow and white corn meals were quoted at \$4.50@ 1.60 per 200 lhs.

Indianapolis .- Demand limited; sales Indianapolis.— Demand limited; sales scattered and for small lots. Car lot buyers are scarce, and none is being sold for deferred shipment. Crean meal, Dec. 28, \$2.70@2.75 per 100 lbs.

Nashville.—Demand moderate; inquiry quiet; trend steady to shade casier; some buyers making inquiries, but not willing to take hold at prices asked. Degermi-nated cream meal, 96-lb bags, \$2,206 925 2.25

Pittsburgh. - Demand and inquiry Firstorrya. - Demond and inquiry light: trend slow. Quotation, Dec. 28, \$2.55@2.60 for kiln-dried yellow and white meal, in 400-lb lots.

Buffalo.—Grinders report improved demand for corn meal, with a ready sale for cracked corn. White or yellow hom-iny feeds were in fair demand last week. Quotations, Dec. 28; corn meal, \$2.45 per 100 lbs; hominy, white or yellow, \$39.50 ton; cracked corn, \$2.15 per 100 lbs.

Bultimore.—Corn meal, hominy and grits were steadier and slightly more salable, closing, Dec. 28, at \$2.266/2.31 per 100 lbs for meal, and \$2.386/2.40 for hominy and grits.

Philadelphia.—Offerings light and the market firmer, but trade quiet. Dec. 28, in 100-lb sacks: fancy kiln-dried meal, yellow \$2.55, white \$2.60; pearl hominy and write \$2.50 and grits, \$2.60.

Toronto.—Business in white corn flour was light last week. The price is un-changed. Quotation, Dec. 28, 87@7.50 bbl, in bags, car lots, delivered.

# BATMEAL

Toronto, Canadian cereal millers re-port that business could hardly be worse. American products are coming in quite freely. These are so much lower in price that, after paying duty, they still are considerably below Canadian values. Consequently, mills on this side are find-Consequently, mills on this side are find-ing little or no demand for their goods. Since a week ago the price has advanced 40e. Quotations, Dec. 28: rolled oats 87.60 hbl of 180 fbs, in 90-lb jute hags, mixed cars, less 10e bbl for cash; car fols, 87.50; oatmeal, in 98-lb jutes, 10 per cent over rolled oats. *Winnipeg.*—No improvement was seen in the sales of rolled oats or oatmeal last week: Canadian mills continue to have

week; Canadian mills continue to have a slack time, with imported supplies una stack time, with imported supplies un-derselling them. Quotations, Dec. 28; rolled oats in 80-lb bags, \$4 in Sas-katchewan, Alberta and British Colum-hia, and \$3.85 in Manitoba; oatmeal in 98-lb hags, 25 per cent over rolled oats.

Philadelphia .- Market firmer, but de *Thindeephan*—Market nrmer, but de-mand only moderate; supplies small. Dec. 28, \$3.09 per 100-lb sack. *Minneapolis*.—Rolled oats were quoted on Dec. 31 at \$2.37½ per 90 lbs.

Turkeys that would otherwise grade prime or choice are often jut into lower grades because they lack finish or have been carelessly dressed for market, says a bulletin of the North Dakota Agricultural College.

# The Trend in Flour Packaging

<text><text><text><text>

1927-28. The figures shown in Table No. 1 are based on reports from 75 mills, having a total capacity of 169,525 bbls per day. The mills are divided into four classes: group one, those below 1,000 bbls ca-pacity; group two, those between 1,000 and 2,500 bbls; group three, between 2,500 and 5,000 bbls; group four, above 5,000 bbls.

5,000 bbls. The data shown in Table No. 2 are based upon returns for 32 mills of the above group, which reported for four years. These mills represented a total capacity of 82.225 bbls per day. It is apparent that these percentages and totals are slightly too low for cotton, too high for jute, paper and wood, in about the ratio shown between the figures in Table No. 1 and Table No. 2, but this, of course, does not affect the rela-tive values of the figures in the second table. table

table. There is no competition in the flour industry between paper and jutes, but only between these two and cotton. From a period of high prices during and following war years, cotton has come into greater use during the past three years, yet it appears that its use largely is a question of price relationship, since there is fairly close correlation between cotton prices and the amount used. During the 1923-24 and 1925-26 crop Vears, cotton prices were high compared During the 1923-24 and 1925-26 erop years, cotton prices were high compared with jute, while in the next season low levels were reached, coinciding with high jute prices. In 1926-27 prices were ad-vancing, and in 1927-28 overaged still higher higher.

Increases in the buying of commercial baked products tend to create a greater demand for large sized coltons at the expense of paper chiefly, but use of the latter has been well maintained in smallacter has been well maintained in small-er sized packages. A fairly constant increase in the amount of cotton pack-ages used by mills below 2,000 bils ca-pacity is shown in the reports, a slight slump appearing in the 1927-28 figures, after a constant increase for the preced-ing four seasons ing four seasons.

### THE SITUATION IN JUTE

The "rising tide of jute," which is so alarming to cotton growers and manu-facturers in the United States, has ap-parently made little progress in flour packaging during the past five years. Price maladjustments during and follow-Price maladjustments during and follow-ing war years naturally favored the use of jute, but apparently there has been no great increase in recent sensons, al-though figures are obscured somewhat by price fluctuations and vicissitudes in the export flour trade.

Increased use of commercial baked products has helped to foster the use of jute and maintain totals in the face of declines in the export trade. Although the differences between the use of jute and the amount of flour exported would indicate a slight recession in jute pack-

# By Martin E. Newell

aging for the domestic trade since 1925, the decline is probably not as great as it seems, since there probably was much before 1925 than since. There is a very apparent tendency on the part of mills of a capacity below 2,000 bbls to sub-stitute cottons for jute, possibly the re-sult of a loss of export trade to larger companies and the increase in the use of smaller sized units. In analyzing the figures shown in the expected difference between the use of following season. It is probable that the percentage shown for jute in 1923-24 is slightly too low and that for paper too high, but even discounting this fac-tor, the gain in 1925 appears unusual. However, reports of the Department of Commerce show that imports of jute bags during 1925 were rather large, to-tor, the gain and by about 700,000 the imports of 1923.

Although the total amount of jute

6. June 1923-24 since those years, the favorable price relation between cotton and jute has not existed since. During 1924, cotton prices still were at a high level, the aftermath of the war time scarcity, while jute prices were low as usual. The decline, which began in that year, continued throughout 1925, while at the same time jute prices rose rapidly. This narrowing of the price differentials until near the end of 1925, after prices of jute "first marks" at London had almost doubled on crop damage reports. Within two years the fifterential on 140-1b jutes had risen from 15c bhl under to the basis, where it remained during most of 1926, a slight recession of 5c being made after prices began to return to normal again. This deficition of the price differential and the low export sales during that season. Cotton prices, after a long decline, rose rapidly in the early part of 1927, and 140-1b jutes were returned again to the basis in the federation decline, where the same of the start of the price were returned again to the basis in the federation decline, where the same of the start of the price were returned again to the basis in the federation decline, where the same of the start of the price were returned again to the basis in the federation decline, were start of the same th

they remained until 1928. At present they are only 5c under basis, still 10e above the level in the early part of 1924. Although there is a greater tendency to use paper for small sized packages in the flour milling industry, the in-crease in this respect has been practical-ly offset by the smaller amount of flour going into the family trade. Conse-quently, figures show a fairly constant character, the low point in the percent-ages coinciding with cheap cotton prices, which made substitution of the latter desirable. It is probable that the figures shown for 1924 are slightly too high. and that the difference should have been

shown for 1924 are slightly too high, and that the difference should have been credited to jute. There is a definite trend toward the use of more paper on the part of medium and smaller sized mills, and the advance is consistent in this class during the period under consideration. Nor has there been any material recession on the part of larger mills, except in the year 1925-26 when cotton prices were low. Although there is a fluctuation from year to year in the amount of flour packed in packages larger than 49 lbs, the figures are fairly constant. How-ever, there is a definite tendency among mills below 1,000 bbls in capacity to use a greater percentage of packages smaller than 49 lbs. Among all mills, there is an increase in the use of a larger variety of containers, the average number of size of containers, the average number of sizes reported rising steadily from 9.7 in 1923-24 to 11.03 in 1927-28.

# FLOUR BRANDS

The following list of trade-marks, pub-lished in the Official Gazotte of the United States Patent Office prior to registration, is reported to The Northwestorn Miller and trade-mark lawyers, Washington. D. C. Millers and flour dealers who feel that they would be damaged by the registration of any of these marks are permitted by law to flo, within 30 days after publication of the marks, a formal notice of opposition. AMERICAN HOUSE and red oval; Ameri-

and of these marks are permitted by law to file, which 30 days after publication of the marks, a formal notice of opposition.
AMERICAN HOUSE and red oval; Ameri-paste products, brenkfnast and household creats, such as farinn, oatmeal, corn meal, corn and all kinds of cereal dours. Uso claimed since Soft 2, 1929.
GOSS COUNTRY and airplane design; paste products, brenkfnast and household created and since soft 2, 1929.
GOSS COUNTRY and airplane design; paste products, break constant and house soft 2, 1929.
GOFAR and three ovals; Go-Far Cereal flux, Fargo, N. D.; self-rising panche four, buckwhat flux, ryo four, buckwhat flux, and corn meal. Use claimed since 1921.
HARCAT FIG-ETTS; Kadota Fig Prodences can be able to soft and three four and corn meal. Use claimed since figse claimed since 1927.
HARCAT FIG-ETTS; Kadota Fig Prodences const breakfast food.
MADOTA FIG-ETTS; Kadota Fig Prodences const breakfast food.
MALOW BLOOM and flore claimed since 1920.
MALOW BLOOM and flore and self-rising flour. Sy wheat flour and self-rising flour. Use claimed since August 1929.
MUNS OKAKS and three dusing stanmard whole wheat flour constant self for the soft flour. Use claimed since flour and self-rising flour. Use claimed and self-rising flour. Use claimed and self-rising flour. Use claimed since flours (Signer Hour and self-rising flour. Use claimed since flour, 1929.
The Char Milling Co, St. Louis; wheat flour design; flutflour use claimed since flours; wheat flour, the claimed flour. Use claimed since flours, the self flour fluing Co, st. Louis; wheat flour, the claimed flour, the claimed flour, the self four the claimed since flour.
The fluing Co, St. Louis; wheat flour flour the claimed since flour.
That and give flour fluing Co, st. Louis; wheat f

### **Convention** Calendar

Jan. 6-7.—Pennsylvania Bakers' Associa-tion, midycar convention at Harrisburg; C. C. Latus, 60 Methodist Building, Pittsburgh, sceratary: Jan. 8.—Southern Illinois Millors' Asso-clation, annual meeting at St. Louis; J. L. Grigg, Eagle Milling Co., Sparta, Ill., scc-retary.

Jan, 13-15.—Ohio Bakers' Association, an-nual convention at Columbus: George A. Daut, 361 East Dunedin Road, Columbus, secretary-manager.

Feb. 3.—Potomac States Bakers' Associa. tion, midwinter convention in Baltimore. Md: H. R. Thomas, 1226 Broadway, Balti-more, secretary.

### THE NORTHWESTERN MILLER

President of Millers' National Insurance Co. Relates Pioneer Milling Experience at Gathering of Former Neighbors

Gathering of Former Neighbors Milling experiences of pioneers days were recalled recently by Montgomery A. Reynolds, well known in the flour milling and insurance business for the past 50 years, as he presented a beautiful mortu-ary in Forest Hill Centery, Stanton, Mich., his former home. The presentation was the occasion for a banquet given Mr. Reynolds by his former neighbors. One of the early millers of Michigan, Mr. Reynolds began in the business in 1876, subsequently being associated with the industry as secretary of the Michigan Millers' Association, officer and claim ad-juster for the Millers' Mutual Fire Insur-ance Co., of which he was a charter mem-ber, correspondent for The Northwestern Miller, and one of the men who helped collect American flour for the relief of starving Russia.

\* When Mr. Reynolds first entered the milling industry in Stanton, he said in a talk at the banquet, he had no knowledge of the business. With William F. Turner he set out to build a mill which was then thought to be a long-felt need in Stan-ton. ton

"Mr. Turner," he recalled, "had once had an interest in a little gristuill, and my knowledge of the business was con-fined to taking a grist to a primitive mill, then old but still standing, on a moun-tain stream in the Catskills, and return-ing for it when the next thunder storm made it possible for the mill to grind. It is true that the demand for flour and feed in the rapidly extending lumber in-dustry was very large, but there was no grain grown near at hand and even at an impossible distance the supply was very limited. Then, too, the roads were most difficult, so that all raw material had to be imported for years until the prices we were able to pay developed a had to be imported for years until the prices we were able to pay developed a more liberal home supply, some of it coming as far as 20 miles. However, fools rush in where angels fear to tread, and we built a mill with two run of stone on wheat and one on feed, with a capac-ity of 50 bbls flour and 10 tons feed per day and put it in operation in January, 1877.

1877. "The changes in nilling methods then just beginning, which ultimately revolu-tionized flour making all over the world, we knew little about, and paid no atten-tion to. Mr. Turner retired from the firm in a short time and in less than two years I was forced to begin remodeling to meet the competition of mills with more modern equipment, and this con-tinued pieceneal from time to time, until finally the original equipment was prac-tically discarded and a full roller mill

tinued piecemeal from time to time, until finally the original equipment was prac-tically discarded and a full roller mill of 100 bbls capacity was substituted. "In the meantime the railroad was ex-tended north, the lumber business, which like mining does not reproduce itself, fast became less, curtailing the home market, while the increased capacity of the mill forced an attempt to try for business in outside markets, which with the handi-cap of having to import wheat, was doomed to failure. Always doing busi-ness largely on borrowed money, at rates that would kill any legitimate business except a gold mine, the changes made not only absorbed all the prolit of the more prosperous years but compelled the borrowing of more. After carrying the load until my health was becoming im-paired through worry and anxiety, the time came when I could see that the chances of success were overwhelmingly against the venture, and being unwilling to impose longer upon the confidence of my creditors I called them together and they accepted the property for what I ignified the control of the new proceeding of the second they accepted the property for what I owed and the business was reorganized as the Stanton Milling Co. with me as manager at \$1,000 per year. The first year the heavy interest item theretofore paid being retained in the business, a profit of close to 10 per cent was shown but no dividend declared. "By this time the lumber business tributary to the town almost entirely ceased and the long continued slump commenced, which only ended after long years slowly transformed the cutover stump lands into the beautiful farms that now surround

Stanton. To add to these adverse con-ditions the completion and operation of the east and west railroad six miles south, and the establishment of a grain market at Carson City, cut off entirely the source of the best local supply of wheat, and at the end of the second year it was painfully apparent that if the mill was the come anywhere near breaking

it was painfully apparent that if the mill was to come anywhere near breaking even, the operating miller must also be the manager and I so informed the stock-holders and voluntarily relieved them of the necessity of keeping me." Forty years of age, with practically nothing in the world and some of the best years of his life behind him with little to show for them, Mr. Reynolds be-gan looking about. The Michigan Mill-ers' Association was just then forming, consisting for a time only of a voluntary organization growing out of litigation re-sisting the demands of the owners of cer-tain patents on milling appliances. The lawsuit having been settled by a comprotain patents on milling appliances. The lawsuit having been settled by a compro-

An Old Woodcut Showing Stanton Flouring Mills in the Seventies—Courtesy of the Clipper-Herald, Stanton, Mich.

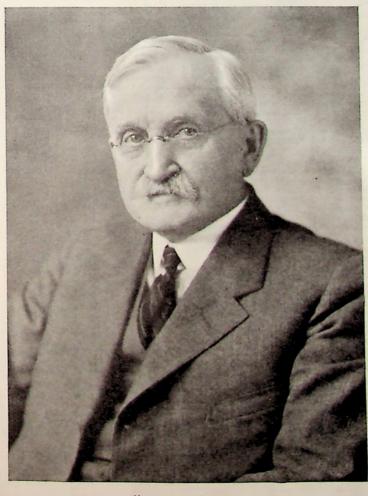

mise, there was little to keep such state associations active. Among the dreamers who saw the ultimate possibilities of such organizations, however, was Mr. Rey-nolds, and he bent his entire energies to the upbuilding of the association in

Michigan. In 1895 Mr. Reynolds closed his suc-cessful work with the association and left

his many friends in Michigan to take up his residence in Chicago, where he has lived since. There he confined his work to insurance, being the adjuster for 10 different millers' and grain dealers' mu-tual insurance companies at one time or another in the ensuing 11 years. During that time he covered the country from the Hudson River to the Rocky Moun-tains and from the Canadian provinces to the Gulf of Mexico, winning a host of friends and making himself one of the best known men in the trade. He has paid out over \$6,000,000 of insurance money, and has the distinction of being probably the only man who has devoted his entire time to the settlement of one class of losses.

class of losses. In 1906, upon the resignation of the secretary of the Millers' National Insur-ance Co., Mr. Reynolds was elected to that position, which he held for 21 years. At the end of that time, he decided to retire from active business, and in Janu-ary, 1928, was elected president of the form firm

Mr. Reynolds attributes his success to hard work, and although he at first con-

Montgomery A. Reynolds

A Glimpse of the Handsome Mortuary That Is Mr. Reynolds' Gift to Stanton

sidered the years spent in milling as somewhat of a loss, it became apparent ultimately that this work was the basis for his later accomplishments in the insurance business. Married at 25 and bereaved at 30, Mr.

Married at 25 and bereaved at 30, Mr. Reynolds was again married at the age of 33 only to lose his second wife when he was 45 years old. He has two daugh-ters by his first wife. The Stanton mortuary is to be known as the Reynolds Memorial. It is con-structed over a foundation of cement with re-enforcements of steel. The ex-terior walls are of rug texture buff brick, trimmed with Indiana limestone, present-ing a permanent, artful appearance. A door of black steel with large columns on either side beautifies the front. The flooring of the interior is of Chero-kee Georgia marble, with sand rubbed finish, while the walls, ceiling and crypt front are of mezzotint Georgia marble, a clouded stone. The interior ornaments are of hronze.

000

EXPANDENCY IN THE SECOND SE

and clears are reported sold for fair quality flour at about \$6.

Quality nour at about 56. Quotations, per bbl, car lots, 98-lb cotton: spring special patents \$86.8.40, short patents \$7.256.8, standard patents \$6.906.7.50; first clears, \$5.706.6.30; hard winter patents \$6.556.7, soft winter pat-ents \$6.756.7.50, straights \$6.406.7, clears \$66.6.51 \$66 6 10

### PHILADELPHIA

There was not much change to note in the flour market last week. The inter-vention of the holidays and period of inventories has resulted in extreme inactivity. Apparently the larger johbers and hakers are well supplied for near wants and show little interest in the mar-ket. This condition is true all along the ket. This condition is true all along the line and the little business being done is largely in a small way to cover imme-diate needs. Quotations, Dec. 28, basis 140-lb jutes: spring first patent \$7.256 7.75 bbl, standard patent \$6.856 7.25, first clear \$6.106.6.35; bard winter short patent \$7.256 7.75, 95 per cent \$6.756 7.25; soft winter straight \$5.756 6.65.

### SON OF FLOUR BROKER ELOPES

SON OF FLOUR BROKER ELOPES PITTSBUEGH, PA.—Harry C. May, Jr., son of a prominent Pittsburgh flour bro-ker, eloped with Betty Lewis, daughter of J. E. Lewis, president of the Harhi-son-Walker Refractories Co., it was re-vealed here last week. Both are still in school, Miss Lewis being only 16 years old. They are living at the homes of their respective parents at present, but plan a honeymoon to Atlantic City soon.

LLOYD CASE ELECTED MILL HEAD The board of directors for the Mont-rose (Colo.) Flour Milling Co. has an-nounced the appointment of Lloyd Case as manager. Mr. Case succeeds R. E. Dienner, the appointment taking effect as of the beginning of December. He has been connected with the uill only since hast summer. last summer.

### Wheat Prices Up Again

A BULLISH official Argentine crop estimate, big advances in foreign markets and an improved export demand, together with further buying in response to the farm board's recent move to support prices, caused wheat futures to continue the advance which started in the preceding week.

Closing prices at leading markets closed the year near the high levels, up about 56 6c for the week. In a little less than two weeks the market has risen about 10@ 12c.

The government's farm board was not a direct factor in the market last week, as prices ruled well above the level authorized for purchases. At the same time storage space is being arranged and should prices recede the various co-operatives are expected to be ready to enter the market.

The farm board's policy, as outlined by a member of the board of managers, is more reassuring to grain interests than earlier announcement. The Farmers' National Grain Corporation, the new agency created by the board, is establishing offices at all the principal terminal markets and will engage in business along much the same lines as the private grain firms, both as to the purchase of grain and merchandising.

The attitude of the board towards the futures market is favorable as evidenced by the fact that the several agencies will be instructed to hedge their cash purchases in the futures market unless the price of wheat is thought to be low enough to make hedges unnecessary.

Earlier fears of the effect of cheap loans to co-operatives by the farm board were mostly dispelled by the announcement that the minimum loan rate was to be 5 per cent, a rate that is high enough under normal money conditions to be met by banks.

The farm board apparently hopes that its mere presence in the market will be sufficient to keep prices above the pegged level, but if prices turn down it is prepared to absorb the wheat. Chiefly through statistical reviews by the Department of Agriculture confidence has been strengthened in an expanding export demand the second half of the crop season, and, if this develops, the farm board will find itself with little to do. If foreigners do not find it necessary to pay prices now prevailing in the United States, the board evidently will buy the wheat and resell it at a loss.

The decrease in domestic visible supplies, as reported on Dec. 30, was larger than expected and resulted in further strengthening the market. The loss was 3,049,000 bus, compared with a gain of 1,336,000 a year ago. The total now is 178,107,000 bus, compared with 138,743,000 a year ago.

### WHEAT

WHEAT Chicago.-Receipts 28 cars, compared with 33 the previous week and 151 a year ago. Fair shipping demand. Up-turn in futures fully reflected in cash situation, with previous week's premiums and discounts largely maintained. Mills reported small four sales and demand extremely light. Quotations, Dec 28: red winter, No. 1667e over December price, No. 2 5666 over, No. 3 465c over; hard winter, No. 1 11/2624/c over, No. 2 162 cover, No. 3 11/2624/c over, No. 2 162 cover, No. 3 11/262/c over, No. 2 1c under to 1c over; dark northern, No. 1 262/c over.

No. 1 2@21/c over. Minneapoliz.—Premiums sharply high-er due to lighter receipts. The posted arrivals Dec. 30, for two days, were only 130 cars of spring, winter and durum. Consignees no longer must hunt buyers; the latter early each day endeavor to find the wheat they want. Top grades are in best request and show the big-gest advance. For country arrivals, 15 per cent protein, 1c under to 1c over May is asked; 14 per cent, 2c under to 1c over; 13 per cent, 3c under to May price; 11 per cent, 4c under to May price; 11 per cent, 5@3c under. No. 1 amher closed on Dec. 31 at \$1.141/a 1.80%, and No. 1 durum \$1.131/a[1.141/a].

Winnipeg.-Some business done in high wanneg.—Some business done in high grades last week, but plentiful supplies at seaboard and in eastern position are taking care of immediate export demand. Offerings firmly held, and spreads firm. No. 1 northern was quoted, Dec. 28, at \$1.40% hu, basis in store Fort William or Port Arthur.

Duluth .- The May contract has become Duluth.—The May contract has become the leader in interest as well as trading. Market influence mostly bullish, with prices scoring a substantial advance. Close, Dec. 28: May spring, \$1.361/2 bu; durun, \$1.25%. Export inquiry poor. Cash market reflected the improvement in the futures. Durum offerings met about equal interest from mills and ele-vators. Selection of mills included am-ber and mixed durum. Spring wheat of top quality met sale to mills at firmer price. Meager receipts and offerings made it difficult to fill huyers' needs. No. 1 dark northern closed, Dec. 28, at \$1.32(21.36; No. 1 northern spring, \$1.31 (21.33; No. 1 amber durum, \$1.1934(@ 1.27%; No. 2 durum, \$1.1974(@1.21%; No. 2 mixed, \$1.133%(@1.22%; No. 2 red, \$1.133(@1.143%). about equal interest from mills and ele-\$1.13% @ 1.14%.

Toledo.-Receipts have increased. Toledo.—Receipts have increased. Some wheat is now coming out of Mich-igan, which has been dried up as a source of supply for a long time. Basis of bid-ding working higher, and is now 7c under Chicago May. The bid for No. 2 red,  $28\frac{1}{2}$ c rate points to New York, on Dec. 27, was \$1.27% bu.

Kansas City,-Buying has been fairly general all week, with mills taking quan-tities of medium low protein as a rule, the higher strength offerings going to shippers and other interests. Contraeshippers and other interests. Contrac-tion in receipts served as a fair stimulus to demand. Trading basis has been ir-regular, in sympathy with nervous fluctua-tions in futures. Quotations, Dec. 28: dark hard winter wheat, No. 1 \$1.25@ 1.40 hu, No. 2 \$1.2461.39, No. 3 \$1.23 @1.36, No. 4 \$1.22@1.32; hard, No. 1 \$1.2461.39, No. 2 \$1.2361.38, No. 3 \$1.22@1.35, No. 4, \$1.21@1.31.

St. Louis .- Demand for soft wheat is St. Louis.—Demand for soft wheat is limited on selections offered. Market Is lightly supplied, and there was little good wheat on tables, offerings generally being of the thin, dark type, for which demand is limited. Offerings of hard wheat light, with a fair demand from local mills, which took practically all of-ferings. Cash prices, Dec. 28: No. 2 red. \$1.38 bu; No. 2 hard, \$1.29; No. 3 hard, \$1.284. \$1.281/

Nashville. -Demand and inquiry fair; trend unsettled and upward; movement has shown increase latter part of December. Receipts for 10 days 66 cars, against 18 last year; shipments 37 cars this year, against 24 last; stocks 628,000 bus, against 441,000 the previous week and 689,000 last year. No. 2 red, with billing, \$1.43@1.48 hu.

billing, \$1.43@.1.48 bu. Portland.—The market had a strong upturn when the Argentine estimate was given out, but the latter part of the week was very quiet. With the bulge of Dec. 24, Portland exporters were able to sell two full eargoes to the United Kingdom, one for January and the other for Feb-ruary loading. In addition, parcel lots aggregating 1,500 tons were sold to Eu-rope. Cash wheat quotations at the close of the week: Big Bend bluestem, \$1.36 but, soft white and western white, \$1.24; bard whete, porthern spring and west bu; soft white and western white, \$1.24; hard winter, northern spring and west-ern red, \$1.22½. Futures closed: De-cember, \$1.23¼; March, \$1.28¾; May, \$1.31; July, \$1.31½.

\$1.31; July, \$1.31½. Scattle.—Country stocks of wheat are very large for the time of year, hut the movement is extremely light, as farmers are holding above the market, being gen-erally convinced that the activities of the Federal Farm Board will increase prices. Foreign business continues negligible and milling demand is moderate. Quotations, sacked, coast, basis No. 1, 30-day deliv-ery, Dec. 27: white wheats, \$1.27 bu; hard winter, northern spring and western red, \$1.26; Big Bend bluestern, \$1.39.

Ogden.—Very little wheat remains on farms in Utah and southern Idaho, estifarms in Utah and southern Idaho, esti-mates being that from 20 to 25 per cent of the 1929 crop is on hand. Some of this is being held for seed, and much is being used for feed. Although farmers are declining to sell wheat, they have moved it to country and terminal ele-vators. Grain receipts are less than 10 cars daily average. Prices advanced 3c during the week, offsetting declines of similar amounts the week before. Quo-tations, Dec. 28: No. 2 soft while \$1.02 @1.13 hu, No. 2 northern spring \$7c@ \$1.03, No. 2 hard winter \$7c@\$1.03, No. 2 dark hard 90@99c, milling in transit billing, freight paid to Ogden.

Indianapolis .- Arrivals are very light, owing to adverse weather; demand fair to good for top grades; little inquiry from East or South. Dec. 28, No. 2 red winter 10c under Chicago May, Illinois hacie

Milwaukee.—Only one car of red du-rum was received last week, largely due to weather conditions. Considerable consignments of southwestern wheat are ex-pected to arrive. No. 1 northern, Dec. 28, was quotable the same as Chicago December to 5c over, according to pro-

Buffalo.—An occasional car came in and was applied on old sales to mixers. Stock in store moved slowly, with prac-tically all now here owned by the mills.

Baltimore .- Cash wheat 5% @7%c higher. Export demand woke up and resulted in some sales of domestic wheat for January shipment. Stocks decreased resulted in some sales of domestic wheat for January shipment. Stocks decreased 98,512 bus. Prices, Dec. 28: spot No. 2 red winter, \$1.31 bu; spot No. 2 red win-ter, garlicky, domestic, \$1.28½; Decem-ber, \$1.28½; January, \$1.28½; Decem-ber, \$1.28½; January, \$1.28½. Range of No. 2 red winter for weck, \$1.246 1.81; range of contract grade for weck, \$1.22½@1.28½. Exports, 114,063 bus, all Canadian. Canadian receipts for weck, 98,049 bus. Stocks, 8,881,878 bus, includ-ing 4,013,735 Canadian.

Philadelphia.—Irregular during week, but closed firm at net advance of 5½e; trading quiet. Dec. 28, No. 2 red win-ter, \$1.27½@1.30½ bu.

ter, \$1.27/2@1.30½ bu. New York.—Prices were firmer, based on a bullish report of the Department of Agriculture. Export business was very dull, and weather forecasts were also benrish. Quotations on cash grain, Dec. 27: No. 2 red, c.i.f., domestic, \$1.47 bu; No. 1 northern spring, c.i.f., domes-tic, \$1.54; No. 2 hard winter, f.o.b., ex-port, \$1.37; No. 2 northern Manitoba (in bond), f.o.b., export, \$1.55½; No. 2 an-ber durum f.o.b. New York \$1.37 ber durum, f.o.b., New York, \$1.37.

Toronto.—Severe storms and deep snow in the country have brought deliv-eries of winter wheat almost to a standstill. However, there is plenty in store at mills and in country warehouses to take care of the requirements of the trade, and for the most part mills are oversupplied in relation to the volume of business they have been doing lately. Prices have not changed. Quotations, Dec. 28: good milling grades \$1.28 hu, car lots, track, country points; wagon lots at mill doors, \$1.20@1.25. Western spring has advanced 8% c since a week ago. No. 1 northern is quoted at \$1.45% hu, ci.f., Bay ports; No. 2, \$1.43%.

### CORN

Rather neglected throughout the week, corn futures failed to be influenced much by the advance in wheat and prices sagged. The December future dropped toward the close due to heavy deliveries on contracts. Weather conditions continue to hamper primary movement, and receipts were about the same as in the previous week and much below a year ago. Shipments were lower than in the

New Orleans.—Demand quiet; inquiry slow; trend steady. Quotations, Dec. 28: No. 2 yellow \$1.13 hu, No. 3 \$1.11; No. 2 white \$1.13, No. 3 \$1.11.

Nashville.—Demand fair; trend irregular, with narrow range; rain and snow have delayed movement from farms, and offerings show much moisture, causing low grading. Receipts for 10 days 57 cars, against 61 last year; shipments 41 cars, against 42 last year; stocks 39,000 bus, against 91,000 last year. No. 2 white, \$1.01@1.03 bu; No. 2 yellow, \$1.01 @1.03.

Kansas City.—Demand for cash corn has held good throughout the week, although, on most days, supplies were ample. Mixed corn has been rather weak. Quotations, Dec. 28: white corn, No. 2 84 @66c hu, No. 3 82@83c, No. 4 79@81c; yellow corn, No. 2 85@86c, No. 3 83@84c, No. 4 79@81c; mixed corn, No. 2 83@ 85c, No. 3 81@83c, No. 4 77@79c.

85c, No. 3 81@83c, No. 4 77@79c. St. Louis.—Elevator interests were fair buyers of yellow corn, and there was a pretty good shipping demand for both yellow and white. Cash prices, Dec. 28: No. 4 corn, 82½@83c bu; No. 2 yellow 89c, No. 3 yellow 85c, No. 4 yellow 83@83½cc, No. 5 yellow 81@81½cc, No. 6 yellow 78½@79c; No. 3 white 88@89c, No. 5 white 81@82½c, No. 6 white 80c. Torowills. Descripte of new continue

Evansville.—Receipts of new continue heavy, with considerable of the crop still in the fields. Prices are firm at 63c bu.

Minneapolis.—Heavy receipts at all western terminals softening prices. Demand indifferent. No. 3 yellow, Dec. 30, 15@13c bu under Chicago May; No. 4 yellow, 20@18c under; No. 5 yellow, 25@21c under; No. 6 yellow, 28@26c under.

Chicago.—Receipts 1,048 cars, compared with 725 the previous week and 1,591 a year ago. Light shipping demand; less than 250,000 bus reported taken. "To arrive" bookings picked up somewhat. Discounts on all grades, choice and lower, still being well maintained. Quotations, Dec. 28: mixed, No. 3 86@8601/4 bu, No. 4 82c, No. 5 78/2@ 80c; yellow, No. 3 86c, No. 4 82@831/2c, No. 5 79@82/2c, No. 6 78/2@791/2c; white, No. 4 83c, No. 5 82c, No. 6 80c; sample grade, 76@78c.

Pittsburgh. — Demand and inquiry slow; trend downward. Quotations, Dec. 28: No. 2 yellow, shelled, 971/2@98c. bu; No. 3 yellow, shelled, 971/2@98c.

Buffalo.—There were larger rail receipts last week, with an active demand from grinders for the lower grades. A few cars of No. 2 and No. 3 yellow were held above buyers' views.

Baltimore. — Corn ruled firm but worked off at the close. Arrivals were 12,028 bus, including 1,442 new southern. No sales reported, domestic or ex-

port. Closing prices, Dec. 28: domestic new No. 2 kiln-dried yellow, track, \$1.06 @1.07 bu, No. 3 \$1.05@1.06; new cob corn, \$4.60@4.75 bbl for car lots of prime yellow on spot.

Toronto.—Buyers of American corn are fairly well booked for future requirements, and sales are falling off. Prices are holding steady. Quotations, Dec. 28: No. 3 American yellow corn \$1.10 bu, delivered, Toronto; Argentine corn \$1.10 bu, track, Bay ports.

Mitwaukee, —Corn shared the greater part of activity with oats, and snowstorms had but little effect on arrivals, which compared favorably with other recent weeks. Mills, as usual, were heavy buyers of yellow corn, which usually graded No. 4 or better. No. 4 yellow, Dec. 25, 11¼@8½c under Chicago December; No. 4 white, 9@8c under.

Indianapolis,--Demand good; arrivals limited, owing to adverse weather; inquiries from East and South better. Some few scattered cars of old corn selling at premium. Quotations, Dec. 28: old No. 2 yellow sold at 5e under Chicago May and new No. 6 yellow 21e under. Sample yellow selling on its merits. Sales made on Illinois basis.

Boston.—Demand for grains has been slow. Open weather has militated against heavy buying for feed purposes. Allrail: No. 2 yellow, \$1.13@1.14; No. 3 yellow, \$1.10@1.12; small quantities lakeand-rail about \$1.11@1.12.

### OATS

Trading in oats was narrow last week and little change was shown in futures prices. Receipts at primary markets totaled 1,133,000 bus, compared with 1,-620,000 in the previous week and 1,859,-000, compared with 1,574,000 in the previous week and 1,394,000 a year ago. The visible supply declined 393,000 bus according to the report of the Chicago Board of Trade on Dec. 28, making the total visible 27,350,000, compared with 13,968,000 a year ago. Export business is poor.

Minneapolis.—Demand somewhat improved. Prices gained slightly on futures compared with a week ago. No. 2 white, Dec. 30, 431/4@441/ac bu.

Duluth.—Better tone to market, with ready absorption of the light table offerings by elevator interests. Only slight evidence of feeding demand, with no shipping interest noted. A good share of the arrivals go into store under contract, and are not coming out for sale. Spot No. 3 white was quoted at 5c under Chicago May delivery, closing Dec. 28 at 44% c bu.

Winnipeg.—A fair domestic business was done last week, and prices held steady. No. 2 Canadian western were quoted, Dec. 28, at 64% c hu, basis in store Fort William or Port Arthur.

Chicago.—Arrivals 146 cars, compared with 115 the previous week and 249 a year ago. Fair shipping demand. Quotations, Dec. 28: white, No. 2, 47c bu; No. 3, 46c.

Buffalo.-Only five or six cars arrived

here daily, with buyers slow to take hold at holders' prices.

Baltimore.—In good supply, but steady and slow, closing, Dec. 28, spot No. 2 white, domestic, 55@55½c bu; spot No. 3 white, domestic, 55@55½c.

Evansville. - Demand dull; prices steady. Quotation, Dec. 28, 60c hu.

Pittsburgh.—Demand slow; inquiry light. Quotation, Dec. 28: No. 2 white, 54@541/2c hu; No. 3 white, 52@53c.

Nashville. — Demand light; inquiry quiet; trend about unchanged; receipts for 10 days 51 cars this year, against 88 last year; shipments 62 cars, same as last year; stocks, 649,000 bus, against 876,000 last year. No. 3 white, 53@54c bu.

Philadelphia.—Alternately higher and lower, closing at net advance of lc. Dec. 28, No. 2 white, 56%@61%c bu.

Boston.—Demand in New England last week was exceedingly moderate. All-raili faney 40@42-lb, 63@65c; regular 38@ 40-lb, 59@60c; regular 36@38-lh, 58@ 59c; regular 34@36-lb, 56@57c.

Milwaukee.—Arrivals of oats were large, and mostly went into local storage. No. 4 white, Dec. 28, 1c under Chicago December.

Indianapolis. — Receipts light; improved demand from East and South; mixers buying freer; advices on shipments very light. Dec. 28, No. 2 white, 4@4½c under Chicago May, Illinois basis.

Toronto.—Business in oats is light. These are scarce and dear. Quotations, Dec. 28: No. 1 western feed oats, 65c bu, track, Bay ports; No. 2 feed,  $62\frac{1}{2}$ c. Ontario oats are quoted nominally at 60c, shipping points.

### RYE

Fluctuating with wheat, rye futures did not follow the advances fully and showed a slight net loss for the week. There was no particularly encouraging news for holders, except the bullish wheat statistics, which should stimulate export demand for rye. Liberal delivcries on December contracts at Chicago failed to affect the market very much. The visible supply increased 1,663,000 bus according to the report of the Chicago Board of Trade on Dec. 28, making the total visible 12,629,000, compared with 6,159,000 a year ago.

Minneapolis. -- Elevator buyers purchasing; millers indifferent. Prices off 1@2c compared with a week ago. No. 2 rye, Dec. 30, 96@98c hu.

Chicago.—Receipts 1.185 cars, compared with 803 cars the previous week and 48 a year ago. Considerable being loaded into boats for winter storage. Very little of daily run offered for sale, being largely from other terminals. Quotation, Dec. 28, No. 2, 1@ ½e under December price.

Milwaukee. — Rye receipts continue low, but demand was not great from near-by mills. No. 2, Dec. 28, 5@ 6c under Chicago December.

Duluth.—Futures generally are firmer, while the cash market indicated an easier tone, due to increased offerings. Basis

on the ordinary was lowered 1c, choice holding firm and unchanged. Not much interest in ergoted, and sale very slow. Buyers stiffened the penalty before taking any stuff. No. 1 and No. 2 2604c under May, which closed Dec. 28 at  $$1.001_2$  hu. December finished at  $974_2$ c. Good rail movement on contracts continues to Chicago.

Winnipeg.—No export interest in rye, and trading last week was small in volume and without feature. No. 2 Canadian western was quoted, Dec. 28, at 943c bu, basis in store Fort William or Port Arthur.

Buffalo.-Scarcely any demand, with no rail receipts and plenty in store.

### BARLEY

Barley futures followed wheat upward, were dull and featureless last week, with the tendency easy. Export demand is small, while Black Sea shipments continue rather heavy. There is a good call for malting quality, but feed grades are sluggish. A decrease of 32,000 hus in the visible supply was reported by the Chicago Board of Trade on Dec. 28, making the total visible 9,819,000 hus, compared with 6,159,000 a year ago. No news of importance.

Minneapolis.—Offerings rather light. Demand good for malting quality. Prices higher. Quotation, Dec. 30: 52@61c hu.

Dulath.—Demand for malting offerings is holding the market at top prices, but buyers are not so keen for other grades, with the result that the price range was reduced 1c. Buyers are getting filled up, and an easier tone in other markets forced the concession. Light receipts restrict trade, which also tends to a quiet market. Close, Dec. 28, depending on quality, 50% 59e bu. Car shipping operations light.

Winnipeg.--Some domestic sales to castern Canada constituted the only barley business last week. Export demand remains dormant. No. 3 Canadian western was quoted, Dec. 28, at 61% c hu, basis in store Fort William or Port Arthur.

Chicaga.—Receipts 41 cars, compared with 50 the previous week, 92 a year ago. Malting quality scarce. Feeding types slightly casier. Quotation, Dec. 28, 59 @68e bu.

Toronto.—Very little Ontario harley is offering. A good demand exists for western feeding barley, and this is about the most active of the feeding grains. Prices are unchanged. Quotations, Dec. 28: Ontario barley 76 bu, delivered, Toronto; western feeding barley \$27629 ton, c.i.f., Bay ports, according to grades.

Milwaukee.—Barley arrivals continue heavy from Wisconsin shipping points and the Northwest. Large quantities were bought for local mattsters. Special No. 2, Dec. 28, 646 666 bu.

Buffalo. — An occasional car here which buyers were unwilling to pay the price for.

### BUCKWHEAT

Toronto.--Supplies of Ontario buckwheat seem to have been all sold, and there is now little moving. Prices are unchanged. Quotation, Dec. 28, 856 90e bu, shipping points, according to freights.

Buffalo.—A few cars sold last week at \$2.30 per 100 lbs; demand limited, and offerings light.

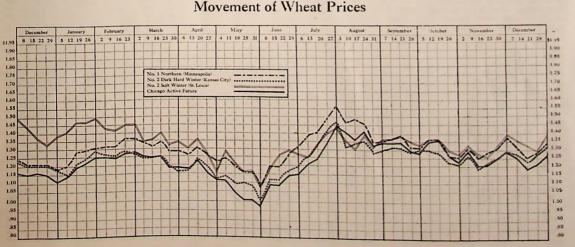

### BUCKWHEAT FLOUR

Pittsburgh.—Demand slow; inquiry light; trend dull. Quotation, Dec. 28, 83.756–4.25 bbl in 100-lb lots, f.o.b., Pittsburgh.

Philadelphia. — Firm, with offerings light, but trade seasonably quiet. Dec. 28, \$4.25 per 95-lb cotton sack.

### FEED CONTROL OFFICIALS' BOOK

A booklet containing the announcements of the Association of American Feed Control Officials, including definitions, standards and regulations that have thus far been adopted by the association, is now available at the nominal cost of 20c, according to an announcement by L. E. Bopst, secretary-treasurer. The address of the secretary's office is College Park, Md.

# PLEASE PASS THE AJINOMOTO

<text><text><text><text><text>

THE NORTHWESTERN MILLER

Alle NORTHWE prove an excellent cocktail ingredient? If its flavor and aroma are so overpow-ering as we are led to believe, they might prove an excellent solution to the ever present problem of "how can we hide the taste of this damawful stuff?" All in all it seems as though Mr. Su-suki and his band of goodfellows who are the manufacturers of Ajinomoto have hit upon something which is going to make life a whole lot pleasanter for all of us and at the same time help get rid of the wheat that no one wants. As I said before, "Please pass the Aji-nomoto". But wait a minute--1 don't feel very well just now and I'm afraid I can't face anything beefy that smells of cheese. Just throw it out to Rover, he's a good dog and not very particular about what he cats.

### Just Too Sweet for Anything

Just Too Sweet for Anything A dispatch from London tells of an exhibition sponsored by the New Health Society of England, the group in which Sir William Arbuthnot Lane is so active. This society, in addition to trying to revolutionize the eating habits of the stolid Britisher by turning him from white bread to branny bread, is lending its support to the equally ridiculous cause of "More Sensible Styles for Men." Although the London exhibit displays a transparent man in which an uncanny device enables one to study the internal

device enables one to study the internal organs as one would who was gifted with X-ray eyes, the gem of the show must be the male mannequins who are

with x-ray eyes, the gen of the show must be the male mannequins who are displaying the society's suggestions in the way of clothes for men. "The mannequins," asys the dispatch, "walk about wearing shorts, sleeveless coats, blouses, waterproof hats and the latest style in evening dress. This con-sists of a sleeveless tunic which may be made of black silk, or, if you prefer, of mauve, salmon-pink, spinach-green, or blush-red cloth, with silk stockings to match, and a white or silver-gray silk shirt with a 'Byron' neck, finished off with a large black how." Oh, sweet Sir William, your clothes sound just too darling!

### The Great Argentine Wheat Mystery

(Continued from page 26.) able. Wheat not disposed of at local shipping point is usually sold f.o.b. cars at the port (river or sea), so that the responsibility of the grower ceases there. Most of the grain is desacked at the ports, and 85 per cent of wheat is exported in bulk, with usual-ly not more than 15 per cent finding its way oversea in hugs.

way oversea in bags. The total elevator capacity of Argen The total elevator capacity of Argen-tina at the end of November, 1929, was 12,750,000 bus, of which 9,250,000 were accounted for by terminal elevators and the balance by 28 country elevators, most-ly owned by millers. The flat warehouses at railway stations are limited and of lit-tle account during the harvest season.

Charges accruing against grain on its way from the farm to market are shown bereunder. These do not take into ac-count any interest on loans, premiums on deferred sales, or other semiavoidable expenses.

Total, per bu ....

32.25

Arranged in order of comparative values, the types of the Buenos Aires exchange are:

(1) Brazil, with a basic weight of 80 kilos per hectolitre (62.1 lbs bu). (2) Wheat base 78 kilos (60.5 lbs per

bu). (3) Bahia Blanca or Trigo de Pan type, base 80 kilos (62.1 lbs per bu).

(4) Buenos Aires type, base 73 kilos (56.6 lbs per bu).

These basic weights may be varied from season to season by the Camaras. The Brazil type is the finest type grown, but seldom finds its way to Europe, being used in the home market or for export to Brazil and Paraguay.

or for export to Brazil and Paraguay. Standards of quality are made up at Buenos Aires and Rosario on Feb. 15 and March 15 of each year from samples submitted daily by exporters from all deliveries received by them. These form the basis of all f.a.q. (fair average qual-ity) settlements on this side. No pre-mium is paid by the buyer for superior-ity over the f.a.q. In the case of new wheat sold at an agreed price before the dates for making up the f.a.q. samples,

It over the fact, that, in the case of new wheat sold at an agreed price before the dates for making up the f.a.q. samples, 96 per cent is paid on delivery and the balance held for adjustment after the standards have been fixed. In the case of exported wheat, samples are made up in London of all shipments received each month. These form the standard for that month, and all settle-ments are made on the conglomerate sample. The system is slow and cumber-some, and settlements much delayed. Ex-porters mix the wheat to a low standard, and the London f.a.q. sample is usually of low grade, but the same is becoming true of farmers' shipments, as under the present system the grower has little in-ducement to aim at growing high quality wheat, and aims at quantity rather than quality. quality.

The farmer, in selling his wheat, can either sell outright or on a "fixing price" contract. In the first case he receives

96 per cent of the price of the day at the local point, with an adjustment after the standard has been set and a comparison made. In the second case he is given a substantial advance, and has the privi-lege of making a sale on any date he may select during the period named in the contract, prohably two or three months. In this case he pays interest on the amount of the advance at the rate of  $7\frac{1}{2}$ per cent plus 10 centaves or more per amount of the advance at the rate of F per cent, plus 10 centavos or more per quintal premium. If at the end of the period specified he still prefers to wait before making the sale, he can extend the "fixation" period on paying a renewed

before making the sale, he can extend the "fixation" period on paying a renewed premium. While there is some advantage to the farmer in not being compelled to sell his grain outright, this is usually nullified by his holding it too long and running up interest and premiums which cat up what he might have gained. In the meantime his wheat has been delivered, exported and probably milled before he makes his sale, and the money received for his wheat by the exporter, less the amount of the advance to the farmer, may have been turned over several times. It is not a good system, but since there is no pub-lic storage in which the farmer may place his grain and use it as a basis of horrow-ing money from the banks, and unless he sells outright and buys futures, the fixing price contract is the only plan by which he may hope to get the advantage of a rising market, and at the same time se-cure funds for his current needs. Probably one of the worst features of the Argentine rural life is the fact that only about 20 per cent of the farmers own the land they till. The farm lands are mostly parts of large estates, and are leased to "colonists" or tenants, who pay rent by handing over a portion of their crop each year, the rent paid usually be-ing 25 to 30 per cent of the crop, threshed and delivered to the railway sta-tion. Many of the estate owners are non-resident and make their homes in Buenos Aires, and the result is that tenants are liable to take very little interest in the land except to get the most out of it dur-ing tenancy. Frequently the only build-ing on the holding is a small house of sun-baked briek, prohably huilt by the tenant, and there is nothing suggestive of home or community life to attach him to the farm or district. Constant movement of colonists from one farm to another, and one district to another, is the result. Labor is now largely provided within the colonist's own family circle. Former-ly there was an annual migration of the

Labor is now largely provided within the colonist's own family circle. Formerthe colonist's own family circle. Former-ly there was an annual migration of Ital-ians and Spaniards, especially the former, who took advantage of cheap steamer fares to come to South America for the harvest, but the advent of the reaper-thresher has curtailed this movement eavy considerable. very considerably.

The rural credit situation is not favor-able. About 80 per cent of the farmers do not own the land, and have therefore no standing with the banks, and in the absence of any system of grading, weigh-ing and public storage of grains, they cannot pledge their wheat to the banker for a loan. The grain exporters are very powerful and wealthy firms, and they do some loaning to farmers on growing crops, but the borrowers are carefully se-lected and are mostly the class of men who are in a position to horrow clsex/here if the exporters are unwilling to lend them the money. They are mostly men with big acreages whose grain the ex-porters are desirous of securing for them-selves. The smaller man is confined to the local storekeper. The rural credit situation is not favor-

Argentina's population is close to 10,-000,000, and of this total no less than 2,-000,000, and of this total no less than 2,-000,000, or about 20 per cent, are to be found in the city of Buenos Aires. Ur-ban dwellers account for about 58 per cent and the rural population only 42 per cent in a country that is primarily agri-cultural and pastoral. The great bulk of the colonists live from hand to mouth, and their standard of living is very low. Italian and Spanish innigrants noise up a good portion of this rural population, with many of them illiterates. Education is free and compulsory in the primary schools, but as the population is only about six to the square mile there nat-urally is a searcity of schools. Taking the whole population, rural and urban, out of 100 children entering school it is estimated that only 30 reach the third standard, and less than two reach the standard, and less than two reach the sixth.

# YE PURITANICAL FLOUR

<section-header><section-header>

WITY WORK? Applicant: "Well, 'ere 1 am to see abalit that job you advertised." Miller: "I see. Do you think you can do the work?"

Applicant: "Work? Lor lumme, I thought you wanted a foreman!"-Exchange.

The editor was dying, but when the doctor bent over him, placed his ear on his breast, and said, "Poor man! Cir-culation almost gene" he set up and culation almost gone," he sat up and shouted: "Not at all! We have the larg-est circulation in the country!"-Exchange.

### EXTRA! EXTRA!

Elmer Twitchell is perfecting a new ticker. On every tenth quotation it drops an aspirin tablet.—II. I. Phillips, in the Evening Sun.

Earnest Angler: "S-s-s-sh!" Wife: "Why? Can you hear a fish coming down the river, darling?"---Punch.

### HE WANTED TO

The buxom woman was standing in the streetcar, holding to a strap. The can-tankerous looking man was seated read-ing. The car swung and she stepped on his foot. "Madam," he barked, "will you please

"Put your foot where it belongs," she replied sharply. "Don't tempt me, madam, don't tempt me," he countered,—Dockette. . .

### WAITING

The man was playing alone. Two boys kept following him around the course. At the ninth hole, he turned to the boys

and said: "You'll never learn to play

Locust Samson had been bern and reared in the backwoods and was a grown man before he made his first visit to the eity. He went to a hotel for din-ner and, as an appetizer, was served a dish of large olives. Locust looked them over carefully and then motioned for the waiter.

"Ah don' wants ter bothah you." he said in an awestruck voice, "but Ah'd shoah like to see de pods dem peas come in."-Erchange.

### INSECTS IN GRAIN AND FLOUR STUDIED BY NATIONAL BUREAU

STUDIED BY NATIONAL BUREAU WASHINGTON, D. C.—An outstanding feature of the work of the Bureau of Entomology, United States Department of Agriculture, during the year ended June 30, 1929, was in connection with insects attacking stored grain and grain products. Emphasis has been placed on the Investigation of insects affecting flour. "The data obtained during the year have had to do with the control in flour mills and flour warehouses," the bureau states in its annual report recently issued. "They indicate that there is great need for a more thorough attack upon this problem than has been possible hereto-fore."

fore." The field control work directed against the weevils attacking stored corn indi-cates the desirability of preventing wee-vils from storage getting into the fields. "This work seems to indicate," the re-port states, "(1) that if no weevils are allowed to leave the bins or cribs where grain is stored, there will be no field in-festation; (2) that weevils in large num-bers do not fly great distances from the source of infestation; (3) that two fumi-gations a year, when properly done, will source of intestation; (3) that two fumi-gations a year, when properly done, will keep stored corn free of weevils; (4) that weevils are being successfully and economically controlled by fumigation, and (5) that there is no insect in the South as destructive to farm wealth which can be more easily controlled." The bureau warns that "indications

The bureau warns that "indications point to impending outbreaks of grass-hoppers in North Dakota and many countles in Texas. The grasshopper pop-ulation in the northern section of the great plains area has gradually increased during the last three years, until in the fall of 1928 a survey in western North Dakota indicated strongly the immi-nence of a general outbreak this year in that section."

### ARCHER-DANIELS-MIDLAND OFFICERS ARE RE-ELECTED

MINNEAPOLIS, MINN.-S. M. Archer was re-elected president and three new directors were chosen at the annual meeting of the stockholders and directors of the Archer-Daniels-Midland Co., lin-seed crusher, Minneapolis. New directors are George H. Prince, St. Paul, presi-dent of the First Bank Stock Corpora-tion; Thomas L. Daniels and Philip S. Duff. With their election the hoard was expanded to 12 members. At the annual meeting of the board immediately following the stockholders' meeting, G. A. Archer and Samuel Mairs were re-elected vice presidents; W. H. Morris was re-elected secretary and L. M. Leffingwell re-elected treasurer. MINNEAPOLIS, MINN .- S. M. Archer

M. Leffingwell re-elected treasurer.

Prospects for 1930 are "rery favor-able," Mr. Archer said in his annual re-port. He also predicted that northwest producers will receive an excellent price for flaxseed next year because of the world shortage of flaxseed supplies during 1929.

### TURKEY WHEAT IS KANSAS LEADER

TERREY WHEAT IS KANSAS LEADER WIGHTA, KANSAS.—Wheat variety tests, made the past senson by the Rice County, Kansas, Farm Bureau, show best results from imported Blackhull seed, with the average at 23.92 bus per acre. Imported Turkey was second, showing a yield of 23.2 bus. Locally grown seeds gave the following: Turkey, 22.26; Black-hull, 21.3; Fulcaster, 20.2, and Kanred, 20.17. 20.17.

# Spring Wheat Flour We are giving special attention to the mill-ing of pure and strong spring wheat flour

for both the baking and jobbing trades.

The location of our mill is most advantageous for originating spring wheat, either ex-lake or on a milling-in-transit basis.

It is centrally and strategically located for giving quick and efficient service to customers.

All our flours are milled under laboratory control-our own laboratory.

# "SAY JIM! how do you produce such a bully flour?"

"Well I tell you Bill—first I buy the best wheat I can get.

"Then I mill it as well as I know how.

"Then I add AGENE—to give it maximum baking value—

"And NOVADELOX to give that wonderful white color—

The N-A Mills are the Busy Mills!

"You had better try NOVADEL-AGENE, Bill."
